Contemporary Economists in the West Isaak Ilyich Rubin, 2024-08-26 Isaak I Rubin author of numerous works in Marxist theory explains the failure of the Austrian School's attempt to reduce political economy to individual psychology Emphasising the sociological dimension of Marx's work Rubin welcomes a new social direction in the writings of Rudolf Stolzmann Alfred Amonn and Franz Petry These economists rejected Austrian individualism but their works were often influenced by the ethical idealism of Kant and Hegel resulting in detachment of the economy's social form from the material process of production Rubin critically explores methodological differences between Marx and early twentieth century critics and proponents of marginalist economic theory

Capital. Illustrated Karl Marx, 2020-01-14 Das Kapital also called Capital A Critique of Political Economy is the most cited book in the social sciences published before 1950 Marx aimed to reveal the economic patterns underpinning the capitalist mode of production in contrast to classical political economists such as Adam Smith Jean Baptiste Say David Ricardo and John Stuart Mill Marx proposes that the motivating force of capitalism is in the exploitation of labor whose unpaid work is the ultimate source of surplus value Das Kapital proposes an explanation of the laws of motion of the capitalist economic system from its origins to its future by describing the dynamics of the accumulation of capital the growth of wage labour the transformation of the workplace the concentration of capital commercial competition the banking system the decline of the profit rate land rents et cetera

What's Left Malcolm Harris, 2025-04-15 A vital guide for collective political action against the climate apocalypse from bestselling progressive intellectual Malcolm Harris a brilliant thinker and writer capable of making the intricacies of economic conditions supremely readable Vulture Climate change is the unifying crisis of our time But the scale of the problem can be paralyzing especially when corporations are actively staving off changes that could save the planet but which might threaten their bottom lines To quote Greta Thunberg despite very clear science and very real devastation the adults at the table are still saying blah blah blah Something has to change but what and how In What's Left Malcolm Harris cuts through the noise and gets real about

our remaining options for saving the world Just as humans have caused climate change we hold the power to avert a climate apocalypse but that will only happen through collective political action Harris outlines the three strategies progressive socialist and revolutionary that have any chance of succeeding while also revealing that none of them can succeed on their own What s Left shows how we must combine them into a single pathway a meta strategy one that will ensure we can move forward together rather than squabbling over potential solutions while the world burns Vital and transformative What s Left confirms Malcolm Harris as next generation David Graeber or Mike Davis a historian activist who shows us where we stand and how we got here while also blazing a path toward a brighter future

Theories of Surplus Value Karl Marx,2020-10-04 Theories of Surplus Value is a book that unlike Marx actually needs an introduction Theories was intended to be collected and published as the fourth volume to Marx s Capital but after Engels had successfully collected and published volumes two and three after Marx s death Engels died before he could publish it Theories has had a long history of being in and out of publication and particularly in and out of being an actually accessible publication In 1905 the infamously hated by Lenin Karl Kautsky published the first edition of the manuscript in three volumes separated and rearranged by Adam Smith in volume one to David Ricardo in the other two volumes with the breakup of the Ricardian school as the third volume Kautsky s version circulated in print and was translated to many languages over the decades remaining the sole version of Theories until The Institute of Marxism Leninism published a new German version This arrangement while still relatively close to Kautsky s narrative arrangement of tracing surplus value from Smith to the Ricardian split into vulgar economics annotated the manuscript with different topic headings This version was then translated into English by Progress Publishers and this is the version of the book which circulates today and is considered to be the most accurate version to Marx s notebooks This Radical Reprint by Pattern Books is made to be accessible and as close to only manufacturing cost as possible This third volume of Theories of Surplus Value covers the confusion between the concepts of commodity and capital constant and variable capital and over production the problem of the relativizing the categories of value and equivalence John Stuart Mill s reduction of Ricardian s economic theories and the reductions of surplus value into profit theory and as Marx continually says its descent into being vulgar political economy These three volumes in totality are to show how the classical theories of value led to a theory stuck within the market paradigm and caught in the loop of capitalist circularity For Marx the current ontology of political economy only ruled within the scope of pragmatism within the market system and these programs no longer offered any integrated theory of capitalism

The Dream of the Great American Novel Lawrence Buell,2014-02-10 The idea of the great American novel continues to thrive almost as vigorously as in its nineteenth century heyday defying 150 years of attempts to dismiss it as amateurish or obsolete In this landmark book the first in many years to take in the whole sweep of national fiction Lawrence Buell reanimates this supposedly antiquated idea demonstrating that its history is a key to the dynamics of national literature and national identity itself The dream of the G A

N as Henry James nicknamed it crystallized soon after the Civil War In fresh in depth readings of selected contenders from the 1850s onward in conversation with hundreds of other novels Buell delineates four scripts for G A N candidates One illustrated by The Scarlet Letter is the adaptation of the novel s story line by later writers often in ways that are contrary to the original author s own design Other aspirants including The Great Gatsby and Invisible Man engage the American Dream of remarkable transformation from humble origins A third script seen in Uncle Tom s Cabin and Beloved is the family saga that grapples with racial and other social divisions Finally mega novels from Moby Dick to Gravity s Rainbow feature assemblages of characters who dramatize in microcosm the promise and pitfalls of democracy The canvas of the great American novel is in constant motion reflecting revolutions in fictional fashion the changing face of authorship and the inseparability of high culture from popular As Buell reveals the elusive G A N showcases the myth of the United States as a nation perpetually under construction
