The Last Encounter:

Last Encounter with the Enemy Greg Johnson, 2004 Greg Johnson's latest collection of stories offers insights both subtle and startling into the workings of the human heart from a child's eye view of marital strife and a thoughtless betrayal of first love to the expansive reveries of complicated conflicted adults looking ahead to new lives or back on past missteps and misfortunes Johnson also delves into his literary roots with tales of imaginary encounters with Virginia Woolf Sylvia Plath Emily Dickinson and Flannery O'Connor who in the title story engages in a fierce battle of wills with a precocious eleven-year-old boy Through it all Johnson demonstrates his gift for describing that telling detail a sentence a gesture a memory that instantly reveals a personality as if illuminated by lightning Praise for *I Am Dangerous* A bravura literary performance He rings a hundred changes on the emotional issues with which he deals keeping them always interesting always mysterious changing and evolving before our eyes Pinckney Benedict Chicago Tribune Book World sense of the term The unique atmosphere and sensibilities of the author's native South color his prose imbuing it with a special vitality Charles Solomon Los Angeles Times Each of these stories is a prize of insight and storytelling Paul Malone Dallas Morning News Johnson offers keen observations on contemporary life Elizabeth Ferber New York Times Genuine and perceptive new proof that Greg Johnson is a gifted storyteller and interpreter of the ties that bind in every sense of the word Cathy High Atlanta Journal Constitution As always Johnson's prose is polished penetrating understated *I Am Dangerous* once again confirms Johnson as an expert navigator of the human heart in all its vagaries Michael Upchurch San Francisco Chronicle

Sun Rays Joshua Livingston, 2011-07-08 In those hasty moments when a child can no longer stand the insanity of the

grown up world and the only way to properly react is to cry there is nothing like a good story to help wind them back in Stories bring us together These days families fall apart because they lack a common story Nation rises up against nation because we've traded shared stories for individual ideals What is the antidote for the decay and erosion of our society What is the cure for the sickness and separation of our day Whatever it is it starts in the home and it may be as simple as a circle of friends telling tales Let us come on our knees like children sit at the feet of our Master and listen as he tells us a story This collection is for anyone who is a child fifty one tales in all written with brevity in the interest of short attention spans yet didactic in that each contains a moral center While they are geared towards both younger children and teenagers parents and educators may find themselves awakening as they read leaving them to wonder Who is the child And who is the Teacher

Technical Report - Jet Propulsion Laboratory, California Institute of Technology Jet Propulsion Laboratory (U.S.),1970 **Dramatic Encounters in the Bible** M. E. Andrew,2013-07-31 This book began when the author realised that when people said they were fascinated by particular biblical passages they were usually ones that presented dramatic encounters between people and between God and people Such are the passages interpreted in this book They usually set a vivid scene that heightens the dramatic nature of the encounter and animated dialogue often directly addresses the reader There is also animated action that is vividly striking and often sudden and unexpected These features involve the readers themselves and may question them about what they expect Indeed the dramatic encounters provocatively lead to unexpected new life in the future *The Mystery of Death* Ladislaus Boros,2020-04-21 What precisely happens at the time of death is a question that theologians have struggled over for centuries but have never answered satisfactorily The response to this question that Ladislaus Boros gives in his monumental synthesis *The Mystery of Death* is that in death we meet Christ fully for the first time and in doing so attain to full consciousness and freedom It is therefore only in the moment of death that humans are able to elect for or against their eternal salvation In other words death is a kind of judgment day but it is we ourselves who pass judgment on ourselves In her introduction and commentary Cynthia Bourgeault argues passionately that Ladislaus Boros represents a necessary link to understanding the radical theology of Teilhard de Chardin She presents Boros as a powerful potential bridgebuilder Standing firmly on the shoulders of his celebrated Jesuit mentor Karl Rahner and highly skilled in the scholastic discourse that Teilhard himself eschewed he is able to mediate an illuminating dialogue between Teilhard and the greater Christian theological tradition not as is so often the case in so much of contemporary Teilhardian scholarship by secularizing Teilhard's thought or draping it in current evolutionary jargon but by piercing to the very marrow of Teilhard's Christic mysticism and carrying it to an even more brilliant degree of spiritual luminosity Knowledge Management for Health Care Procedures David Riano,2008-02-23 The incursion of information and communication technologies ICT in health care entails evident benefits at the levels of security and efficiency that improve not only the quality of life of the patients but also the quality of the work of the health care professionals and the costs of national health care

systems Leaving research approaches aside the analysis of ICT in health care shows an evolution from the initial interest in representing and storing health care data i.e. electronic health care records to the current interest of having remote access to electronic health care systems as for example HL7 initiatives or telemedicine This sometimes imperceptible evolution can be interpreted as a new step of the progress path of health care informatics whose next emerging milestone is the convergence of current solutions with formal methods for health care knowledge management In this sense K4CARE is a European project aiming at contributing to this progress path It is centered on the idea that health care knowledge represented in a formal way may favor the treatment of home care patients in modern societies The project highlights several aspects that are considered relevant to the evolution of medical informatics health care knowledge production health care knowledge integration update and adaptation and health care intelligent systems

In Search of the Afropolitan Eva Rask Knudsen, Ulla Rahbek, 2016-07-18 In Search of the Afropolitan explores human encounters and moments that speak to the challenges of being a 21st century African of the world Against the background of an engaging evaluation of the heated debate on Afropolitanism and what constitutes an Afropolitan the authors turn to literature and its intrinsic capacity for unfolding the human figure of the African as inherently complex and multidimensional Through a detailed probing of the Afropolitan in literary narratives the book enters into conversations about self understanding and the signification of Africa in the contexts of global mobility The book conceives of Afropolitanism as a flexible space of inquiry that curbs the inclination to set the definition of the ism in stone Instead it attempts to distil through close up character analyses a multifarious sense of what it means to be Afropolitan in the contemporary moment In that sense the encounters we come across in the literary narratives produce unexpected ontological negotiations on what it means to be African in the world today As a special feature of In Search of the Afropolitan the authors conversations with prominent writers thinkers and critics provide a lively context for the ongoing debate on Afropolitanism and the Afropolitan

Encounters at the Counter Barbara Fox, Lorenza Mondada, Marja-Leena Sorjonen, 2023-01-26 Bringing together a diverse collection of studies from a team of international scholars this pioneering volume focuses on interactions in shops exploring the dynamics of conversation between sellers and customers Beginning with the emergence of a need for a product before the request to a seller is actually made all the way through to the payment phase it explores the rich and deeply methodical practices employed by customers and sellers as they go about the apparently mundane work of buying and selling small items It looks at how seller and customer interact both verbally and by means of manipulating the material objects involved across a range of different kinds of purchase Providing new insights into multimodal human interaction and the organisation of the commercial activity it aims to bring about a new understanding of the fundamental ways in which economic value possession and ownership is achieved
