Jenner, 2016-05 If redwood trees could share their stories what would they say Some of these giants are thousands of years old but all have witnessed some truly unique moments in history Historic Redwood National and State is a vibrant collection of essays sharing different parts of Redwood National Park's history from the Native Americans and the early explorers to park visitors today Celebrate the 100th anniversary of the National Park Service and learn more about the cultural political and natural history of Redwood National and State Parks *Redwood National Park (N.P.), General Management Plan (GMP)*, 1980 **Annual Report - Pacific Northwest Forest and Range Experiment Station** Pacific Northwest Forest and Range Experiment Station (Portland, Or.), 1967 **Defending Giants** Darren Frederick Speece, 2016-10-14 Giant redwoods are American icons paragons of grandeur exceptionalism and endurance They are also symbols of conflict and negotiation remnants of environmental battles over the limits of industrialization profiteering and globalization Since the middle of the nineteenth century logging operations have eaten away at the redwood forest particularly areas covered by ancient giant redwoods Today such trees occupy a mere 120 000 acres Their existence is testimony to the efforts of activists to rescue some of these giants from destruction Very few conservation battles have endured longer or with more violence than on the North Coast of California behind what locals call the Redwood Curtain *Defending Giants* explores the long history of the Redwood Wars focusing on the ways rural Americans fought for control over both North Coast society and its forests Activists defended these trees not only because the redwood forest had dwindled in size but also because by the late twentieth century the local economy was increasingly dominated by multinational corporations The resulting conflict the Redwood Wars pitted workers and environmental activists against the rising tide of globalization and industrial logging in a complex war over endangered species sustainable forestry and of course the fate of the last ancient redwoods Activists perched in trees and filed lawsuits while the timber industry led by Pacific Lumber fought the lawsuits and used their power to halt reform efforts Ultimately the Clinton administration sidestepped Congress and the courts to negotiate an innovative compromise In the process the Redwood Wars transformed American environmental politics by shifting the balance of power away from Congress and into the hands of the executive branch Ecosystems of California Harold Mooney, Erika Zavaleta, 2016-01-19 This long anticipated reference and sourcebook for California's remarkable ecological abundance provides an integrated assessment of each major ecosystem type its distribution structure function and management A comprehensive synthesis of our knowledge about this biologically diverse state *Ecosystems of California* covers the state from oceans to mountaintops using multiple lenses past and present flora and fauna aquatic and terrestrial natural and

**Living Deep Ecology** Bill Devall,2020-11-24 Living Deep Ecology A Bioregional Journey is an exploration of our evolving relationship with a specific bioregion It is set in Humboldt County in northwestern California in the Klamath Siskiyou bioregion By focusing on a specific bioregion and reflecting on anthropogenic changes in this bioregion over three decades Bill Devall engages the reader in asking deeper questions about the meaning we find in Nature He addresses questions such as how do we relate the facts and theories presented by science with our feelings our intimacy and our sense of Place as we dwell in a specific bioregion This book engages the reader to consider our place in Nature Devall approaches the bioregion not from the perspective of agencies and government but from the perspective of the landscape itself [Green Metropolis](#) David Owen,2009-09-17 Look out for David Owen s next book Where the Water Goes A challenging controversial and highly readable look at our lives our world and our future Most Americans think of crowded cities as ecological nightmares as wastelands of concrete and garbage and diesel fumes and traffic jams Yet residents of compact urban centers Owen shows individually consume less oil electricity and water than other Americans They live in smaller spaces discard less trash and most important of all spend far less time in automobiles Residents of Manhattan the most densely populated place in North America rank first in public transit use and last in percapita greenhouse gas production and they consume gasoline at a rate that the country as a whole hasn t matched since the mid 1920s when the most widely owned car in the United States was the Ford Model T They are

also among the only people in the United States for whom walking is still an important means of daily transportation. These achievements are not accidents. Spreading people thinly across the countryside may make them feel green but it doesn't reduce the damage they do to the environment. In fact it increases the damage while also making the problems they cause harder to see and to address. Owen contends that the environmental problem we face at the current stage of our assault on the world's nonrenewable resources is not how to make teeming cities more like the pristine countryside. The problem is how to make other settled places more like Manhattan whose residents presently come closer than any other Americans to meeting environmental goals that all of us eventually will have to come to terms with.

**Break Through** Michael Shellenberger, Ted Nordhaus, 2009-03-10. Two of Time magazine's Heroes of the Environment reject the status quo of liberal politics and offer a bold vision for addressing climate change. Michael Shellenberger and Ted Nordhaus triggered a firestorm of controversy with their self-published essay *The Death of Environmentalism* which argued that the existing model of environmentalism cannot adequately address global warming and that a new politics needs to take its place. In this follow up to their essay the authors give an expansive and eloquent manifesto for political change. American values have changed dramatically since the environmental movement's greatest victories in the 1960s. And while global warming presents exponentially greater challenges than any past pollution problem, environmentalists continue to employ the same tired and ineffective tactics. Making the case for abandoning old categories: nature versus the market, left versus right, the authors articulate a new pragmatism that has already found champions in prominent figures such as Hillary Clinton and Barack Obama. Seeing a connection between the failures of environmentalism and the failures of the entire left-leaning political agenda, the authors point the way toward an aspirational politics that will resonate with modern American values and be capable of tackling our most pressing challenges. To win, Nordhaus and Shellenberger persuasively argue, environmentalists must stop congratulating themselves for their own willingness to confront inconvenient truths and must focus on building a politics of shared hope rather than relying on a politics of fear.
