The Last Starship From Earth:

The Last Starship from Earth John Boyd, 1972-01-01 The Last Starship from Earth John Boyd, 1970 The last starship from earth John Boyd, 1972 *Earth's Last Starship* Daniel Peyton, 2018-10-08 ONE LAST STARSHIP IS EARTH'S LAST HOPE The Earth had four fleets to fight the invading enemy The first fleet valiantly protected earth but it wasn't enough Three fleets would arrive soon and end the threat but they never came through the wormhole One ship escaped the massacre fleeing deep into space while the rest of Earth's defenses were destroyed Only the barrier around the planet keeps the enemy from finishing what they started Ten years have passed for the USS Orlando Captain Brian Shepard and his dwindling crew are dedicated to saving their home The mighty Tolkonian Empire is equally determined to capture them Captain Shepard is certain there is a way to find those missing three fleets The answer rests with a human scientist lost in the galaxy but when the crew of the USS Orlando locates him they encounter a strange alien who can help them find the answers they seek Alone hunted and scared Earth's last starship is Earth's last hope The Tolkonian Empire controls most of the galaxy and will stop at nothing until they have a secret that Earth is protecting Can the crew of The Orlando survive long enough to save their home planet How did three thousand ships vanish in a blink of the eye Can a crew of five change the course of history and save humankind from extinction **Nature & Science on the Pacific Coast**, 1915 *SF: the Other Side of Realism* Thomas D. Clareson, 1971 A collection of twenty-five essays from eight countries illustrating the many approaches to science fiction **New Worlds for Old** David Ketterer, 1974 Discusses the work of Edgar Allan Poe Ursula K. Le Guin Charles Brockden Brown Stanislaw Lem Mark Twain Herman Melville Kurt Vonnegut and others **Magill's Guide to Science Fiction and Fantasy Literature: Dream**, 1996 These four volumes cover 791 books or series 238 of them published during the 1980s and 1990s the entries are 1,000 words long for single books and 1,500 for series with a one-sentence summary beginning each entry followed by bibliographical information Volume 4 contains an extensive bibliography of critical works on science fiction and fantasy a list of major award winners a genre index Booklist *The Earth Project* Larry Wood, 2018-03-08 Captain Dave Dawson was Earth's first starship commander He knew that the cosmos was teeming with life He had met folks from the Pleiadian star cluster He had met people from Sirius and Lyran as well He had even met an Arcturian a very advanced race of people But he was most familiar with the race from Orion Nebula So he was thrilled when they selected him to accompany a beautiful Orion woman on a deep space mission in search of a rogue planet or two But things were not what they appeared to be Captain Dawson learned about Earth's real history The terrifying truth that was being kept from mankind He learned about alien abductions and genetic manipulation He was schooled on portals and vortexes and wormholes But the most terrifying of all was the news of who really controlled the Earth A dark cold race of beings ran things from the shadows A vile race that has conquered Earth killed and enslaved the very first colonists to the planet They no longer were content with just Earth They were ready to expand their influence to the heavens themselves

Captain Dawson was assured that a plan a project like no other was unfolding to save mankind and the galaxy itself and that he had a role to play in this project He didn't know what role that would be All he knew was that he needed to return to Earth But the Orions were reluctant to let him go Twentieth-century American Science-fiction Writers David Cowart, Thomas L. Wymer, 1981 Profiles approximately one hundred American science fiction authors who began writing between 1900 and 1970 presenting primary and secondary bibliographies and illustrated biographical essays that chronicle each writer's career in detail and includes eight essays on the genre and its fandom **The New Encyclopedia of Science Fiction** James E. Gunn, 1988 From 19th century beginnings to the cutting edge of Cyberpunk science fiction has powerfully gripped the modern imagination Gunn explores the fascinating landscape of how science fiction became what it is today An eye opener for every fan of the genre 8 pages of full color illustrations **Science Fiction Book Review Index, 1974-1979** Halbert W.
