literary aesthetic and that in the medieval Icelandic literary tradition it was not a question of choosing between prose and verse as the vehicle for stories about the foundational generations of settlers on the island but of combining both modes to forge the unique literary form of the saga Verse quotation has always been recognised as an important aspect of the slendingas gur but to date the significance of verse to the aesthetic of the narrative has mainly been explored with reference to the sub genre of the sk lðas gur sagas of poets in which the proportion of verse to prose is at its highest The contributions to the volume analyse the slendingas gur as prosimetrum that is they treat the combination of verse and prose as a salient generic and aesthetic feature of this body of sagas The contributors are leading scholars in the field of Old Norse studies and their work represents current research trends in the UK USA Iceland Denmark and Germany Their innovative approaches will enable a better understanding on the literary mode of the corpus as a whole as well as producing fresh insights into the compositional habits of the anonymous authors of individual sagas A History of Icelandic Literature Daisy L.
