The Keyboard Music Of John Bull:

The Keyboard Music of John Bull Walker Cunningham, 1984 *John Bull* , *John Bull and English Keyboard Music* Wilfrid Mellers, John Bull, 1954 **Musica Britannica, Vol. 14** MUSICA., John Bull, Music & Science Information Computer Archive, 1960 *The Cambridge Companion to the Harpsichord* Mark Kroll, 2019-01-03 Written by fourteen leading experts in the field this Companion covers almost every aspect of the harpsichord the history of the instrument tuning systems the role of the harpsichord in ensemble its use in the twentieth and twenty first centuries and includes separate chapters devoted to Domenico Scarlatti J S Bach and Handel Chapters featuring almost every national style are written by authors with close connections to the countries about which they are writing including England The Netherlands Germany the Austro Hungarian Empire France Italy Portugal and Spain as well as the less extensive harpsichord traditions of Russia the Nordic and Baltic countries and colonial Spanish and Portuguese America With musical examples illustrations a timeline of the harpsichord and an appendix of composers reliable editions and original sources this book is for all who love the harpsichord or want to learn more about it *Studies on Authorship in Historical Keyboard Music* Andrew Woolley, 2023-10-31 Authorship is a pertinent issue for historical musicology and musicians more widely and some controversies concerned with major figures have even reached wider consciousness Scholars have clarified some of the issues at stake in recent decades such as the places of borrowing and arranging in the creative process and the wider cultural significance of these practices The discovery of new sources and methodologies has also opened up opportunities for reassessing specific authorship problems Drawing upon this wider musicological literature as well as insights from other disciplines such as intellectual history and book history this book aims to build on what has already been achieved by focussing on keyboard music The nine chapters cover case studies of authorship problems the socioeconomic conditions of music publishing the contributions of composers arrangers copyists and music publishers in creating notated keyboard compositions the functions of attribution and ascription and how the contexts in which notated pieces were used affected concepts of authorship at different times and places *Keyboard Music Before 1700* Alexander Silbiger, 2004-08-02 Keyboard Music Before 1700 begins with an overview of the development of keyboard music in Europe Then individual chapters by noted authorities in the field cover the key composers and repertory before 1700 in England France Germany and the Netherlands Italy and Spain and Portugal The book concludes with a chapter on performance practice which addresses current issues in the interpretation and revival of this music *The Keyboard in Baroque Europe* Christopher Hogwood, 2003-06-12 Table of contents *The Harpsichord and Clavichord* Igor Kipnis, 2013-04-15 The Harpsichord and Clavichord An Encyclopedia includes articles on this family of instruments including famous players composers instruments builders the construction of the instruments and related terminology It is the first complete reference on this important family of keyboard instruments The contributors include major scholars of music and musical instrument history from around the world It completes the three volume Encyclopedia of

Keyboard Instruments *A Comparison of the Keyboard Variation Music of John Bull and Johannes Brahms* Alice Jayne Swickard, 1959 **Networks of Music and Culture in the Late Sixteenth and Early Seventeenth Centuries** David J. Smith, Rachelle Taylor, 2016-04-29 Peter Philips c 1560 1628 was an English organist composer priest and spy He was embroiled in multifarious intersecting musical social religious and political networks linking him with some of the key international players in these spheres Despite the undeniable quality of his music Philips does not fit easily into an overarching progressive view of music history in which developments taking place in centres judged by historians to be of importance are given precedence over developments elsewhere which are dismissed as peripheral These principal loci of musical development are given prominence over secondary ones because of their perceived significance in terms of later music However a consideration of the networks in which Philips was involved suggests that he was anything but at the periphery of the musical cultural religious and political life of his day In this book Philips s life and music serve as a touchstone for a discussion of various kinds of network in the late sixteenth and early seventeenth centuries The study of networks enriches our appreciation and understanding of musicians and the context in which they worked The wider implication of this approach is a constructive challenge to orthodox historiographies of Western art music in the Early Modern Period **The Keyboard Music of John Bull** Walker Evans Cunningham, 1981 **Music for Piano** F. E. Kirby, 2023-09-21 This historical survey focuses on music for piano solo but also includes important compositions for piano duet and two pianos Scholarly yet readable it covers the entire repertoire from the Renaissance to the late 20th century and incorporates a bibliography of 1 100 sources for further study **The Praise of Musicke, 1586** Hyun-Ah Kim, 2017-11-20 This volume provides the first printed critical edition of *The Praise of Musicke* 1586 keeping the original text intact and accompanied by an analytical commentary Against the Puritan attacks on liturgical music *The Praise of Musicke* the first apologetic treatise on music in English epitomizes the Renaissance defence of music in civil and religious life While existing studies of *The Praise of Musicke* are limited to the question of authorship the present volume scrutinizes its musical discourse which recapitulates major issues in the ancient philosophy and theology of music considering the contemporary practice of sacred and secular music Through an interdisciplinary analysis of *The Praise of Musicke* combining historical musicology with philosophical theology this study situates the treatise and its author within the wider historical intellectual and religious context of musical polemics and apologetics of the English Reformation thereby appraising its significance in the history of musical theory and literature The book throws fresh light on this substantial but neglected treatise that presents with critical insights the most learned discussion of music from classical antiquity to the Renaissance and Reformation era In doing so it offers a new interpretation of the treatise which marks a milestone in the history of musical apologetics *Five Centuries of Keyboard Music* John Gillespie, 1972-01-01 Describes the origins early designs and development of stringed keyboard instruments and examines the major periods forms and composers of keyboard music

Both from the Ears and Mind Linda Phyllis Austern, 2020-07-15 Both from the Ears and Mind offers a bold new understanding of the intellectual and cultural position of music in Tudor and Stuart England Linda Phyllis Austern brings to life the kinds of educated writings and debates that surrounded musical performance and the remarkable ways in which English people understood music to inform other endeavors from astrology and self care to divinity and poetics Music was considered both art and science and discussions of music and musical terminology provided points of contact between otherwise discrete fields of human learning This book demonstrates how knowledge of music permitted individuals to both reveal and conceal membership in specific social intellectual and ideological communities Attending to materials that go

beyond music's conventional limits these chapters probe the role of music in commonplace books health maintenance and marriage manuals rhetorical and theological treatises and mathematical dictionaries Ultimately Austern illustrates how music was an indispensable frame of reference that became central to the fabric of life during a time of tremendous intellectual social and technological change
