The Kremlin And Labor A Study In National Security Policy:

The Kremlin and Labor Roy Godson, 1977 **British Labour and the Cold War** Peter Weiler, 1988 A critical examination of the labour government and trades Union Congress in the immediate postwar period this book argues that the Cold War was not just a traditional conflict between states but also an attempt to contain the growth of radical working class movements at home and abroad These radical movements stimulated by the Second World War and its aftermath seemed to policymakers within the Labour Party and the TUC to threaten British interests The author contends that the Labour government never seriously considered following a socialist foreign policy but instead sought to shape political developments throughout the world in ways most conducive to maintaining Britain's traditional economic and imperial interests The government was able to follow established policies abroad and increasingly at home at least in part because British trade union leaders supported its attempts to prevent radicals and communists from coming to power in trade union movements inside Britain and throughout the world In so doing the trade union movement significantly extended its links with the state in particular by cooperating with it in the sphere of foreign and colonial labour policy The China Sea Harold C. Divisions of Labor Lonny E. Carlile, 2005-01-31 Divisions of Labor positions the ideological and organizational evolution of the Japanese labor movement within the larger historical currents that shaped and organized labor globally in the twentieth century Interspersing detailed narratives of Japanese labor history with analyses of parallel developments in Western European and international labor movements Lonny Carlile shows how world views and labor movement strategies were shared across national boundaries and shaped in similar ways in the industrialized West and East Beyond this he highlights how in both Western Europe and Japan issues that had divided labor since the 1920s were central to the Cold War which kept labor movements at odds with themselves internally in systematically similar ways His book suggests that to the extent that the historical courses of labor movements diverged this was as much a uh product of differences in geopolitical location as any inherent cultural or nationally specific ideological tendency The volume's approach brings to the fore an important new dimension to our existing understanding of post World War II Japanese labor and political history by outlining the connection between the politics of Japanese labor and the structure and dynamics of global politics In addition by drawing out these parallels and similarities it provides thought provoking insights into twentieth century labor movements in general Divisions of Labor will be of interest not only to students and specialists of Japan and East Asia but also to readers with a more general interest in labor history and politics diplomatic history Cold War history comparative politics and

Schwartz, 2009-05-01 Political Warfare against the Kremlin provides a comparative study and holistic review of American and British propaganda policy toward the Soviet Union during the first fifteen years of the Cold War ranging from the role senior policymakers played in setting propaganda policy to the West's radio broadcasts to the Soviet Union Globalistics and Globalization Studies George Modelski., Anton L. Panov, 2015-01-01 This yearbook is the fourth in the series with the title Globalistics and Globalization Studies The subtitle of the present volume is Global History Big History The point is that today our global world really demands global knowledge Thus there are a few actively developing multidisciplinary approaches and integral disciplines among which one can name Global Studies Global History and Big History They all provide a connection between the past present and future Big History with its vast and extremely heterogeneous field of research encompasses all the forms of existence and all timescales and brings together constantly updated information from the scientific disciplines and the humanities Global History is transnational or world history which examines history from a global perspective making a wide use of comparative history and of the history of multiple cultures and nations Global Studies express the view of systemic and epistemological unity of global processes Thus one may argue that Global Studies and Globalistics can well be combined with Global History and Big History and such a multi disciplinary approach can open wide horizons for the modern university education as it helps to form a global view of various processes
