Misencik,2013-12-07 This book consists of seven stand alone accounts of individuals who operated as spies during the American Revolutionary War They were not trained as covert agents which meant they had to develop their skills and techniques on their own often while in the midst of the enemy where discovery meant almost certain death for them and suffering and hardship for their family and friends Five of them spied for the American cause and two spied for the British Not all were motivated by patriotism and not all escaped capture yet their often painfully gained experience benefited future operatives and operations They all were daring intelligent and resourceful and each had an unusual personality Their labors resulted in battlefield victories thwarted enemy plots and significantly changed the conduct of the war yet in spite of their efforts and their riveting stories they and their deeds have remained relatively unknown

Learning Journals in the K-8 Classroom is the first comprehensive presentation of how to use academic journals effectively for elementary-level instruction. The text outlines the theoretical foundations for using learning journals and provides step-by-step suggestions for implementing them in every content area and at all levels of elementary instruction. Learning journals provide resources and support for reading aloud, independent reading, mini-lessons, cooperative study, individual research, workshops, and the portfolio system. The type of interactive writing students do in learning journals helps them explore complex ideas in the content areas using their own strengths of analysis and response; the journals then become resources for future learning, group discussions, individual conferences, learning assessment reports, and progress. Four introductory chapters show teachers how to create their own journals, introduce journals to students, integrate them with cooperative study, and use them for assessment. Additional chapters focus on the individual curriculum areas of literature, writing, mathematics, science, and social studies. The text includes sample entries from student journals at all grade levels and in every content area and appendices of annotated resources to support journaling and interviews with teachers who use journals in their classrooms. **Books in Print**, 1993-09.
