Spin Works:

Spin This! Bill Press, 2002-01-03 We're all familiar with the warning Don't believe everything you see or hear Bill Press the popular co-host of CNN's Crossfire will have you wondering whether you should believe anything at all Spin intentional manipulation of the truth is everywhere It's in the White House in the courtrooms in headlines and advertising slogans Even couples on dates not to mention book jackets are guilty of spin Now analyst Bill Press freeze frames the culture of spin to investigate what exactly spin is who does it and why and its impact on American society as a whole Depending upon who is doing it spinning can mean anything from portraying a difficult situation in the best possible light to completely disregarding the facts with the intent of averting embarrassment or scandal Using examples drawn from recent history the Clinton presidency the Florida recount and the Bush White House Press first probes spin's favorite haunt politics In addition to surveying the incarnations of spin in the fields of journalism law and advertising Press also chews on the spin of sex and dating a word that has become the very embodiment of spin Perhaps surprisingly however Press argues that spin isn't all bad and that without it the harsh truths of our times might be too tough to swallow With the same keen sense of humor that helped make CNN's Crossfire television's premier debate show and the limited run of The Spin Room so popular Press turns the tables on the prime purveyors of spin called spin doctors noting some of their biggest guffaws and blunders As Press notes it has become abundantly clear that the twenty-first century beginning as it has with a president who was spun into office will be a fertile stomping ground for spin

Your Child's Weight Ellyn Satter,2011-12-01 As much about parenting as feeding this latest release from renowned childhood feeding expert Ellyn Satter considers the overweight child issue in a new way Combining scientific research with inspiring anecdotes from her

decades of clinical practice Satter challenges the conventional belief that parents must get overweight children to eat less and exercise more In the long run she says making them go hungry and forcing them to be active makes children preoccupied with food prone to overeating turned off to activity and likely to gain too much weight Trust is a central theme here children must be able to trust parents to provide as much food as they need to satisfy their appetites parents must trust children to eat only as much as they need Satter provides compelling evidence that if parents do their jobs with respect to feeding children are remarkably capable of knowing how much to eat
