Smith W.M. Buchanan,1884 **Crop Circles for Beginners** Harry Eilenstein,2021-06-14 Since about 1985 crop circles have become a more well known phenomenon In the meantime about 10 000 crop circles have appeared in more than 50 countries However well over half of them come from southern England in the area of Stonehenge Woodhenge Silbury Hill White Horse and other prehistoric monuments Some of them can be proved to have been made by humans but others just as certainly have not been made by humans this is not the starting situation one would wish for as a researcher In the present book 300 of these crop circles are examined more closely It turns out that they contain approx 100 elements which appear in many crop circles Their geometrical form has an easily recognizable meaning Therefore with the help of these words the crop circles composed of them can be read like sentences The meaning is almost always the same a representation of how individuality unfolds Therefore there are many similarities with astrology or the chakra system for example This analytical approach is complemented by 50 dream journeys into individual crop circles which makes the picture that arises from the analytical observation of the crop circles even more rounded Thereby a first impression can be gained of the language of the collective subconsciousness which words and which grammar it uses It is a music of geometry **English Mechanic and World of Science** ,1875 **Encyclopedia of the Solar System** Lucy-Ann McFadden,Torrence Johnson,Paul Weissman,2006-12-18 Long before Galileo published his discoveries about Jupiter lunar craters and the Milky Way in the Starry Messenger in 1610 people were fascinated with the planets and stars around them That interest continues today and scientists are making new discoveries at an astounding rate Ancient lake beds on Mars robotic spacecraft missions and new definitions of planets now dominate the news How can you take it all in Start with the new Encyclopedia of the Solar System Second Edition This self contained reference follows the trail blazed by the bestselling first edition It provides a framework for understanding the origin and evolution of the solar system historical discoveries and details about planetary bodies and how they interact and has jumped light years ahead in terms of new information and visual impact Offering more than 50% new material the Encyclopedia includes the latest explorations and observations hundreds of new color digital images and illustrations and more than 1 000 pages It stands alone as the definitive work in this field and will serve as a modern messenger of scientific discovery and provide a look into the future of our solar system Forty seven chapters from 75 eminent

authors review fundamental topics as well as new models theories and discussions Each entry is detailed and scientifically rigorous yet accessible to undergraduate students and amateur astronomers More than 700 full color digital images and diagrams from current space missions and observatories amplify the chapters Thematic chapters provide up to date coverage including a discussion on the new International Astronomical Union IAU vote on the definition of a planet Information is easily accessible with numerous cross references and a full glossary and index

**Origins of Life Volume II** Vladivoj Valkovic, 2024-09-27 In Origins of Life Volume II life and its origin are inspected from traditional and unexpected points of view The book takes an interdisciplinary approach discussing astrobiology chemical evolution and how the Universe accommodates life molecular biology and philosophy It is an open minded approach fully referenced throughout and each chapter includes a further reading section for anyone wishing to learn more about that perspective on the origins of life First everything started with the Big Bang from nothing It appears now that everything was aiming toward our existence some 13 75 109 years later being capable of understanding it all We did it using powerful tools science philosophy and religion Although we appreciate the contributions made by philosophy and religion our contemplations and doubts are based on the plentiful scientific evidence provided The reader will be guided from make up of the life stage Universe tools and materials needed for the living matter to be formed in the small part of the Universe which one could call Human Neighborhood or the Local Universe It contains galaxies galaxy clusters and voids and the Milky Way and its satellites influencing each other during this time span The book is easy to read accompanied by numerous references it could be of use to the expert in the field as well as for curious minds with a scientific philosophical or religious background

**The Fourth Source** Robert J. Tuttle, 2012 This book describes how the effects of nature s own nuclear reactors have shaped the Earth the Solar System the Universe and the history of life as we know it It focuses on observed effects that are poorly explained by our standard theories identifies certain errors in those theories and shows how these effects are caused by natural nuclear fission reactors The theory of Plate Tectonics is wrong and it is shown that expansion of the Earth causes continental drift A physically reasonable mechanism is proposed for expansion and observational data are presented to show that this occurs Evolution is explained as punctuated equilibrium with mutations caused by abrupt surges of radiation and related life forms that have been interpreted as separate species are actually the result of radiation injury This view is particularly effective as applied to humans The ability of the dinosaurs to live so large is explained by use of Earth Expansion and a more massive atmosphere to provide buoyancy and effective transpiration of oxygen These effects also explain how pterodactyls and ancient birds could fly Expansion induced by impacts at the end of the Cretaceous caused the atmosphere to thin and the dinosaurs collapsed Analysis of geological and biological data supports this The astronomical distance scale is shown to be wrong based on the misconception that trigonometric parallax is an absolute measurement It isn t and the method is led astray by the overwhelming number of asteroidal fragments masquerading as stars The measurements of an expanding Universe are

shown to be in error and an expanding Universe is not needed by an alternative interpretation of Einstein's equations. This interpretation is based on the equal creation of matter and antimatter which is known to occur. Spiral galaxies are not vast Island Universes of stars as we have thought but are shown to be the strewn fields of debris from the nuclear fission detonation of distant planets. The Universe is not made up of 96% Dark Matter and Dark Energy but is instead very ordinary. Abundant evidence and references provide support for all these interpretations. This book opens new opportunities for research by correcting several fundamental errors in our concepts of the Earth, Life and the Universe.

*From the sun's energy source to the formation of the solar system* Dan Bar-Zohar, 2006-12-04

The latest observation of hundreds of exoplanets and the discovery of supermassive black hole at the center of many galaxies set the foundation for the theory presented in this book. The theory suggests that the sun and stars' energy source is not from fusion but instead from magnetic fields spreads in the galaxy by the supermassive black hole at the center of every galaxy. This idea changes every aspect of astronomy and cosmology. The big bang is no longer necessary to explain the source of the mass in the universe and the expansion of the universe. According to this theory, the matter in the universe is created in the cores of stars by conversion of energy to mass. The expansion of the universe is induced by the rapid formation of new galaxies. Stars grow slowly and gradually over tens of billions of years by conversion of energy to mass. The gradual growth of stars and the planet search programs that found hundreds of nearby planets indicate that stars are born from planets. This invalidates the solar nebula hypothesis as the source of the stars and the solar system. Stars fluctuate from a main sequence state to a red giant state. They stay in the main sequence when they receive strong magnetic fields and they turn into a red giant when the magnetic fields are weakened. The sun also fluctuated from a main sequence to a red giant. When the sun was a red giant, it had strong solar wind that supplied the material to create the planets. The solar system contains hard evidence that the sun was a red giant: those are short-lived isotopes and chondrules. The fact that there is hard evidence to a red giant sun confirms this theory. Highlights of this theory include the following:

- 1 The sun's energy source is from magnetic fields from the galactic center.
- 2 The heat induced by the magnetic fields leads to high energy collision between particles in the sun's core that creates new particles and increases the sun's mass.
- 3 All the stars in the galaxy create new mass so the total mass and the size of the galaxy is increasing.
- 4 The stars in the galaxy eject dust that freefalls to the galactic center supermassive black hole. Through the dynamo effect, the gravitational potential energy of the debris and dust is converted to magnetic fields.
- 5 As the galaxy's mass and size increase, globular clusters are detached from the main galaxy to create new galaxies.
- 6 Galaxies spawn new galaxies and the total number of galaxies in the universe increases.
- 7 The universe expands and accelerates from the increase in the number of the galaxies.
- 8 The Big Bang cosmological model is replaced by a new cosmological model that resembles the steady state theory.
- 9 Stars grow gradually from conversion of energy to mass.
- 10 Stars are born from planets; they first grow by accretion and then by conversion of energy to mass.
- 11 Stars fluctuate from main sequence to a red giant. When the

magnetic fields are strong the star is in the main sequence when the magnetic fields are weakened the star turn to a red giant 12 The sun was a red giant 4 6 billions years ago 13 The planets were created from the strong solar wind of the red giant sun
