culture imprints a negative force field that blocks the natural rise of the spirit toward its innate nature of love and altruism. Further, he identifies religion as the primary cultural force behind this negative imprinting. Drawing from recent neuroscience, neurocardiology, cultural anthropology, and brain development research, Pearce explains that the key to reversing this trend can be found in the interaction between infants and adults. The adult mind set effectively compromises the infant's neural and hormonal interactions between the heart and the higher evolutionary structures of the developing brain, thus keeping us centered primarily in our most primitive and defensive neural foundations generation after generation. Pearce shows us that if we allow the intelligence of the heart to take hold and flourish, we can reverse this unconscious loss of our true nature.
