Results of Spiritual Research Rudolf Steiner, 2022-04-26 In a previously unavailable series of talks to the general public Rudolf Steiner builds systematically lecture by lecture on the fundamentals of spiritual science from the nature of spiritual knowledge and its relationship to conventional science the path of personal development and the task of metaphysical research to specific questions on the mystery of death the meaning of fairy tales the significance of morality and the roles of individual figures in human evolution such as Leonardo da Vinci Raphael and Jacob Boehme At the time of these presentations Steiner had already worked in Berlin for many years and thus could reckon with a regularly returning audience to whom what mattered was to enter ever more deeply into the areas of knowledge that were newly opening up to them Marie Steiner As a consequence and through a series of inter connecting lectures whose themes are entwined with one another he was able to communicate a coherent and challenging spiritual perception of reality based on his personal research Presented here with notes an index and an introduction by Simon Blaxland de Lange the 14 lectures include How is Spiritual Science Refuted On What Foundation is Spiritual Science Based The Tasks of Spiritual Research for both Present and Future Errors of Spiritual Research Results of Spiritual Research for Vital Questions and the Riddle of Death The World Conception of a Cultural Researcher of the Present Herman Grimm and The Legacy of the Nineteenth Century [Creative Spiritual Research](#) Coenraad van Houten, 2011 How do adults learn and develop How can adult learning become a living growing process Cover **Knowledge of Spirit Worlds and Life After Death** Dr Bob Woodward, 2020-09-24 Everyone with a curiosity for spiritual knowledge should read this excellent book Peter John psychic artist Based on direct communications with his eight spirit guides Dr Bob Woodward confirms that we have all lived in spirit worlds before our birth and that we will enter these same realms again after our material deaths In a very real sense these higher spirit worlds are actually our true home he says rather than our present physical existence which is only a temporary abode In consultation with his spirit guides including a Tibetan Lama a Jewish Rabbi a Native American and his personal guardian angel Bob Woodward gives a detailed survey of our lives in spirit worlds before birth and after death our relationships there with friends family and even pets and our connections with both good and evil spiritual beings He also gives a commentary on a range of subjects such as reincarnation and climate change In a final extensive and moving interview Woodward finds and speaks with the soul of his deceased father who offers enlightening glimpses of life after death Whilst the author's knowledge is grounded in decades of study of the work of Rudolf Steiner with which he compares the results of his own extrasensory perceptions Knowledge of Spirit Worlds is not intended as a dry philosophical study Rather it has a warm experiential quality based as it is on personal interaction with spirit entities and emphasizes the love that connects all worlds and beings together [Spirituality in College Students' Lives](#) Alyssa Bryant Rockenbach, Matthew J. Understanding New Perspectives of Spirituality Edie Lanphar, Agata

Wilczek, 2019-01-04 This volume was first published by Inter Disciplinary Press in 2015 This book deals with the rapidly developing field of spirituality Although having a singularity of focus the chapters have been written by a cross cultural and international set of researchers who discuss critical issues from an interdisciplinary perspective Thus while a broad range of critical aspects emerge the chapters are threaded together by the concept of spirituality as a lone walk While alone the spiritual journey is also deeply connected to others As a deeply human experience the chapters in this book therefore reflect the prismatic viewpoints that form the understandings and experiences of the spiritual walk This book challenges the reader to start to understand the apparent ambiguity this appears to bring to researchers and practitioners Rather than a roadblock to understanding the multiple frames and facets this brings it is instead a rich field for the exploration of the human condition

Toward a Spiritual Research Paradigm Jing Lin, Rebecca L. Oxford, Tom E. Culham, 2016-07-01 Spirituality and spiritual experiences have been the bedrock of every civilization and together form one of the highest mechanisms for making sense of the world for billions of people Current research paradigms due to their limitation to empirical sensory psychologically or culturally constructed realities fail to provide a framework for exploring this essential area of human experience The development of a spiritual research paradigm will provide researchers from the social sciences and education the tools and abilities to systematically explore fundamental questions regarding human spiritual experiences and spiritual growth A spiritual research paradigm requires an ontology that considers all reality to be multidimensional interconnected and interdependent It requires an epistemology that integrates knowing from outer sources as well as inner contemplation acknowledging our integration of soul and spirit with the body and mind Three additional aspects are useful to a spiritual research paradigm axiology methodology and teleology An axiology concerns what is valued good and ethical A methodology is the appropriate approach to systematic inquiry A fifth and less frequently mentioned aspect is teleology an explanation of the goal or end telos to which new knowledge is applied such as gaining wisdom and truth touching the divine increasing inner peace exploring hidden dimensions or improving society This book takes the first step to develop such a research

paradigm We draw from world spiritual traditions as well as scholarship that has arisen from contemplative practices We also attempt to build a bridge between science and spirituality Spiritual research is not necessarily opposed to scientific research in fact each can shed light on the other

Qualitative Research Methods for Psychologists

Constance T. Fischer, 2011-04-28 *Qualitative Research Methods for Psychologists* is a collection of 14 original articles that teaches readers how to conduct qualitative research. Instead of characterizing and justifying certain methods, the contributors show by means of actual research studies what assumptions, procedures, and dilemmas they encountered. Fischer's introduction, which emphasizes the practical nature of qualitative research, and the closing chapter, which uses a question and answer format to investigate among other subjects what is scientific about qualitative research, are complemented by a glossary and other features that increase the book's utility and value. Addresses a range of practical examples from different traditions such as phenomenology, grounded theory, ethnography, and discourse analysis through actual case studies. Discusses various methodology and combinations of methods like assimilation analysis, dialogal approach, intuitive inquiry, and conceptual encounter. Terms are defined within chapters and/or in a glossary. Helps readers bridge from experimental to qualitative methods. Provides in-depth, philosophically grounded and compelling research findings. Includes practical introduction about steps in qualitative research.

Leading experts describe MedFT as it is practiced today, the continuum of services provided, the necessary competencies for practitioners, and the biological, psychological, social, and spiritual aspects of health that the specialty works to integrate. Data-rich chapters model core concepts such as the practitioner as scientist, the importance of context in health care settings, collaboration with families and communities, and the centrality of the relational perspective in treatment. And the book's wide spectrum coverage takes in research, training, financial, and policy issues among them: Preparing MedFTs for the multiple worlds of health care; Extending platforms on how to build relationships in integrated care; Offering a primer in program evaluation for MedFTs; Ensuring health equity in MedFT research; Identifying where policy and practice collide with ethics and integrated care; Recognizing the cost effectiveness of family therapy in health care. The Social Movement of Spiritually Engaged Alternative Education in Thailand Against the Background of Reform and Globalization Michael Ernest Jones,2010-10-13 The establishment of alternative education private foundations and networks linked to socio political and spiritual advocacies distinguishes the Thai social movement in this research This research is a qualitative study that has made use of historical accounts to associate with data gathered from extensive interviews and case studies in order to inquire as to whether alternative education represents an historical spiritual tradition of opposition to reform hegemony and whether it has had an impact on state reform efforts Also investigated was whether there are some historical patterns associated with the manner in which the state of Thailand has dealt with the forces of globalization and whether the collective action by informal movements of Thai people also has the same predictable pattern of response to the global Analysis and comparison of these issues contribute in determining the values associated with people in the alternative education movement and the motives and intentions associated with state initiated reforms A further related aspect explored is the degree of Thai ness and the embedded historical pattern of both the alternative education movement and education reform These inquiries were answered through the collection of data from three different trips to Thailand over a four year period the last trip a one year stay that permitted case studies and observations at three alternative schools and the interview of a host of participants from home school parents and students to Ministry of Education staff and officers In examining the data a clearer notion of what lies underneath the idea of Buddhist education and spirituality became clearer and how educational reform based on Western ideals and notions has not taken into account Buddhism and culture as education This illumination brings new insight and also raises a new question as to the difference between social movements in a Buddhist nation such as Thailand and social movements in the West

The Three Levels of Sustainability Elena Cavagnaro,George H. Curiel,2017-09-08 This book aims to provide the missing link in current debates around sustainability The role of business governments NGOS and multilateral institutions are widely

covered and many books discuss their possible actions strategies and roles But all of these organizations are made up of individuals And it is individuals who will need to steer society and organizations toward a more just and equitable world The book takes a holistic approach to sustainable development The authors argue that this approach starts and ends with the human being They believe that the personal dimension of sustainable development has been neglected and that it is clear that sustainable societies cannot be achieved without committed individuals who are convinced of the need to be part of the sustainability project The authors frame their ideas around the Three Levels of Sustainability TLS framework which they argue addresses at least some of the weaknesses inherent in a fragmented approach to sustainability Their approach encompasses societal organizational and individual levels and by looking through the lens of how sustainability has evolved provides a roadmap for producing the kind of leaders necessary for sustainable development in all of its dimensions people planet and profit The focus on how the individual can contribute to these three dimensions is unique To arrive at this multi level and multi dimensional framework the book introduces and analyzes theories from sustainable development corporate social responsibility and personal leadership and systemically looks for linkages between them that are useful for sustainability This framework is placed firmly in its historical context The authors are highly literate about the development and interpretations of sustainability and bring us to their current position via informed discussions on the history of economics business and environment social development the corporation and the profit principle CSR and measurement and reporting The book has been designed as both a text for students as well as those already in management and leadership positions in the private public or non profit sectors and will also prove invaluable to those wishing to familiarize themselves with sustainability
