God, Evolution & Science William Stolzman, 2020-04-23 God Evolution Science How Our World Evolved from God presents a new approach for linking God energy and our material world in an evolutionary way Energy is conservative and it exists in two forms potential and kinetic Scientists have well established that our physical world began as a singular kinetic Big Bang Consequently before that event there had to exist a singular potential energetic reality which I name the Almighty This potential reality is forward leaning and thus has the unidirectional dimension of time which must also be quantized Since energy is oriented toward establishing systems the Almighty must also have a systemic aspect The author establishes that evolution is not only biological but logical He shows how from the Almighty logically evolved a quantized bidirectional four dimensional field By progressively breaking the symmetries of this field he is able to show how the four forces of physics logically evolved He subsequently shows how our world as we observe it today logically evolved from the Almighty Whether this Almighty is impersonal or personal is discussed at length Finally the author also shows that beyond the entropic decay of our world our physical world will end a Big Collapse Nonetheless because energy is conservative and eternal the author shows how there remains the logistical possibility of a transcendentally evolved afterlife in the Almighty

Johan De Smedt, Helen De Cruz, 2020-02-13 This Element focuses on three challenges of evolution to religion teleology human origins and the evolution of religion itself First religious worldviews tend to presuppose a teleological understanding of the origins of living things but scientists mostly understand evolution as non teleological Second religious and scientific accounts of human origins do not align in a straightforward sense Third evolutionary explanations of religion including religious beliefs and practices may cast doubt on their justification We show how these tensions arise and offer potential responses for religion Individual religions can meet these challenges if some of their metaphysical assumptions are adapted or abandoned

An Examination of the Doctrine of the Natural Evolution of the Mind Charles Barnes Upton, 1883 **Defending Evolution** Harry Fosdick, 2016-12-19 The editor of The Times has asked me to reply to Mr Bryan s statement on God and Evolution I do so if only to voice the sentiments of a large number of Christian people who in the name of religion are quite as shocked as any scientist could be in the name of science at Mr Bryan s sincere but appalling obscurantism So far as the scientific aspect of the discussion is concerned scientists may well be left to handle it Suffice it to say that when Mr Bryan reduces evolution to a hypothesis and then identifies a hypothesis with a guess he is guilty of a sophistry so shallow and palpable that one wonders at his hardihood in risking it A guess is a haphazard venture of opinion without investigation before or just reason afterward to sustain it it is a jeu d esprit But a hypothesis is a seriously proffered explanation of a difficult problem ventured when careful investigation of facts points to it retained as long as the discovered facts sustain it and surrendered as soon as another hypothesis enters the field which better explains the phenomena in question
