deeper healing beyond the physical and beyond the wall of psychological ailments Because current trends dictate the need for mental health clinicians and practitioners to incorporate techniques and interventions that will address both spirituality and religion within the patient clinician relationship spiritual specific training as a form of cultural awareness and cultural sensitivity is vital As society moves into a mind body spirit awareness clinicians must be trained and made aware of the advantages of addressing the spiritual needs and domains that exist for the individual as well as be cognizant of the tools that can assist in enhancing and further delving into those spiritual areas It is a goal that this research will serve as a source of insight knowledge and understanding of the importance of addressing spirituality in mental health care specifically in its application for patients that are enduring difficulties with their medical healthcare Additionally it is this research s goal to also offer actual therapeutic interventions and guidelines that focus on spirituality and can be utilized in the counseling relationship as a way to enhance the patient s overall medical healthcare experience For this research focus is given to previous research and their findings and well as various items of text and literature that pays special focus to spirituality and its role in improving patient s medical experiences and outcomes More specifically a review in research on the psychological and therapeutic ways in which mental health clinicians can address spirituality in their counseling relationship with their clients as a way to enhance the overall medical experience of the diagnosis is provided The significance of this research lies in the fact that spirituality is an essential component of a person s being and everyday life Because research has shown that there exists a high percentage of individuals who report the importance of spirituality and or religion in their everyday lives there is a great need for clinicians to be able to address these needs over the course of their work with their patients To do so will not only be beneficial for the person s emotional well being but can also prove to increase physical well being as well as nourish the patient clinician relationship Furthermore it will aim to provide a better understanding of the interplay among spirituality religion and healthcare medical and psychological Additionally the discussion of various interventions and guidelines that can be utilized by mental health clinicians can provide current and future clinicians ways in which they can incorporate it into their own practice for the benefit and healing process of their clients This research will also encourage mental health clinicians to become more culturally and spiritually aware in treating their patients as well as increase the likelihood that physicians refer their patients for therapeutic counseling as a way to enhance patient prognosis and overall experience of their medical diagnosis
