Nord, 2014-07-01 Warren Nord s thoughtful book tackles an issue of great importance in contemporary America the role of religion in our public schools and universities According to Nord public opinion has been excessively polarized by those religious conservatives who would restore religious purposes and practices to public education and by those secular liberals for whom religion is irrelevant to everything in the curriculum While he maintains that public schools and universities must not promote religion he also argues that there are powerful philosophical political moral and constitutional reasons for requiring students to study religion Indeed only if religion is included in the curriculum will students receive a truly liberal education one that takes seriously a variety of ways of understanding the human experience Intended for a broad audience

Leadership, Spirituality and the Common Good Henri Claude de Bettignies, Mike J. Thompson, 2010

Re-Enchanting Education and Spiritual Wellbeing Marian de Souza, Anna Halaf, 2017-09-14 Education is in a constant state of renewal internationally where it responds to a number of pressing social political and cultural issues. Processes of globalization, a number of conflicts and acts of terror, economic and environmental crises have led to large waves of migration and asylum seekers arriving in countries with the hope of finding safer and more stable places to settle. This in turn has led to cultural and religious pluralism being a key characteristic of many societies with corresponding issues of belonging and identity. As well for many people there has been a shifting influence of and allegiance away from traditional religious frameworks with the emergence of new religious movements both peaceful and violent and a rise in popularity of spirituality and non religious worldviews which provide alternate frameworks for living healthy and ethical lives. In order to prepare today's student for tomorrow's world one which is confronted by a range of risks and crises and which is being shaped by rapidly changing technologies, educators and researchers are investigating new ways of equipping students to deal with these challenges and opportunities including the nurturing of spiritual wellbeing. This book brings together the voices of many experienced educators to discuss ways to re-enchant education and re-enliven learning programs in response to these 21st century issues in an increasingly global and interconnected world. It examines a range of international contexts including secular and religious educational settings and provides an avenue for visionary voices that identify problems and offer solutions to help shape a more promising education system that will prepare children more constructively and beneficially to flourish in their future worlds.

Spiritual Warfare Handbook Victor Matthews PhD, 2025-01-24 The non-fiction real world subject of the spiritual battle between good and evil is for the most part taboo. The majority of society has chosen to hide in one way or another. But there are many people who simply cannot avoid the truth of this struggle. Here we have such a story written by the hand of the person who personally experienced it all. This text should be approached scientifically and not as some oddity because it is all too real and common. If you are a believer then this will be an informative and helpful guide and if not then perhaps this may bring some clarity into your world concerning darkness and confusion. It is not easy material. It is written in an easy conversational style but the subject matter is frightening and difficult for most. Do not be afraid. You need to know the truth and you need to be armed. God has not given us a spirit of fear but of power and of love and of a sound mind. 2 Tim 1:7 To paraphrase Ephesians 6 this is just one more tool to help you put on the full armor of God and having done everything to stand, stand therefore. God bless you all.

religious organizations and connections to coping adjustment and mental disorder Chapter opening quotations and topical research boxes enhance the readability of this highly instructive text New to This Edition New topics cognitive science of religion religion and violence and groups that advocate terrorist tactics The latest empirical findings including hundreds of new references Expanded discussion of atheism and varieties of nonbelief More research on religions outside the Judeo Christian tradition particularly Islam State of the art research methods including techniques for assessing neurological states
