**Exterior Billiards** Alexander Plakhov, 2012-09-13 A billiard is a dynamical system in which a point particle alternates between free motion and specular reflections from the boundary of a domain Exterior Billiards presents billiards in the complement of domains and their applications in aerodynamics and geometrical optics This book distinguishes itself from existing literature by presenting billiard dynamics outside bounded domains including scattering resistance invisibility and retro reflection It begins with an overview of the mathematical notations used throughout the book and a brief review of the main results Chapters 2 and 3 are focused on problems of minimal resistance and Newton's problem in media with positive temperature In chapters 4 and 5 scattering of billiards by nonconvex and rough domains is characterized and some related special problems of optimal mass transportation are studied Applications in aerodynamics are addressed next and problems of invisibility and retro reflection within the framework of geometric optics conclude the text The book will appeal to mathematicians working in dynamical systems and calculus of variations Specialists working in the areas of applications discussed will also find it useful

**Shortness** James Marsh Sternberg MD, 2022-03-07 This book is about only one thing Shortness singletons or voids It's impossible to overestimate the value distribution plays in bidding accuracy High cards are nice anybody can bid games and slams when the high cards are falling out of their hands onto the table But usually those results don't get you very far It's usually an average or maybe just above You don't win bridge tournaments that way The pairs who bid games and slams on less and who accurately stay out of bad games and slams those are the winners When the room is in 3NT scoring 460 or 490 and you are in six diamonds scoring 920 then come and tell me about it I've tried to cover the different ways a player can ask or tell about shortness The book is divided into chapters on offense and defense There are different ways to do things in bridge I've presented a system I've learned from some of the best You may prefer something else Whatever works great I want to give you some things to think about and suggest solutions There are lots of ways to do things in bridge This is one way I hope you find it helpful at the table James Marsh Sternberg MD Palm Beach Gardens FL
