

The background of the entire cover is a dramatic, dark painting of a stormy sea. In the upper left, a jagged, rocky cliff rises from the water. The sky is filled with heavy, dark clouds, with a bright, hazy light source breaking through in the center. A large, multi-masted sailing ship is shown in a state of extreme distress, tilted at a steep angle as it is battered by massive, white-capped waves. The ship's masts and rigging are visible, some appearing broken. In the foreground, the turbulent water is filled with white foam and dark rocks. Several small figures of people can be seen struggling in the churning water, emphasizing the scale and danger of the storm. The overall mood is one of intense drama and conflict.

German Music Criticism in the Late Eighteenth Century Mary Sue Morrow, 1997-09-18 Music aesthetics in late eighteenth century Germany has always been problematic because there was no aesthetic theory to evaluate the enormous amount of high quality instrumental music produced by composers like Haydn and Mozart This book derives a practical aesthetic for German instrumental music during the late eighteenth century from a previously neglected source reviews of printed instrumental works At a time when the theory of mimesis dominated aesthetic thought leaving sonatas and symphonies at the very bottom of the aesthetic hierarchy a group of reviewers were quietly setting about the task of evaluating instrumental music on its own terms The reviews document an intersection with trends in literature and philosophy and reveal interest in criteria like genius the expressive power of music and the necessity of unity several decades earlier than has previously been supposed

Music as Discourse Victor Kofi Agawu, 2009 The question of whether music has meaning has been the subject of sustained debate ever since music became a subject of academic inquiry This book presents a synthetic and innovative approach to musical meaning which argues deftly for the thinking of music as a discourse in itself

A History of the Music for Wind Band Leon J. Bly, 2023 The book provides a historical survey of the wind band s music and denotes how historical and cultural developments have influenced it over the course of time Although the modern wind band developed first in the 19th century it has its roots in the wind music of ancient times and music survives that has been composed since the Middle Ages Therefore this book covers the music from that time to the present including

the dance music of the Renaissance the Harmoniemusik of the Classical Period and the nationalistic music of the Romantic Period as well as the major wind band repertoire developed after 1900 Schubert Brian Newbould,1999-04-01 Of all the great composers none not even Mozart has been so dogged by myth and misunderstanding as Franz Schubert The notion of Schubert as a pudgy lovelorn Bohemian schwammerl mushroom scribbling tunes on the back of menus in idle moments has never quite been eradicated In this major new biography Brian Newbould balances discussion of Schubert s compositions with an exploration of biographical influences that shaped his musical aesthetics Schubert The Music and the Man offers an eminently readable description of a musician who was compulsively dedicated to his art a composer so prolific that he produced over a thousand works in eighteen years Gifted with an intuitive know how coupled with a Mozartian facility for composition Schubert combined the relish and wonder of an amateur with the discipline and technical rigor of a professional He moved quickly and comfortably among genres and sometimes composed directly into score but many pieces required painstaking revision before they satisfied his growing self criticism Examining afresh the enigmas surrounding Schubert s religious outlook his loves his sexuality his illness and death Newbould offers above all a celebration of a unique genius an idiosyncratic composer of an astonishing body of powerful enduring music Music and the Politics of Negation James R. Currie,2012-08-23 Over the past quarter century music studies in the academy have their postmodern credentials by insisting that our scholarly engagements start and end by placing music firmly within its various historical and social contexts In Music and the Politics of Negation James R Currie sets out to disturb the validity of this now quite orthodox claim Alternating dialectically between analytic and historical investigations into the late 18th century and the present he poses a set of uncomfortable questions regarding the limits and complicities of the values that the academy keeps in circulation by means of its musical encounters His overriding thesis is that the forces that have formed us are not our fate Women, Music, Culture Julie C. Smith, 2005-07-07
