The Impact of Digitalization in a Changing Educational Environment Arinushkina, Anna A., Morozov, Alexander V., Robert, Irena V., 2023-09-18 A resounding question from the world of education remains who truly benefits from digitalization in education and does it why matter Digital transformation brings about fundamental changes to the educational methodological base ensuring access to a wide array of information in various forms but often the potential drawbacks are not properly addressed This can include weakened reasoning skills and shallow learning due to excessive reliance on visualized information The Impact of Digitalization in a Changing Educational Environment showcases how digital transformation can lead to a high quality restructuring of the entire educational system while navigating potential pitfalls Addressing the psychological and pedagogical aspects the book emphasizes that the successful development of digital learning environments hinges on not only advanced technical resources but also competent support and supervision of educational process participants Focusing on the impact of digitalization and digital transformation this book brings to light the latest teaching methodologies providing practical advice for managing the changes induced by digitalization in educational institutions The findings presented are rooted in current practices developed by leading scholars offering actionable recommendations for improving the lives of children families parents and educators in this evolving educational landscape Intended for a diverse readership including policymakers academics educators researchers parents school administrators and the learning industry this book also serves as an invaluable resource for further and continuing education lecturers Its extensive coverage includes various fields like digital transformation educational management quality assessment cross cultural studies distant learning continuous professional development and more

Permanent Planning for Children in Foster Care Portland State University. Regional Research Institute for Human Services,1977 *My Mother Said...* Christine Farrell,2024-05-01 Based on over 1500 interviews with a national random sample of 16 to 19 year olds in 1974 5 originally published in 1978 *My Mother Said* examines the sources of information encountered by young people during their early years which helped or hindered them in their acquisition of knowledge about sex and birth control The study explores teenage patterns of sexual behaviour and contraceptive practice and looks at the way in which learning and sexual behaviour are related Interviews were also conducted with over 300 parents of the teenagers their attitudes to and experiences of the provision of sex related information being discussed and described in detail The author s findings suggest that although sex education from parents and in schools had improved over the previous ten years there was still considerable room for changes in attitude and education By putting the young people s views and experiences in perspective the book would help teachers parents and others concerned to develop sex education along lines which would meet the needs of the young at the time **Parenting in England 1760-1830** Joanne Bailey,2012-04-05 *Parenting in England* is the first study of the world of parenting in late Georgian England The author Joanne Bailey traces ideas about parenthood in a Christian society that was responding to new cultural trends of sensibility romanticism and domesticity along with Enlightenment ideas about childhood and self All these shaped how people from the poor to the genteel thought about themselves as parents and remembered their own parents With meticulous attention to detail Bailey illuminates the range of intense emotions provoked by parenthood by investigating a rich array of sources from memoirs and correspondence to advice literature fiction and court records to prints engravings and ballads *Parenting* was also a profoundly embodied experience and the book captures the effort labour and hard work it entailed Such parental investment meant that the experience was fundamental to the forging of national familial and personal identities It also needed more than two parents and this book uncovers the hitherto hidden world of shared parenting At all levels of society household and kinship ties were drawn upon to lighten the labours of parenting By revealing these emotional and material parental worlds what emerges is the centrality of parenthood to mental and physical well being reputation public and personal identities and to transmitting prized values across generations Yet being a parent was a contingent experience adapting from hour to hour year to year and child to child It was at once precarious as children and parents succumbed to fatal diseases and accidents

yet it was also enduring because parent child relationships were not ended by death lost children and parents lived on in memory

Family Law, Gender and the State Alison Diduck, Felicity Kaganas, 2012-02-07 The third edition of this work on family law comprising text cases and materials provides not only an explication of legal principle but also explores primarily from a feminist perspective some of the assumptions about and constructions of gender sexual orientation class and culture that underlie the law It examines the ideology of the family and in particular the role of the law in contributing to and reproducing that ideology Structured around the themes of equality welfare and family privacy the book aims to offer the benefits of a textbook while also giving students a wide ranging set of materials for classroom discussion As well as providing a firm grounding in family law the text sets the law in its social and historical context and encourages a critical approach by students to the subject It provides an ideal introduction to family law for undergraduates but will be equally helpful for postgraduate students of family law for whom it provides a challenging selection of materials set within a theoretical framework rich in ideas and arguments Review of the second edition Diduck and Kaganas examine legal developments to shed light on society principally by investigating the ways in which family law constructs and regulates family life and responsibilities Theirs is an important and ambitious book that aims ultimately at a feminist restatement of family law The book is written and referenced in such depth that it is a useful resource for legal as well as social science researchers at all levels whether looking for theoretical inspiration or drawing up a literature review The range of diverse sources that Diduck and Kaganas draw on is impressive they seem to have included every bit of material that helps feminists make sense of family law There is a well pitched selection of further reading of such material at the end of each chapter What's more they undersell themselves by describing their book as Text Cases and Materials because they have woven by far the largest proportion of the cases and materials into the text Helen Reece Times Higher Education May 2007 Reviews of first edition A stimulating work which attempts to situate family law in its social historical and political context Its appeal should not be confined to family law students as its commitment to a critical and analytical approach offers insights and ideas with broader significance Mary Childs Child and Family Law Quarterly September 2002 The arguments are provocative the analysis is stimulating and the materials amassed strongly support the authors aim to question the axiomatic status of what is traditionally designated as the family Fiona E Raitt Infant and Child Development September 2002 It is not often that one can say of a textbook in Law that it makes interesting reading with quite the enthusiasm that can be expressed for this text This new publication offers something that few textbooks seem to offer a book you CAN open up virtually anywhere and find an interesting piece on almost any aspect of the broad family law spectrum Penny Booth The Law Teacher September 2002 All the major themes in feminist and constructionist perspectives in family law are presented together with a wealth of readings and extensive references As a teaching manual it is excellent a coherent feminist perspective across the entire range of family law Marty Slaughter Feminist Legal Studies July 2003

Family Centred Group Care: Model Building Frank

Ainsworth, 2018-10-26 Published in 1997 this study focused on building and empirically validating a model of family centred group care This is an alternative to the traditional model of group child care that is primarily child centred and which reflects the notion of group care as a substitute for parental care The model represents a step forward in the conceptualization of group care practice as both child centred and family affirming The Family Centred Group Care instrument used in the study is unique in that this is the first to measure a model of group care empirically The book will be of interest to child welfare practitioners social workers child care workers and other human service personnel as well as managers of agencies that provide group care services for children and at risk youth Researchers and policy makers will also find this book useful as the study advances the application of empirical methodology to human service programs
