

SUBURBIA

its people & their politics

Robert C. Wood

The lower half of the book cover features a solid green background. Scattered across this green field are several white, stylized silhouettes of houses with gabled roofs. These silhouettes are of varying sizes and are arranged in a way that suggests a suburban landscape. Some are positioned in the foreground, while others appear to be in the distance, creating a sense of depth.

Suburbia Its People And Their Politics:

Suburbia, Its People and Their Politics Robert Coldwell Wood, 1958 **Racial and Ethnic Politics in American Suburbs** Lorrie Frasure-Yokley, 2015-12-11 *Racial and Ethnic Politics in American Suburbs* examines racial and ethnic politics outside traditional urban contexts and questions the standard theories we use to understand mobility and government responses to rapid demographic change and political demands. This study moves beyond traditional scholarship in urban politics departing from the persistent treatment of racial dynamics in terms of a simple black white binary. Combining an interdisciplinary multi method and multiracial approach with a well integrated analysis of multiple forms of data including focus groups in depth interviews and census data *Racial and Ethnic Politics in American Suburbs* explains how redistributive policies and programs are developed and implemented at the local level to assist immigrants racial ethnic minorities and low income groups something that given earlier knowledge and theorizing should rarely happen. Lorrie Frasure Yokley relies on the framework of suburban institutional interdependency SII which presents a new way of thinking systematically about local politics within the context of suburban political institutions in the United States today.

This title was originally published in 1960 **Keep Out** Sidney Plotkin, 2023-04-28 This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact. Drawing on a backlist dating to 1893 *Voices Revived* makes high quality peer reviewed scholarship accessible once again using print on demand technology. This title was originally published in 1987 *Politics in Context* R. Robert Huckfeldt, 1986 Political opinions and the behavior of individuals cannot be explained apart from the environments within which they occur. Individual characteristics alone do not determine political actions and opinions. Rather political behavior must be understood in terms of the actor's relationship to the environment and the environmental factors that impinge on individual choice. From the Introduction The central argument of this book is that neighborhood social contexts have important political consequences not only for individual behavior but also for the political vitality of groups in the political process. This argument has nothing to do with suburbanization or with the embourgeoisement thesis as it is traditionally constructed. The embourgeoisement explanation for the disappearance of class politics argues that improved working conditions better pay and suburban living create a working class that is infused by middle class values and a middle class lifestyle. Especially in terms of residential location a suburban residence produces changed values and along with these changed values an entirely different set of political viewpoints. The embourgeoisement viewpoint has been attacked on a number of fronts. One of the moves to suburbia did

not necessarily result in the inculcation of middle class values or in the rise of Republicanism or in the diminution of class loyalty The present effort does not dispute these results there is no reason to believe that individual affluence or suburban residence should necessarily diminish class loyalties or political differentiation along class lines It is argued that 1 social class politics is first and foremost group politics Hamilton 1972 2 group politics cannot be explained on the basis of individual interests and predispositions alone and thus 3 the social contexts of group members must be taken into account in order to explain group politics The important point is that group membership and group politics should not be wholly conceived as the consequence of individual characteristics and individual circumstances Belonging to a group involves patterns of relations that bind the individual to the group the very words provoke an image of strong social ties

The Urban Political Economy and Ecology of Automobility Alan Walks, 2014-07-25 Just how resilient are our urban societies to social energy environmental and or financial shocks and how does this vary among cities and nations Can our cities be made more sustainable and can environmental economic and social collapse be staved off through changes in urban form and travel behaviour How might rising indebtedness and the recent series of financial crises be related to automobile dependence and patterns of urban automobile use To what extent does the system and economy of automobility factor in the production of urban socio spatial inequalities and how might these inequalities in mobility be understood and measured What can we learn from the politics of mobility and social movements within cities What is the role of automobility and auto dependence in differentiating groups both within cities and rural areas and among transnational migrants moving across international borders These are just some of the questions this book addresses This volume provides a holistic and reflexive account of the role played by automobility in producing reproducing and differentiating social economic and political life in the contemporary city as well as the role played by the city in producing and reproducing auto mobile inequalities The first section titled Driving Vulnerability deals with issues of global importance related to economic social financial and environmental sustainability and resilience and socialization The second section Driving Inequality is concerned with understanding the role played by automobility in producing urban socio spatial inequalities including those rooted in accessibility to work migration status and ethnic concentration and new measures of mobility based inequality derived from the concept of effective speed The third section titled Driving Politics explores the politics of mobility in particular places with an eye to demonstrating both the relevance of the politics of mobility for influencing and reinforcing actually existing neoliberalisms and the kinds of politics that might allow for reform or restructuring of the auto mobile city into one that is more socially politically and environmentally just In the conclusion to the book Walks draws on the findings of the other chapters to comment on the relationship between automobility neoliberalism and citizenship and to lay out strategies for dealing with the urban car system
