shrinking public space of education In the 1980s markets were elevated to social and economic icons becoming a new secular faith Privatizing public education became a credible policy in many countries and there have been an increasing number of attempts to restructure and deregulate state schooling Global trade agreements foster domestic and international trade in education services treating education as a commodity to be sold and purchased and many countries adopt various forms of market related practices in education These are not neutral technical managerial changes in the production and delivery of public education They transform education in ways that have profound social and educational consequences To justify the introduction of market reforms in education public schools and educators are being defamed and accused of a series of vices such as inefficiency and laziness We must be reminded that public education i.e. mandatory publicly financed schooling that was introduced in Austria as early as in 1874 and spread to other countries was considered the most progressive movement of the nineteenth and twentieth centuries Public schools were established to make education universally available to all children free of charge and have been recognized as gateways to opportunity Kober 2006 1996, [www.berlin.de](#) **The Jewish parent**, 1957-07
