Sucht, Trauma und Bindung bei Kindern und Jugendlichen Frank M. Fischer,Christoph Möller,2023-09-27 Particularly among children and adolescents who have become severely addicted at an early age there is a strong correlation between addiction trauma and attachment disorder as a frequent form of comorbidity In adulthood as severely and chronically addicted people the individuals affected often become hopeless long term consumers Adolescents attachment behaviour is complex and the treatment which is already difficult is therefore extremely challenging Ways of clarifying this situation represent an innovative development in neurobiology that is currently taking place and is having a major impact on the understanding of addiction Addiction therapy may be able to benefit from these new findings in trauma theory and attachment theory
