Sudden Cardiac Death:

Sudden Cardiac Death WHO Scientific Group on Sudden Cardiac Death, 1985 **Sudden Cardiac Death** Peter Magnusson, Jo Ann LeQuang, 2020-11-19 Sudden cardiac death is a global health threat for which we have only partial answers. With growing elucidation of the underlying pathophysiological mechanisms of sudden cardiac death, better patient identification and treatment options are being developed. These include risk stratification paradigms, ICD therapy, pharmacological options, ablative procedures, and other treatments. This book covers many of these options, including defibrillator technology and clinical applications. It also examines pathophysiological pathways and etiologies, as well as highlights risk stratification in ion channel diseases and structural heart disease, such as dilated cardiomyopathy. **Sudden Cardiac Death [proceedings]**, 1984 **Sudden Cardiac Death, An Issue of Heart Failure Clinics** Raul Weiss, Emile Daoud, 2011-04-28 Sudden cardiac death (SCD) is the number one killer in the United States, claiming the lives of more than 300,000 Americans every year. Thus, it is important for heart failure specialists to be knowledgeable about strategies to prevent, manage risk for, and treat conditions leading to sudden cardiac death. These topics and more are covered in this issue.

Sudden Cardiac Death Silvia Priori, Douglas Zipes, 2009-02-05 This book draws on the established European guidelines from the ESC that address the key issues in sudden cardiac death, such as identifying individuals at risk prior to an episode of ventricular tachyarrhythmia or a sudden cardiac arrest, and responding in a timely fashion to the person suffering the event out of the hospital. It presents an update on what is known about sudden cardiac arrest from basic experimental studies to clinical trials and serves as a complement to the ESC Core Syllabus on this subject. Topics include epidemiology, genetics, arrhythmogenic mechanisms, risk stratification, autonomic nervous system, and phenotypes. Disease states and special populations are also covered, as well as drug, device, and ablation treatments, and cost-effectiveness. All chapters are co-authored by experts from both Europe and the US. The ESC Education Series. This book is part of the ESC Education Series. The series is designed to provide medical professionals with the latest information about the understanding, diagnosis, and management of cardiovascular diseases. Where available, management recommendations are based on the established European Guidelines, which encompass the best techniques to use with each cardiac disease. Throughout the series, the leading international opinion leaders have been chosen to edit and contribute to the books. The information is presented in a succinct and accessible format with a clinical focus. *Sudden Cardiac Death* Masood Akhtar, Robert J. Myerburg, Jeremy N.
