Sufi Symbolism: Symbolism of the natural world Javād Nūrbakhsh, 1990 Symbolism 2019 Natasha Lushetich, 2019-11-18 Special Focus editor Natasha Lushetich Series editors Rüdiger Ahrens Florian Klöcker Klaus Stierstorfer

Symbolism is cohesive It gathers heterogeneity over time across fields of human endeavor and systems of communication Non sequiturs paradox and tautology appear dissipative Yet they are highly productive in reticular and fractal ways Suffice it to look at the philosophical tautology of Parmenides's kind which suggests that being is at the practice of the koan which collapses dualistic thinking by way of incompatible propositions such as the Eastern hill keeps running on the water at logical paradoxes in which the operative logic is sabotaged by its own means as in Hempel's paradox at absurdist dramatic texts in which protagonists record empty time in order to mark the emptiness of the time they are recording as in Beckett's Krapp's Last Tape or at paradoxical games like Maciunas's Prepared Table Tennis played with paddles that have huge holes in them In all of these examples the existence apprehending processes occur via unexpected itineraries in vacant but nevertheless enunciative codes in seemingly futile yet calibrating performances and in a temporality that is the cumulative time's other They catapult the mind into the realm of the extra linguistic the para logical and the meta experiential or they transfigure it through a series of reticular iterations Forty years after Varela et al's groundbreaking work on the embodied emotional and environmentally embedded mind that marked a definitive departure from its former strictly rational conception there is a need to re-examine the territory that lies beyond mind for a different reason the proliferation of algorithmic logics that rely on the idea of a rational agent human or algorithmic making logical self-serving decisions This special issue explores neither rational nor irrational forms of thinking and making It sketches a cartography of a rational processes of meaning and knowledge production that operate across numerous sites practices and disciplines visual and media art literature art history music dance film intermedia and photography Part I Ahistoricity Assemblages and Interpretative Reversals focuses on the legacy of the neo avant garde and amodernism Part II Destinerrance Labyrinths and Folds investigates the ways in which the Derridian delays detours and the Deleuzian folding function as concrete ways of embodied knowledge production Part III Immanent Transcendence offers a glimpse into the reticular and iterative structuring of transcendence that does not pre-exist immanence but is its residue

Symbolic Confrontations NA NA, 2016-05-24 Donal Cruise O'Brien is a leading authority on Islam in Africa This is a collection of his writing over the last 30 years some significantly rewritten to render this a coherent book to use for teaching about the interplay between politics and Islam in Africa The author's main argument is that much of politics

in Africa is negotiated through use of symbols and can not be separated from the religious origins and the systems of belief from which they originate The book focuses on Senegal a fascinating example of the spread of Muslim brotherhoods and their overarching influence on the construction and decision making processes of the state *The Evangelical*

rituals occur as liminal spaces of symbol making Drawing on examples from the Hobbit and Avengers street art politics and work of acclaimed modern artists the book describes how deep culture can be seen as a symbolic map of modern mythology Dismantling literalism and disturbing our view of the world at each step the book unpacks how symbols play out in the modern world and the work they do in transforming the self *Sufism in the West* Jamal Malik, John Hinnells, 2006-04-18

With the increasing Muslim diaspora in post modern Western societies Sufism intellectually as well as sociologically may eventually become Islam itself due to its versatile potential Although Sufism has always provoked considerable interest in the West no volume has so far been written which discusses this aspect of Islam in terms of how it is practised in Western societies Bringing together leading international authorities to survey the history of Islamic mysticism in North America and Europe this book elaborates the ideas and institutions which organize Sufism and folk religious practices The chapters cover the orders and movements their social base organization and institutionalization recruitment patterns in new environments channels of disseminating ideas such as ritual charisma and organization reasons for their popularity among certain social groups the nature of their affiliation with the countries of their origin Providing a fascinating insight into how Sufism operates within different spheres of society Sufism in the West is essential reading for students and academics with research interests in Islam Islamic history and social anthropology
