The Kinds Of Things A Theory Of Personal Identity Based On Transcendental Argument:

The Kinds of Things Frederick C. Doepke, 1996 We normally think of ourselves and the things around us as objects which persist through fairly long stretches of time Hume along with Heraclitus and Buddha denied this degree of permanence Doepke argues for a view of the self that is more in harmony with both Kant and common sense *Transcendental Arguments* Robert Stern, 2003 A distinguished team of philosophers offer a broad and stimulating examination of the nature role and value of transcendental arguments in interrelated essays specially written for this volume Naturalization of the Soul John Barresi, Raymond Martin, 2012-10-12 Naturalization of the Soul charts the development of the concepts of soul and self in Western thought from Plato to the present It fills an important gap in intellectual history by being the first book to emphasize the enormous intellectual transformation in the eighteenth century when the religious soul was replaced first by a philosophical self and then by a scientific mind The authors show that many supposedly contemporary theories of the self were actually discussed in the eighteenth century and recognize the status of William Hazlitt as one of the most important Personal Identity theorists of the British Enlightenment for his direct relevance to contemporary thinking Now available in paperback Naturalization of the Soul is essential reading for anyone interested in the issues at the core of the Western philosophical tradition

Paradox in Christian Theology James Anderson, 2007-03-06 Does traditional Christianity involve paradoxical doctrines that is doctrines that present the appearance at least of logical inconsistency If so what is the nature of these paradoxes and why do they arise What is the relationship between paradox and mystery in theological theorizing And what are the implications for the rationality or otherwise of orthodox Christian beliefs

In *Paradox in Christian Theology* James Anderson argues that the doctrines of the Trinity and the incarnation as derived from Scripture and formulated in the ecumenical creeds are indeed paradoxical. But this conclusion he contends need not imply that Christians who believe these doctrines are irrational in doing so. In support of this claim Anderson develops and defends a model of understanding paradoxical Christian doctrines according to which the presence of such doctrines is unsurprising and adherence to paradoxical doctrines cannot be considered as a serious intellectual obstacle to belief in Christianity. The case presented in this book has significant implications for the practice of systematic theology, biblical exegesis, and Christian apologetics.

The Metaphysics of Identity André Gallois, 2016-06-23 The philosophical problem of identity and the related problem of change go back to the ancient Greek philosophers and fascinated later figures including Leibniz, Locke, and Hume. Heraclitus argued that one could not swim in the same river twice because new waters were ever flowing in. When is a river not the same river? If one removes one plank at a time when is a ship no longer a ship? What is the basic nature of identity and persistence? In this book André Gallois introduces and assesses the philosophical puzzles posed by things persisting through time. Beginning with essential historical background to the problem, he explores the following key topics and debates: mereology and identity, including arguments from Leibniz's Law; the constitution view of identity; the relative identity argument concerning identity; temporary identity; four-dimensionalism; counterpart and multiple counterpart theory; supervenience; the problem of temporary intrinsics; the necessity of identity; indeterminate identity; presentism; criteria of identity; conventionalism about identity. Including chapter summaries, annotated further reading, and a glossary, this book is essential reading for anyone seeking a clear and informative introduction to, and assessment of, the metaphysics of identity.

The Memory of Bones Stephen D. Houston, Stuart David, Karl Taube, 2013-05-01 An analysis of the intellectual and emotional life of ancient Mesoamerican people through studies of figural works and inscriptions. All of human experience flows from bodies that feel, express emotion, and think about what such experiences mean. But is it possible for us, embodied as we are in a particular time and place, to know how people of long ago thought about the body and its experiences? In this groundbreaking book, three leading experts on the Classic Maya (ca. AD 250 to 850) marshal a vast array of evidence from Maya iconography and hieroglyphic writing, as well as archaeological findings, to argue that the Classic Maya developed an approach to the human body that we can recover and understand today. Starting with a cartography of the Maya body as depicted in imagery and texts, the authors explore how the body was replicated in portraiture, how it experienced the world through ingestion, the senses, and the emotions; how the body experienced war and sacrifice and the pain and sexuality; how words often heaven-sent could be embodied; and how bodies could be blurred through spirit possession. From these investigations, the authors convincingly demonstrate that the Maya conceptualized the body in varying roles: as a metaphor of time, as a gendered sexualized being in distinct stages of life, as an instrument of honor and dishonor, as a vehicle for communication and consumption, as an exemplification of beauty and ugliness, and as a dancer and song maker. Their findings

open a new avenue for empathetically understanding the ancient Maya as living human beings who experienced the world as we do through the body *The Ant Trap* Brian Epstein,2015-03-03 In *The Ant Trap* Brian Epstein rewrites our understanding of the nature of the social world and the foundations of the social sciences He develops a new model of the social world and shows that the actions and intentions of social groups often depend on more than their members

Trilingualism in Family, School, and Community Charlotte Hoffmann,Jehannes Ytsma,2004 Countries in Africa America Asia and Europe provide the sociolinguistic contexts described in this volume They involve settings where three or more languages are spoken and where speakers are trilingual With the focus on family school and the wider community the book illustrates personal social cultural and political factors contributing to the acquisition and maintenance of trilingualism and highlights a rich pattern of trilingual language use **Mereology** A. J. Cotnoir,Achille C. Varzi,2021-07-22 Is a whole something more than the sum of its parts Are there things composed of the same parts If you divide an object into parts and divide those parts into smaller parts will this process ever come to an end Can something lose parts or gain new ones without ceasing to be the thing it is Does any multitude of things including disparate things such as you this book and the tail of a cat compose a whole of some sort Questions such as these have occupied us for at least as long as philosophy has existed They define the field that has come to be known as mereology the study of all relations of part to whole and of part to part within a whole and have deep and far reaching ramifications in metaphysics as well as in logic the foundations of mathematics the philosophy of language the philosophy of science and beyond In *Mereology* A J Cotnoir and Achille C Varzi have compiled decades of advanced research into a comprehensive up to date and formally rigorous picture The early chapters cover the more classical aspects of mereology the rest of the book deals with variants and extensions Whether you are an established professional philosopher an interested student or a newcomer inside you will find all the tools you need to join this ever evolving field of inquiry and theorize about all things mereological *What Are We?* Eric T. Olson,2007-09-27 Discussions of personal identity frequently ignore the basic metaphysical nature of human people *What Are We* is the first general study of this important question It explains the question s meaning considers in detail the main possible answers to it and suggests how the problem might be solved Transcendental Arguments in Moral Theory Jens Peter Brune,Robert Stern,Micha H. Werner,2017-03-20 Since Barry Stroud s classic paper in 1968 the general discussion on transcendental arguments tends to focus on examples from theoretical philosophy It also tends to be pessimistic or at least extremely reluctant about the potential of this kind of arguments Nevertheless transcendental reasoning continues to play a prominent role in some recent approaches to moral philosophy Moreover some authors argue that transcendental arguments may be more promising in moral philosophy than they are in theoretical contexts Against this background the current volume focuses on transcendental arguments in practical philosophy Experts from different countries and branches of philosophy share their views about whether there are actually differences between theoretical and practical uses of transcendental arguments They examine and

compare different versions of transcendental arguments in moral philosophy explain their structure and assess their respective problems and promises This book offers all those interested in ethics meta ethics or epistemology a more comprehensive understanding of transcendental arguments It also provides them with new insights into uses of transcendental reasoning in moral philosophy

Multilingualism Larissa Aronin,David Singleton,2012 Offers an account of multilingualism a phenomenon affecting a vast number of communities thousands of languages and millions of language users This book focuses on the knowledge and use of multiple languages It deals with both bilingualism and polyglottism at the level of the individual speaker as well as at the societal level

The Philosophical Review Jacob Gould Schurman,James Edwin Creighton,Frank Thilly,Gustavus Watts Cunningham,1892 An international journal of general philosophy

God for an Old Man Thomas M. Dicken,2015-12-15 God for an Old Man blends elements of careful academic thought about God with elements of personal autobiography and memoir The author is deeply influenced by modern process thought about God stemming from the thought of Alfred North Whitehead and Charles Hartshorne but he also describes his own life as a child adult and now a person entering his eighties The central premise is that a person cannot write about a meaningful God without taking seriously the meaning conflict loss and joy in one s own life Thomas M Dicken is immersed in both literature and visual art He explores the ways in which art and literature can evoke a sense of ultimacy even though we can never attain certain knowledge of the ultimate Just as the psychiatrist Erik Erikson wrote about major stages in human lives Dicken writes with a sense of fulfillment about the insights and values of old age Old age is the age of wisdom a time for offering younger people the insight that all the stages of life have been very much worth living This is not a book of easy or dogmatic answers it is a book of honest exploration

Kant and the Demands of Self-Consciousness Pierre Keller,1998 In Kant and the Demands of Self Consciousness Pierre Keller examines Kant s theory of self consciousness and argues that it succeeds in explaining how both subjective and objective experience are possible Previous interpretations of Kant s theory have held that he treats all self consciousness as knowledge of objective states of affairs and also that self consciousness can be interpreted as knowledge of personal identity By developing this striking new interpretation Keller is able to argue that transcendental self consciousness underwrites a general theory of objectivity and subjectivity at the same time

Identity, Personal Identity and the Self John Perry,2002-06-15 This volume collects a number of Perry s classic works on personal identity as well as four new pieces The Two Faces of Identity Persons and Information Self Notions and The Self and The Sense of

Identity Perry's Introduction puts his own work and that of others on the issues of identity and personal identity in the context of philosophical studies of mind and language over the past thirty years *Kant's Philosophy and the Momentum of Modernity* Robert J. Roepke, 2019-02-08 This book is both a careful study of Immanuel Kant's work and the context of that work in the movement known as early modern philosophy The chief interest of the author concerns the philosophy of perception that is manifest in Kant's doctrines of the transcendental aesthetic and the concept of phenomena Philosophy bears a crucial relationship to the public in terms of the evidence that it identifies as original and binding In the early modern period philosophy repudiated its dependence on ordinary perception and on language as ordinarily used in the setting forth of its own authority This historiographical fact is presently of immense interest as public discourse finds itself rudderless and without agreed upon common facts for deliberation to settle on It was not the view of the ancient Greeks that philosophy could so emancipate itself from the perception of common facts as the original evidence for higher investigations The Early Modern era beginning with Bacon but now more furiously in the work of Kant has anchored a general indictment of ordinary perception in a remnant of natural philosophy Human beings in Kant's philosophy are not capable of knowing what objects external objects are in themselves We may only know what are called appearances and Kant refers to these appearances as phenomena Yet this claim is complicated by the a priori knowledge which Kant claims to possess as regards these phenomena that they must all be eternal substances The book freely moves back and forth between Greek antiquity and the Early Modern period to illustrate the full nature of the rupture on this ground of the metaphysics of fact determination For Aristotle the founder of the theory of substance substances are just the perishable bodies commonly perceived Kant's phenomena which claims to embody what appears to the generality of the human race cannot be that for the human race does not perceive eternal objects **Between Kant and Hegel** Dieter Henrich, 2009-07-01 Dieter Henrich's lectures on German idealism were the first contact a major German philosopher had made with an American audience since the onset of World War II They remain one of the most eloquent interpretations of the central philosophical tradition of Germany and the way in which it relates to the concerns of contemporary philosophy
