The Bishop's Burden Celeste McNamara,2020-08-14 In 1563 the Council of Trent published its Decrees calling for significant reforms of the Catholic Church in response to criticism from both Protestants and Catholics alike Bishops according to the Decrees would take the lead in implementing these reforms They were tasked with creating a Church in which priests and laity were well educated morally upright and focused on worshipping God Unfortunately for these bishops the Decrees provided few practical suggestions for achieving the wide ranging changes demanded Reform was therefore an arduous and complex process which many bishops struggled to accomplish or even refused to undertake fully The Bishop s Burden argues that reforming bishops were forced to be creative and resourceful to accomplish meaningful change including creating strong diocesan governments reforming clerical and lay behavior educating priests and parishioners and converting non believers The book explores this issue through a detailed case study of the episcopacy of

Cardinal Bishop Gregorio Barbarigo of Padua bp 1664 1697 asking how a dedicated bishop formulated a reform program that sought to achieve the Church's goals Barbarigo like other reforming bishops borrowed strategies from a variety of sources in the absence of clear guidance from Rome He looked to both pre and post Tridentine bishops the Society of Jesus the Venetian government and the Propaganda Fide which he selectively emulated to address the problems he discovered in Padua The book is based primarily on the detailed records of Barbarigo's visitations of rural parishes and captures the rarely heard voices of seventeenth century Italian peasants The Bishop's Burden helps us understand not only the changes experienced by early modern Catholics but also how even the most sophisticated plans of central authorities could be frustrated by practical realities which in turn complicates our understanding of state building and social control

Shakespeare's Foreign Worlds Carole Levin, John Watkins, 2012-06-15 In Shakespeare's Foreign Worlds Carole Levin and John Watkins focus on the relationship between the London based professional theater preeminently associated with William Shakespeare and an unprecedented European experience of geographic social and intellectual mobility Shakespeare's plays bear the marks of exile and exploration rural depopulation urban expansion and shifting mercantile and diplomatic configurations He fills his plays with characters testing the limits of personal identity foreigners usurpers outcasts outlaws scolds shrews witches mercenaries and cross dressers Through parallel discussions of Henry VI The Taming of the Shrew and The Merchant of Venice Levin and Watkins argue that Shakespeare's centrality to English national consciousness is inseparable from his creation of the foreign as a category asserting dangerous affinities between England's internal minorities and its competitors within an increasingly fraught European mercantile system As a women's historian Levin is particularly interested in Shakespeare's responses to marginalized sectors of English society As a scholar of English Italian Studies and Medieval Studies Watkins situates Shakespeare in the context of broadly European historical movements Together Levin and Watkins narrate the emergence of the foreign as portable category that might be applied both to strangers from other countries and to native born English men and women such as religious dissidents who resisted conformity to an increasingly narrow sense of English identity Shakespeare's Foreign Worlds will appeal to historians literary scholars theater specialists and anyone interested in Shakespeare and the Elizabethan Age

When Money Talks Frank Lee Holt, 2021 This book will change the way you look at money Money may seem hopelessly mundane and culturally meaningless but it has dominated and documented world history since the time of the ancient Greeks This heavily illustrated book provides a spirited account of the first coinages and their living descendants in our pockets and purses It explains how people from Jesus to The Beatles have used numismatics to explore the social political economic and religious history of the world

Giordano Bruno Ingrid D. Rowland, 2016-04-26 Giordano Bruno is one of the great figures of early modern Europe and one of the least understood Ingrid D Rowland's pathbreaking life of Bruno establishes him once and for all as a peer of Erasmus Shakespeare and Galileo a thinker whose vision of the world prefigures ours By the time Bruno was burned at the stake as a heretic in 1600 on Rome's

Campo dei Fiori he had taught in Naples Rome Venice Geneva France England Germany and the magic Prague of Emperor Rudolph II His powers of memory and his provocative ideas about the infinity of the universe had attracted the attention of the pope Queen Elizabeth and the Inquisition which condemned him to death in Rome as part of a yearlong jubilee Writing with great verve and sympathy for her protagonist Rowland traces Bruno s wanderings through a sixteenth century Europe where every certainty of religion and philosophy had been called into question and shows him valiantly defending his ideas and his right to maintain them to the very end An incisive independent thinker just when natural philosophy was transformed into modern science he was also a writer of sublime talent His eloquence and his courage inspired thinkers across Europe finding expression in the work of Shakespeare and Galileo Giordano Bruno allows us to encounter a legendary European figure as if for the first time *Teaching Other Voices* Margaret L. King, Albert Rabil Jr., 2008-09-15 The books in The Other Voice in Early Modern Europe series chronicle the heretofore neglected stories of women between 1400 and 1700 with the aim of reviving scholarly interest in their thought as expressed in a full range of genres treatises orations and history lyric epic and dramatic poetry novels and novellas letters biography and autobiography philosophy and science Teaching Other Voices Women and Religion in Early Modern Europe complements these rich volumes by identifying themes useful in literature history religion women s studies and introductory humanities courses The volume s introduction essays and suggested course materials are intended as guides for teachers but will serve the needs of students and scholars as well

Doing Academic Careers Differently Sarah Robinson, Alexandra Bristow, Olivier Ratle, 2023-07-28 Should academic careers always unfold in exactly the same way Is there one best way of being an academic This book says no Assumptions about who academics are and what they should do are becoming increasingly narrow and focused on achieving so called excellence in teaching and research above anything else This book problematises this and explores the scope for doing academic careers differently Authors paint individual or group portraits of their academic careers working with metaphors which challenge the dominant discourses of how academic careers should be led From rejecting the pressure to focus on one big thing to prioritising nurture and care transcending disciplinary boundaries reshaping own daily practice connecting with communities and being academics outside academia the chapters in this book offer those considering starting or developing an academic career a treasure trove of many alternative possibilities Presented as a portrait gallery through which readers are encouraged to meander at will this compilation of insights into alternative academic lives will help to inspire and encourage current academics to re think and take ownership of their careers in their own terms according to their own strengths weaknesses and circumstances **La imagen de la mujer y su proyección en la literatura, la sociedad y la historia**

Mercedes González de Sande, 2010 Estudios de género y feministas en el ámbito de diferentes áreas de conocimiento la mujer en la literatura en la sociedad en los medios de comunicación en el arte y en la historia **Women in Science**, 2010

Today women are actively participating in science while the number of women among the world s top scientists is growing In

fact the face of modern science would be unrecognisable without the major contributions made by women Women still face a lot of obstacles in science which can be summed up using metaphors such as the glass ceiling the sticky floor and the glass cliff The role of women in research excellence is still an issue as well as their low numbers in top positions That is why policy changes are needed to tap women s talents and resources to the full For much of history women were officially excluded from the scientific realm Moreover they often encountered loving parents who tried to discourage their passions for unfeminine subjects such as geology or mathematics The lucky few had fathers mothers husbands or distant admirers who encouraged their scientific ambitions This volume shows that despite the invisibility of women in the historical narrative of mainstream science it does not mean that science was always exclusively a man s world Throughout the centuries many women managed to overcome their marginalisation and excel in their chosen field making vital additions to the sum of human knowledge This book tells the compelling stories of these heroines of European science some sung but many unsung and through their narratives it enriches and completes the history of human knowledge by highlighting the role of women Women Studies Abstracts ,2001
