## **The Lake District A Century Of Conservation:**

**The Lake District** Geoffrey Berry,1980      **A Bibliography of British History, 1914-1989** Keith Robbins,American Historical Association,Royal Historical Society (Great Britain),1996 Containing over 25 000 entries this unique volume will be absolutely indispensable for all those with an interest in Britain in the twentieth century Accessibly arranged by theme with helpful introductions to each chapter a huge range of topics is covered There is a comprehensive index      Histories of Tourism John K. Walton,2005-10-12 This collection of essays develops the historical dimension to tourism studies through thematic case studies The editor s introduction argues for the importance of a closer relationship between history and tourism studies and an international team of contributors explores the relationships between tourism representations environments and identities in settings ranging from the global to the local from the Roman Empire to the twentieth century and from Frinton to the Far East      *Conquering the Highlands* Jan Oosthoek,2013-02-01 Deforestation of Scotland began millennia ago and by the early 20th century woodland cover was down to about 6 per cent of the total land area A century later woodland cover had tripled Most of the newly established forestry plantations were created on elevated land with wet peaty soils and high wind exposure not exactly the condition in which forests naturally thrive Jan Oosthoek tells in this book the story of how 20th century foresters devised ways to successfully reforest the poor Scottish uplands land that was regarded as unplatable to fulfil the mandate they had received from the Government and wider society to create a timber reserve He raises the question whether the adopted forestry practice was the only viable means to create forests in the Scottish Highlands by examining debates within the forestry community about the appearance of the forests and their longterm ecological prospects Finally the book argues that the long held ecological convictions among foresters and pressure from environmentalists came together in the late 20th century to create more environmentally sensitive forestry      Storied Ground Paul Readman,2018-02-22 The relationship between landscape and identity is explored to reveal how Englishness encompasses the urban and rural and the north and south      **Managing Northern Europe's Forests** K. Jan Oosthoek,Richard Hölzl,2018-02-19 Northern Europe was by many accounts the birthplace of much of modern forestry practice and for hundreds of years the region s woodlands have played an outsize role in international relations economic growth and the development of national identity Across eleven chapters the contributors to this volume survey the histories of state forestry policy in Scandinavia the Low Countries Germany Poland and Great Britain from the early modern period to the present Each explores the complex interrelationships of state building resource management knowledge transfer and trade over a period characterized by ongoing modernization and evolving environmental awareness      **The Architects' Journal** ,2001      *Core-Themes of Land Use Politics* Erwin Hepperle,2011 The European Faculty of Land Use and Development is committed to an integrated multidisciplinary view on sustainable land management It regularly organizes interdisciplinary symposia This volume contains experiences and new approaches from the fields of geodesy geography and

geo information land readjustment philosophy spatial planning jurisprudence and environmental sciences The contributions deal with questions of social and ecological development in different European regions that are relevant to land tenure systems and land use policy as well as with issues related to planning processes and procedures **Geotourism** David Newsome, Ross K. Dowling, 2010-03-31 Geotourism the tourism of geology and landscape is a compilation of first class international research which provides insight into the many facets of this emerging subject and comprehensively explores the nexus between landscape geological phenomena and tourism *The History of Geoconservation* Cynthia V. Burek, Colin D. Prosser, 2008 This book is the first to describe the history of geoconservation It draws on experience from the UK Europe and further afield to explore topics including what is geoconservation where when and how did it start who was responsible and how has it differed across the world Geological and geomorphological features processes sites and specimens provide a resource of immense scientific and educational importance They also form the foundation for the varied and spectacular landscapes that help define national and local identity as well as many of the great tourism destinations Mankind s activities including contributing to enhanced climate change pose many threats to this resource the importance of safeguarding and managing it for future generations is now widely accepted as part of sustainable development Geoconservation is an established and growing activity across the world with more participants and a greater profile than ever before This volume highlights a history of challenges set backs successes and visionary individuals and provides a sound basis for taking geoconservation into the future **Place, Nature and Spirit - A Lake District Experience** Nigel Hammett, 2012-05-01 This book uses some of the poetry of William Wordsworth to examine the changed aesthetic of landscape at the heart of the Romantic Era Wordsworth was the greatest figure of the English Lake District and his work looked forward to the conservationist and environmental movement of the modern era **Britain 1740 - 1950** Richard Lawton, Colin Pooley, 2021-12-02 Originally published in 1992 this book provides students with a well illustrated clearly written text which offers a coherent overview of Britain s development from a pre modern to a modern economy and society The key processes that have shaped the geography of modern Britain are rooted in the significant demographic economic technological and social transitions of the early eighteenth century the impact of which was not fully diffused through the nation until the mid 20th Century This country wide survey examines the nature of this transformation The material in the book is accessible because the book is clearly structured into 3 phases 1740 to the 1830s the 1830s to the 1890s and the 1890s to 1950 For each period the principal aspects of change in population industry the countryside and urban life are examined and regional examples given to support the analysis *Liminality, Transgression and Space Across the World* Basak Tanulku, Simone Pekelsma, 2024-03-05 This book analyses various forms of liminality and transgression in different geographies and demonstrates how and why various physical and symbolic boundaries create liminality and transgression Its focus is on comprehending the ways in which these borders and boundaries generate liminality and transgression rather than viewing

them solely as issues It provides case studies from the past and present allowing readers to connect subjects periods and geographies It consists of theoretical and empirical chapters that demonstrate how borders and liminality are interconnected The book also benefits from the power of several visual essays by artists to complete the theoretical and empirical chapters which demonstrate different forms of liminality without need of much words The book will be of interest to researchers and students working in the fields of urban and rural studies urban sociology cities and communities urban and regional planning urban anthropology political science migration studies human geography cultural geography urban anthropology and visual arts     National Parks Great Britain. **management and interpretation** Raffaella Picello,2017-09-01     *Environmentalism* David Pepper,Frank Webster,George Revill,2003     Environment and Business Alasdair Blair,David Hitchcock,2004-08-02 This text examines how businesses and the environment interact It is ideal for students with no previous knowledge of business studies It examines in depth the ways in which business industry the physical environment environmentalism and social change have evolved alongside each other The authors use boxed case studies to highlight how business practice and the environment interact at levels from local to global with examples from multinational companies government bodies national charities and local enterprise The book also contains a large number of informative diagrams The case studies include Shell Oil s environmental policy railways and the industrial revolution the British National Trust s business enterprises Sainsbury s approach to organic foods Australia s landcare scheme changing trends in retailing Brent Spar big game hunting and conservation     *Literary Tourism and the British Isles* LuAnn McCracken Fletcher,2018-12-10 *Literary Tourism and the British Isles* History Imagination and the Politics of Place explores literary tourism s role in shaping how locations in the British Irish Isles have been seen historicized and valued Within its chapters contributors approach these topics from vantage points such as feminism cultural studies geographic and mobilities paradigms rural studies ecosystems philosophy of history dark tourism and marketing analyses They examine guidebooks and travelogues oral history pseudo history and absent history and literature that spans Renaissance drama to contemporary popular writers such as Dan Brown Diana Gabaldon and J K Rowling Places discussed in the collection include the West Wordsworth Country and Bront Country Stowe and Scotland the Globe Theatre and its environs Limehouse Rosslyn Chapel and the imaginary locations of the Harry Potter series Taken as a whole this collection illuminates some of the ways by which the British Isles have been created by literary and historical narratives and in turn will continue to be seen as places of cultural importance by visitors guidebooks and site sponsors alike     Landscape and Identity Wendy Joy Darby,2020-08-20 In England perhaps more than most places people s engagement with the landscape is deeply felt and has often been expressed through artistic media The popularity of walking and walking clubs perhaps provides the most compelling evidence of the important role landscape plays in people s lives Not only is individual identity rooted in experiencing landscape but under the multiple impacts of social fragmentation global economic restructuring and

European integration membership in recreational walking groups helps recover a sense of community Moving between the 1750s and the present this transdisciplinary book explores the powerful role of landscape in the formation of historical class relations and national identity The author s direct field experience of fell walking in the Lake District and with various locally based clubs includes investigation of the roles gender and race play She shows how the politics of access to open spaces has implications beyond the immediate geographical areas considered and ultimately involves questions of citizenship

*The English Parson-naturalist* Patrick Armstrong, 2000 These parson naturalists made a significant contribution to the development of British scientific natural history and played an important role in the foundation of the conservation movement and in the origins of organisations such as the Royal Society for the Protection of Birds and the National Trust This book presents a full range of interesting and sometimes eccentric individuals from the early days of the Christian faith in the British Isles to modern times Missionary endeavor and service to the Empire brought the influence of the English parson naturalist to the very ends of the earth A key to the appreciation of the success of the parson naturalist phenomenon is understanding the social milieu in which these men worked Until the twentieth century clergy were members of a relatively tightly knit social group often related to one another by kinship or marriage a man s clerical colleagues were also his scientific colleagues and his kinsfolk
