beautiful and rich with meaning After more than two decades of research both in the field and in archives around the world Gloria Fraser Giffords has authored the definitive book on this architecture Giffords has a remarkable eye for detail and for images both grand and diminutive Because so many of the buildings she examines have been destroyed she sleuthed through historical records in several countries and she discovered that the architecture and material culture of northern New Spain reveal the influences of five continents As she examines objects as large as churches or as small as ornamental ceramic tile she illuminates the sometimes subtle sometimes striking influences of the religious social and artistic traditions of Europe from the beginning of the Christian era through the nineteenth century of the Muslim countries ringing the Mediterranean from the seventh through the fifteenth centuries and of Northern New Spain's indigenous peoples whose art influenced the designs of occupying Europeans Sanctuaries of Earth Stone and Light is a pathbreaking book featuring 200 stunning photographs and over 300 illustrations ranging from ceremonial garments to detailed floor plans of the churches
