

Stephen Hawking

"Where do we come from? Where did the universe begin? Why is the universe the way it is? Did it stretch forever or was there a limit? And, where did it all come from? Where are we going?"

"If, like me, you have looked at the stars and tried to make sense of what you saw, you have started to wonder what makes the universe exist. The questions are clear and deceptively simple but the answers have always been beyond our reach — and now." —Stephen Hawking

Stephen Hawking was one of the most brilliant physicists ever, was born in Oxford on January 8th of the year 1942, exactly 500 years after the death of William Shakespeare's, during World War II.

As a kid he was a bit too clumsy, a bit too smart. But he had no idea how those things would shape his life: his clumsiness became a crippling disease, and his smartness a great intellect.

His career started in Trinity University in 1960 where he became really interested in thermodynamics, quantum mechanics and relativity theory. In 1962 he went to Trinity College at the University of Cambridge, where he got his Physics degree.

But during this time as a student something that would change his life forever occurred to him. Hawking constructed an extremely lateral network, an incredible argumentative and conversational device that facilitated movement and speech. He continued working despite the disease's progressively disabling effects. This disease confined him most of his adult life into a wheelchair, but he taught a really unique phenomenon that required a breakthrough, what enabled him to talk again. But even his physical limitations nothing could confine him intellectually. He simply never allowed his illness defeat his scientific development. In fact, this allowed him to focus his life more on his science.

Several years later Hawking received a present that really improved his hard life, a revolutionary computer attached to his wheelchair that started to help him to talk again.

But why is he considered one of the greatest genius ever? The answer to this question is easy, because he has managed to do more than any other scientist to increase our understanding of the universe. His theories about black holes and the origin and nature of the universe had been revolutionized.

In 1974 Hawking's research turned to the examination of the properties of black holes, he suggested the formation, following the big bang, of numerous objects containing as much as 1,000,000,000 tons of mass that occupying only the space of a person. By adding these objects into black holes, there were unique in their immense mass and gravity that requires that the laws of relativity rule them, while there was requires that the laws of quantum mechanics apply to them also. In 1974 Hawking proposed that, in accordance with the predictions of quantum theory (Quantum mechanics is the theory that describes how subatomic particles behave and how matter and radiation interact), black holes emit subatomic particles until they exhaust their energy and finally explode. His efforts in that helped to explain the properties of black holes, objects, which it was previously thought that nothing was supposed to be able to escape, but he discovered that they emit thermal radiation. In try to explain this phenomenon he proposed that when a particle pair is created near a black hole, one half of the pair might disappear into the black hole, leaving the other half to radiate away from the black hole. In a distant observer, the radiation of the captured particle would appear as thermal radiation (Hawking, Stephen Williams, Microsoft Encarta Encyclopedia (2002))

During the 1990s Hawking produced theories that connected several theories used by scientists to explain the universe. The properties of space-time, the beginning of the universe, and a unified theory of physics and all

The Language of Stephen Crane's Bowery Tales Alan Robert Slotkin, 1993 First published in 1993 Routledge is an imprint of Taylor Francis an informa company **Student Companion to Stephen Crane** Paul M. Sorrentino, 2005-11-30 Born into a family of writers Stephen Crane wrote his first poem I d Rather Have when he was eight and his first short story Uncle Jake and the Bell Handle at around the age of 13 Despite never having completed a course of study at any of the colleges he attended Crane decided in the spring of 1891 to pursue a career as a writer While working as a journalist he penned Maggie A Girl of the Streets a novella written in the Naturalist style that depicted the seaminess of urban tenement life Enduring his own poverty and taking temporary reporting jobs Crane completed his literary masterpiece The Red Badge of Courage a dramatic depiction of a soldier s inner life during the American Civil War in April 1894 The author who continued to write both journalistic pieces and short stories until his death in June 1900 is one of the most highly regarded and popularly taught American authors today Stephen Crane pursued his writing career during a time when the literary world was moving from Romanticism to Realism and Naturalism and later in his life Impressionism and Modernism Sorrentino examines each of Crane s works identifying the influence of these literary movements and world events on his novels short stories and poetry including Maggie A Girl of the Streets New York City Stories and Sketches The Red Badge of Courage War Stories Western Stories and Tales of Whilomville **The Critical History of Edgar Allan Poe's The Narrative of Arthur Gordon Pym** Ronald C. Harvey, 2015-12-22 The Critical History of Edgar Allan Poe s The Narrative of Arthur Gordon Pym A Dialogue with Unreason traces the complex scattered criticism of Poe s most anomalous work as it has steadily grown in prominence to a central position in the study of Poe and American literature The winding route the criticism of Pym has charted as convoluted as the narrative itself has been a history of disagreement at almost every level at which critics and scholars read texts including the nature and genre of the work the seriousness or levity of the author s intent and its stature as a work of genius hackwork or something in between The unique set of thematic and narrative problems the work poses has eluded every hermeneutic structure brought against it so far consistently undermining the very reading strategies it seems to invite The only comprehensive critical history and bibliography of Pym this study fills a large hole Poe scholars have long felt as it analyzes the ways in which critics and critical camps have attempted to confront rationalize contain or evade its novel and disturbing features In the process the criticism is correlated with the popular reception and the international response Because literary history has entangled no author with his work more than Poe ultimately this book is as much a study of Poe as of Pym At every point therefore this study embeds the critical response to Pym in the history of Poe studies in general as well as in the larger context of American literary theory and history Includes bibliography and index Whiteness, Otherness and the Individualism Paradox from Huck to Punk D. Traber, 2007-02-19 Traber reexamines the practice of self marginalization in Euro American literature and popular culture that depict whites

adopting varied markers of otherness to disengage from the dominant culture He draws on critical theory whiteness and cultural studies to counter an eager correlation between marginality and agency The nonconformist cultural politics of these border crossings implode since the transgressive identity the protagonists desire relies upon is built from the center's values and definitions An orthodox notion of individualism underpins each act of sovereignty as it rationalizes exploiting stereotypes of an Other constructed by the center The work closes by positing a theory of identity based on Jean Luc Nancy's concept of the emptied self In recognizing the already mixed quality of being identity is made a vacuous concept as the standards for determining self and difference become too slippery to hold

The Poetics of the Antarctic William E. Lenz, 2021-03-19

The thesis of this book is that the 19th century interest in the Antarctic functions for modern scholars as an important index to American self discovery and self definition from the 1830s onward According to the author American hopes for confirming identity came to be focused on an unlikely goal the discovery of the illusive Antarctic continent By examining in detail one literary product of the U S Exploring Expedition 1838 1842 to Antarctica James Croxall Palmer's epic poem Thulia A Tale of the Antarctic 1843 and its revision The Antarctic Mariner's Song 1868 and by locating these works within their cultural context Lenz reveals the significance and changing meaning of exploration to emerging American concepts of nationhood The volume also considers the tradition of American sea fiction in the works of such writers as James Fenimore Cooper Edgar Allan Poe and Herman Melville arguing that for these writers the Antarctic was a locus of symbolic meaning while for Palmer it was a process of individual and collective perception The 1868 version of the Palmer poem is attached here as an appendix A useful bibliography follows that appendix
