The Turkish Language Reform : A Catastrophic Success Geoffrey Lewis, 1999-11-18 This is the first full account of the transformation of Ottoman Turkish into modern Turkish It is based on the author's knowledge experience and continuing study of the language history and people of Turkey That transformation of the Turkish language is probably the most thorough going piece of linguistics engineering in history Its prelude came in 1928 when the Arabo Persian alphabet was outlawed and replaced by the Latin alphabet It began in earnest in 1930 when Ataturk declared Turkish is one of the richest of languages It needs only to be used with discrimination The Turkish nation which is well able to protect its territory and its sublime independence must also liberate its language from the yoke of foreign languages A government sponsored campaign was waged to replace words of Arabic or Persian origin by words collected from popular speech or resurrected from ancient texts or coined from native roots and suffixes The snag identified by the author as one element in the catastrophic aspect of the reform was that when these sources failed to provide the needed words the reformers simply invented them The reform was central to the young republic's aspiration to be western and secular but it did not please those who remained wedded to their mother tongue or to the Islamic past The controversy is by no means over but Ottoman Turkish is dead Professor Lewis both acquaints the general reader with the often bizarre sometimes tragicomic but never dull story of the reform and provides a lively and incisive account for students of Turkish and the relations between culture politics and language with some stimulating reading The author draws on his own wide experience of Turkey and his

personal knowledge of many of the leading actors The general reader will not be at a disadvantage because no Turkish word or quotation has been left untranslated This book is important for the light it throws on twentieth century Turkish politics and society as much as it is for the study of linguistic change It is not only scholarly and accessible it is also an extremely good read **The Ecosystem of the Foreign Language Learner** Ewa Piechurska-Kuciel, Magdalena Szyska, 2015-03-12

This volume examines selected aspects of the foreign language learning process from an ecological perspective adopting a holistic view on complex interrelations among and within organisms L2 language learners and their milieus family school and society First of all the personal ecosystem of the learner is taken into consideration whereby two powerful influences are intertwined cognitive and affective aspects The learning space formed by the individual is largely shaped by their affective states coexisting in conjunction with their cognitive processes Moreover this specific space is also modified by a wider array of other personal ecosystems or those of cultures Hence the ecosystem of the foreign language learner is also subject to influences coming from sociocultural leverage that can be represented by people they know like parents and language teachers who can both directly and indirectly manipulate their ecosystem At the same time other important forces such as culture as a ubiquitous element in the foreign language learning process also have the power to shape that ecosystem Accordingly the book is divided into three parts covering a range of topics related to these basic dimensions of foreign language acquisition the cognitive affective and socio cultural Part I Affective Interconnections focuses on the body of original empirical research into the affective domain of not only L2 language learners but also non native language teachers Part II Cognitive Interconnections reports on contributions on language learners linguistic processing and cognitive representations of concepts The closing part Socio cultural Interconnections provides new insights into language learning processes as they are affected by social and cultural factors Language Policy Evaluation and the European Charter for

Regional or Minority Languages F. Grin, 2003-08-19 This book proposes an innovative treatment of minority language policies by looking at them as policy options that can be methodically evaluated The author applies the analytical concepts and technical tools of policy analysis to guide the reader through a step by step application of notions such as effectiveness and cost effectiveness with particular reference to the European Charter for Regional or Minority Languages The thrust of this book is deeply interdisciplinary and links the evaluation exercise to sociolinguistic political and legal considerations **The**
