Although its original applications were in linguistics and anthropology structuralism has also cut across sociology history philosophy psychiatry criticism the comparative study of arts and letters classical studies and other disciplines in the humanities and social sciences The present volume is a full record of the proceedings of an international symposium Participating were many of the leading figures of the structuralist dialogue and thus the volume is a useful demonstration of the movement its aim and methods Choice *An Analysis of Jacques Derrida's Structure, Sign, and Play in the Discourse of the Human Sciences* Tim Smith-Laing, 2018-05-20 Jacques Derrida's *Structure Sign and Play* is one of the most controversial and influential philosophical texts of the 20th century Delivered at a conference on structuralism at Johns Hopkins the lecture took aim at the critical and philosophical fashions of the time and radically proposing a world in which meaning cannot be pinned down or traced to an origin but instead is continuously shifting fleeting and open to play Hailed by many as a watershed in philosophy and literary theory Derrida's lecture has shaped both disciplines At once dense brilliant and humorous it is a crucial read for anyone interested in questioning our natural assumptions about meaning in the world

Jacques Lacan (Volume I) (RLE: Lacan) Michael P. Clark, 2014-02-05 This bibliography in two volumes originally published in 1988 lists and describes works by and about Jacques Lacan published in French English and seven other languages including Japanese and Russian It incorporates and corrects where necessary all information from earlier published bibliographies of Lacan's work Also included as background works are books and essays that discuss Lacan in the course of a more general study as well as all relevant items in various bibliographic sources from many fields *The Theory of Criticism* Murray Krieger, 2019-12-01 Originally published in 1976 Representing years of critical reflection The Theory of

Criticism attempts to construct a poetics of presence Within a wide range of critical terminology Murray Krieger has sought to create a new vision In language that is passionate and often dramatic he looks at the multidimensionality of the poetic world through the lens of Western poetics His work clearly addresses itself to post New Critical questions how to preserve the literary object as a thing to be perceived valued and enjoyed and yet to account for its presence in and interaction with our culture as a whole always in danger of being dissolved into man s language making and forming activity in general Our awareness of the poem as object must be modified by our awareness that it is an intentional object Krieger develops his balanced vision in three parts Part 1 defines the problem and defends the very activity of theorizing both in its own terms and in terms of the critic s function throughout the history of Western criticism By asking at the outset whether criticism is vain or valuable Krieger already confronts the basic tension between system and world and the need to account for both By creating a heuristic system that examines the possibility of form the critic serves also the world of history and thought as a whole Part 2 pursues that history from the classical encounter with mimesis in Greek thought to the Romantic and post Romantic elevation of consciousness as a main criterion of poetic art Defining a humanistic aesthetic as it has been viewed since Aristotle the author shows how during and after the eighteenth century form was opened up under the impact of a Kantian and post Kantian view epitomized finally by Coleridge s imagination and its consequences for recent theorists Part 3 deals with the image of the world struggling against its enclosure within a poetic context It expands our view of metaphor as a reflection of the dual nature of poetic language simultaneously locked into the poem and referring to history and nature outside Our reading of the poem Krieger concludes must be double we must see the poem as a linear and chronological sequence reflecting real life and we must read it as a circular imitative mutually implicative mode

Edward Said and the Authority of Literary Criticism Nicolas Vandeviver, 2019-09-26 This book examines the earliest writings of Edward Said and the foundations of what came to be known as postcolonial criticism in order to reveal how the groundbreaking author of *Orientalism* turned literary criticism into a form of political intervention Tracing Said s shifting conceptions of literature and agency in relation to the history of American literary studies in the thirty years or so between the end of World War II and the last quarter of the twentieth century this book offers a rich and novel understanding of the critical practice of this indispensable figure and the institutional context from which it emerged By combining broad scale literary history with granular attention to the vocabulary of criticism Nicolas Vandeviver brings to light the harmonizing of methodological conflicts that informs Said s approach to literature and argues that Said s enduring political significance is grounded in his practice as a literary critic

haunted the development of social theory In this fascinating book Stephen Horgan argues that our thinking on these matters has been bedevilled by the enlightenment distinction between nature and culture He criticizes this on the grounds that terms such as nature culture human and animal are ambiguous He uses the themes of wildness and primitivism and cases of feral children to illustrate his argument

The Autobiography Effect Dennis Schep, 2019-07-24 Since the advent of post structuralism various authors have problematized the modern conception of autobiography by questioning the status of authorship and interrogating the relation between language and reality Yet even after making autobiography into a theoretical problem many of these authors ended up writing about themselves This paradox stands at the center of this wide ranging study of the form and function of autobiography in the work of authors who have distanced themselves from its modern instantiation Discussing Roland Barthes Jacques Derrida Hélène Cixous and others this book grapples with the question of what it means to write the self when the self is understood as an effect of writing Combining close reading intellectual history and literary theory The Autobiography Effect traces how precisely its theoretically problematic nature made autobiography into a central scene for the negotiation of philosophical positions and anxieties after structuralism

The Birth of Intertextuality Scarlett Baron, 2019-11-01 Why was the term intertextuality coined Why did its first theorists feel the need to replace or complement those terms of quotation allusion echo reference influence imitation parody pastiche among others which had previously seemed adequate and sufficient to the description of literary relations Why especially in view of the fact that it is still met with resistance did the new concept achieve such popularity so fast Why has it retained its currency in spite of its inherent paradoxes Since 1966 when Kristeva defined every text as a mosaic of quotations intertextuality has become an all pervasive catchword in literature and other humanities departments yet the notion as commonly used remains nebulous to the point of meaninglessness This book seeks to shed light on this thought provoking but treacherously polyvalent concept by tracing the theory's core ideas and emblematic images to paradigm shifts in the fields of science philosophy psychoanalysis and linguistics focusing on the shaping roles of Darwin Nietzsche Freud Saussure and Bakhtin In so doing it elucidates the meaning of one of the most frequently used terms in contemporary criticism thereby providing a much needed foundation for clearer discussions of literary relations across the discipline and beyond

Poetic Machinations Michael Golston, 2015-09-01 The shape lineation and prosody of postmodern poems are extravagantly inventive imbuing both form and content with meaning Through a survey of American poetry and poetics from the end of World War II to the present Michael Golston traces the proliferation of these experiments to a growing fascination with allegory in philosophy linguistics critical theory and aesthetics introducing new strategies for reading American poetry while embedding its formal innovations within the history of intellectual thought Beginning with Walter Benjamin's explicit understanding of Surrealism as an allegorical art Golston defines a distinct engagement with allegory among philosophers theorists and critics from 1950 to today Reading Fredric Jameson Angus Fletcher Roland Barthes and Craig Owens and working with the

semiotics of Charles Sanders Pierce Golston develops a theory of allegory he then applies to the poems of Louis Zukofsky and Lorine Niedecker who he argues wrote in response to the Surrealists the poems of John Ashbery and Clark Coolidge who incorporated formal aspects of filmmaking and photography into their work the groundbreaking configurations of P Inman Lyn Hejinian Myung Mi Kim and the Language poets Susan Howe's Pierce Arrow which he submits to semiotic analysis and the innovations of Craig Dworkin and the conceptualists Revitalizing what many consider to be a staid rhetorical trope Golston positions allegory as a creative catalyst behind American poetry's postwar avant garde achievements
