McKilliam,1914      *King Alfred's Daughter* Marjory A. Grieser,2010 In the eighth century the Danes sailed the North Sea and landed on the Northumbrian coast of England In less than a hundred years they ravaged everything in their path and eventually captured the city of London King Alfred the Great of Wessex fought back A key role in this fight was played by Alfred s oldest child Aethelflaed known as the Lady of the Mercians by her own people This story is a fictionalized account of the life of Lady Aethelflaed Her successful defense of the western border of English Mercia against the Scandinavian Vikings was a major factor in the success of the English campaigns She was a warrior princess a military tactician and a treaty negotiator whose efforts together with those of her husband Ethelred Overlord of Mercia and her brother Edward eventually drove back the Viking invaders and united England under one crown Years ago I came across the name of Aethelflaed in my readings in early English history and was intrigued that this heroic woman who played such an important military role in the making of the English nation should have received so little mention In the early 1970s I started reading every record of Anglo Saxon history I could find Clearly I needed to go to England to find out more about this woman s life One trip turned into three and when I came back to the States after these trips I started writing about her life as I imagined it might have been Because little is known about the lives of Aethelflaed and her contemporaries this account of her life should be read primarily as a story told against the backdrop of ninth and tenth century Anglo Saxon England I trusted that recorded events might serve as a guide to the characters of these people      **Year Book of the Viking Society for Northern Research** Viking Society for Northern Research,1924      *Sketches of Christian Life in England in the Olden Time* Christian Life,Elizabeth Charles,1864      The Popular History of England Charles Knight,1874      **Anglo-Saxon Towers of Lordship** Michael G. Shapland,2019-01-10 It has long been assumed that England lay outside the Western European tradition of castle building until after the Norman Conquest of 1066 It is now becoming apparent that Anglo Saxon lords had been constructing free standing towers at their residences all across England over the course of the tenth and eleventh centuries Initially these towers were exclusively of timber and quite modest in their scale although only a handful are known from archaeological excavation There followed the so called tower nave churches towers with only a tiny chapel located inside which appear to have had a dual function as buildings of elite worship and symbols of secular power and authority For the first time this book gathers together the evidence for these remarkable buildings many of which still stand incorporated into the fabric of Norman and later parish churches and castles It traces their origin in monasteries where kings and bishops drew upon Continental European practice to construct centrally planned tower like chapels for private worship and burial and to mark gates and important entrances particularly within the context of the tenth century Monastic Reform Adopted by the secular

aristocracy to adorn their own manorial sites it argues that many of the known examples would have provided strategic advantage as watchtowers over roads rivers and beacon systems and have acted as focal points for the mustering of troops The tower nave form persisted into early Norman England where it may have influenced a variety of high status building types such as episcopal chapels and monastic belltowers and even the keeps and gatehouses of the earliest stone castles The aim of this book is to finally establish the tower nave as an important Anglo Saxon building type and to explore the social architectural and landscape contexts in which they operated
