The Knowing Animal A Philosophical Inquiry Into Knowledge And Truth:

The Knowing Animal Raymond Tallis, 2005 Completes a trilogy that aims to revolutionise our understanding of what it is to be a human being without recourse to theology and supernatural explanations on the one hand or scientism and naturalistic explanations on the other

The Mystery and Agency of God Frank G. Kirkpatrick, 2014 There are two philosophical commitments requisite to Christian belief that God is the ultimate mystery and that God is present and active in the world Attempting to avoid the trappings of a radical distantiation and the immanent collapse of God and world Frank Kirkpatrick argues for a theory of agency and action that preserves the mystery of God while providing a philosophically robust account of divine action in created time and space Kirkpatrick proposes a way around the stalemates that have stymied thought on divine agency and enters into conversation with significant figures in systematic theology

The Enduring Significance of Parmenides Raymond Tallis, 2007-11-29 Parmenides of Elea is widely regarded as the most important of the Presocratic philosophers and one of the most influential thinkers of all time He is famous or notorious for asserting that change movement generation and perishing are illusions arising from our senses that past and future do not exist and that the universe is a single homogeneous static sphere This picture of the world is not only contrary to the experience of every conscious moment of our lives it is also unthinkable since thoughts themselves are events that come into being and pass away In this important new book Raymond Tallis critically examines Parmenides conclusions and argues that although his views have had a huge influence they are in fact the result of a failure to allow for possibility for what might be which neither is nor is not Without possibility there is neither truth nor falsehood Tallis explores the limits of Parmenides ideas his influence on Plato and through him Aristotle and finally why Parmenides is still relevant today

An Introduction to Personalism Juan Manuel Burgos, 2018-02-09 Much has been written about the great personalist philosophers of the 20th century including Jacques Maritain and Emmanuel Mounier Martin Buber and Emmanuel Levinas Dietrich von Hildebrand and Edith Stein Max Scheler and Karol Wojtyla later Pope John Paul II but few books cover the personalist movement as a whole An Introduction to Personalism fills that gap Juan Manuel Burgos shows the reader how personalist philosophy was born in response to the tragedies of two World Wars the Great Depression and the totalitarian regimes of the 1930s Through a revitalization of the concept of the person an array of thinkers developed a philosophy both rooted in the best of the intellectual tradition and capable of dialoguing with contemporary concerns Burgos then delves into the potent ideas of more than twenty thinkers who have contributed to the growth of personalism including Romano Guardini Gabriel Marcel Xavier Zubiri and Michael Polanyi Burgos's encyclopedic knowledge of the movement allows for a concise and well rounded perspective on each of the personalists studied An Introduction to Personalism concludes with a synthesis of personalist thought bringing together the brightest insights of each personalist philosopher into an organic whole Burgos argues that personalism is not an eclectic hodge podge but a full fledged school of philosophy and gives a dynamic and rigorous

exposition of the key features of the personalist position Our times are marked by numerous and often contradictory ideas about the human person An Introduction to Personalism presents an engaging anthropological vision capable of taking the lead in the debate about the meaning of human existence and of winning hearts and minds for the cause of the dignity of every person in the 21st century and beyond *Science and the Self* Ian James Kidd, Liz McKinnell, 2015-08-27 Mary Midgley is one of the most important moral philosophers working today Over the last thirty years her writings have informed debates concerning animals the environment and evolutionary theory The invited essays in this volume offer critical reflections upon Midgley s work and further developments of her ideas The contributors include many of the leading commentators on her work including distinguished figures from the disciplines of philosophy biology and ethology The range of topics includes the moral status of animals the concept of wickedness science and mythology Midgley s relationship to modern moral philosophy and her relationship with Iris Murdoch It also includes the first full bibliography of Midgley s writings The volume is the first major study of its kind and brings together contributions from the many disciplines which Midgley s work has influenced It provides a clear account of the themes and significance of her work and its implications for ongoing debates about our understanding of our place within the world **In Defence of Wonder and Other**

Philosophical Reflections Raymond Tallis, 2014-09-03 In these lively and provocative essays philosopher polymath and all round intellectual heavyweight Raymond Tallis debunks commonplace truths exposes woolly thinking and pulls the rug from beneath a wide range of commentator whether scientist theologian philosopher or pundit Tallis takes to task much of contemporary science and philosophy arguing that they are guilty of taking us down ever narrowing conduits of problem solving that only invite ever more complex responses and in doing so have lost sight of wonder the metaphysical intoxication that first gave birth to philosophy 2 500 years ago Tallis tackles some meaty topics memory time language truth fiction consciousness but always with his characteristic verve insight and wit These essays showcase Tallis s skill for getting to the heart of the matter and challenging us to see and wonder in different ways Wonder is the proper state of humankind and as these essays show it has no more forceful a champion than Raymond Tallis **Michelangelo's Finger: An Exploration of**

Everyday Transcendence Raymond Tallis, 2010-09-07 A renowned British public intellectual illustrates how our unique ability to point the index finger has shaped our amazing evolutionary pathway as humans In this startlingly original and persuasive book Raymond Tallis shows that it is easy to underestimate the influence of small things in determining what manner of creatures humans are He argues that the independent movement of the human index finger is one such easily overlooked factor Indeed not for nothing is the index finger called the forefinger It is the finger we most naturally deploy when we want to pry objects out of small spaces but it plays a far more significant role in an action unique to us among primates pointing Tallis argues that it is through pointing that the index finger made a significant contribution to the development of humans and to the creation of a human world separate from the rest of the natural world Observing the

ceiling of the Sistine Chapel and the hugely familiar and awkward encounter between Michelangelo's God and Man through their index fingers Tallis identifies the artist's intuitive awareness of the central role of the index finger in making us unique Just as the reaching index fingers of God and Man are here made central to the creation of our kind so Tallis believes that the seemingly simple act of pointing which is used in a wide variety of ways is central to our extraordinary evolution *History and Theory of Knowledge Production* Rajan Gurukkal, 2018-10-16 Who decides what should be recognized as knowledge What forces engender knowledge How do certain forms of it acquire precedence over the rest and why Exploring these fundamental questions this book provides an introductory outline of the vast history of knowledge systems under the broad categories of European and non European specifically Indian It not only traces ontology and epistemology in spatio temporal terms but also contextualizes methodological development by comparing Indian and European systems of knowledge and their methods of production as well as techniques ensuring reliability Knowledge cannot have a history of its own independent of social history Therefore using a vast array of sources including Greek Prakrit Chinese and Arab texts the book situates the history of knowledge production within the matrix of multiple socio economic and politico cultural systems Further the volume also analyses the process of the rise of science and new science and reviews speculative thoughts about the dynamics of the subatomic micro universe as well as the mechanics of the galactic macro universe *Aping Mankind* Raymond Tallis, 2016-04-14 Neuroscience has made astounding progress in the understanding of the brain What should we make of its claims to go beyond the brain and explain consciousness behaviour and culture Where should we draw the line In this brilliant critique Raymond Tallis dismantles Neuromania arising out of the idea that we are reducible to our brains and Darwinitis according to which since the brain is an evolved organ we are entirely explicable within an evolutionary framework With precision and acuity he argues that the belief that human beings can be understood in biological terms is a serious obstacle to clear thinking about what we are and what we might become Neuromania and Darwinitis deny human uniqueness minimise the differences between us and our nearest animal kin and offer a grotesquely simplified account of humanity We argue Tallis infinitely more interesting and complex than we appear in the mirror of biology Combative fearless and thought provoking *Aping Mankind* is an important book and one that scientists cultural commentators and policy makers cannot ignore This Routledge Classics edition includes a new preface by the Author **Epimethean Imaginings** Raymond Tallis, 2014-09-11 These essays written in the spirit of Goethe's Epimetheus who traces the quick deed to the dim realm of form combining possibilities display the depth and breadth of Tallis's fascination with our lives Whether discussing philosophical hardy perennials like time or a mundane artefact like ink Tallis challenges us to think differently about who we are and why we are The first part of the book Analysis dives into the deep end to explore some of the big questions in philosophy perception knowledge and belief time the relationship between mathematics and reality and probability and causation The middle section Tetchy Interludes takes a wry look at some aspects of contemporary art stupidity including the

author's own and Christmas The third part Celebration is more experimental in both its subject matter and treatment It celebrates the complexity of ordinary everyday consciousness by contemplating the miracle of speech artefacts that have transformed our lives and what they reveal about our cognition such as the wheel the sail and ink and snapshots of the author's own consciousness on an ordinary day of past consciousness as captured in historical memory Notwithstanding their diversity in theme and style these essays share the common aim of discovering and celebrating the submerged riches in the quick deeds of our everyday lives and perceptions Hunger Raymond Tallis, 2014-12-05 Understanding hunger is the key to understanding ourselves While they seem the most obvious things about us our hungers are also deeply mysterious arising out of and casting light on the unique character of human consciousness In humans physiological need is transformed into a multitude of needs that are remote from organic necessity Even first level biological hunger is experienced differently in humans and little in human feeding behaviour has any parallel in the animal kingdom In this book Ray Tallis takes us through the different levels of our hunger Out of our primary appetites arise a myriad of pleasures and tastes that are elaborated in second level hedonistic hungers creating new values The evolution of appetite into desire opens the way to social hungers such as the hunger for acknowledgement Awareness of death awakens a further level of hunger for something that lies beyond the pell mell of successive experiences leading towards extinction The art of living is the art of managing our hungers

Film, Art, and the Third Culture Murray Smith, 2017-03-24 In the mid 1950s C P Snow began his campaign against the two cultures the debilitating divide as he saw it between traditional literary intellectual culture and the culture of the sciences urging in its place a third culture which would draw upon and integrate the resources of disciplines spanning the natural and social sciences the arts and the humanities Murray Smith argues that with the ever increasing influence of evolutionary theory and neuroscience and the pervasive presence of digital technologies Snow's challenge is more relevant than ever Working out how the scientific and everyday images of the world hang together is no simple matter In Film Art and the Third Culture Smith explores this question in relation to the art technology and science of film in particular and to the world of the arts and aesthetic activity more generally In the first part of his book Smith explores the general strategies and principles necessary to build a third cultural or naturalized approach to film and art one that roots itself in an appreciation of scientific knowledge and method Smith then goes on to focus on the role of emotion in film and the other arts as an extended experiment in the third cultural integration of ideas on emotion spanning the arts humanities and sciences While acknowledging that not all of the questions we ask are scientific in nature Smith contends that we cannot disregard the insights wrought by taking a naturalized approach to the aesthetics of film and the other arts **Themes, Issues and Debates in Psychology** Richard Gross, 2023-06-26 Themes Issues and Debates in Psychology presents an integrated view of Psychology by identifying underlying themes such as the scientific nature of Psychology cultural and gender differences issues ethical methodological and conceptual and debates such as heredity vs environment free will vs determinism normality

vs abnormality which permeate the discipline as a whole The text adopts a critical approach to mainstream Psychology attempting to identify and challenge some of the underlying assumptions that are traditionally made about human nature and how it can be investigated in ways based on the scientific study of the natural world What makes Psychology unique is the view of Psychologists as part of their own subject matter trying to study other people cannot be done by copying the methods of the physicist or chemist Psychology draws on and brings together a number of different theories and methodologies from a wide range of other disciplines including philosophy biology anthropology and sociology Themes Issues and Debates in Psychology also includes chapters on Parapsychology Positive Psychology and Religion and Spirituality which are rarely found together in a single text Not only are these not mainstream but they highlight some of the themes issues and debates discussed in earlier chapters The topics in this fifth edition of this book are inflected by a new concern with decolonizing the curriculum and discussions of cultural and gender based issues are integrated into all aspects of the text to offer a new and critical perspective on issues such as political and scientific colonialism Additionally the text features Question Time breaks that relate to methodological theoretical and other issues these are all aimed at helping the reader assimilate the material Some of the issues raised could form the basis of seminar papers discussions Themes Issues and Debates in Psychology is ideal reading for all students and is relevant to undergraduate courses in psychology

Reflections of a Metaphysical Flaneur Raymond Tallis, 2014-09-11 These essays from one of our most stimulating thinkers showcase Tallis's infectious fascination indeed intoxication with the infinite complexity of human lives and the human condition In the title essay we join Tallis on a stroll around his local park and the intricate passages of his own consciousness as he uses the motif of the walk the amble to occasion a series of meditations on the freedoms that only human beings possess In subsequent essays the flaneur thinks about his brain his relationship to the rest of the animal kingdom his profession of medicine and about the physical world and the claims of physical science to have rendered philosophical reflection obsolete Taken together the essays continue Tallis's mission to elaborate a vision of humanity that rejects religious myths while not succumbing to scientism or any other form of naturalism Written with the author's customary intellectual energy and vigour these essays provoke move and challenge us to think differently about who we are and our place in the material world

Reconciling Ancient and Modern Philosophies of History Aaron Turner, 2020-10-26 The distinction between ancient and modern modes of historical thought is characterized by the growing complexity of the discipline of history in modernity Consequently the epistemological and methodological standard of ancient historiography is typically held as inferior against the modern ideal This book serves to address this apparent deficit Its scope is three fold Firstly it aims at encountering ancient modes of historical and historiographical thought within the province of their own horizon Secondly this book considers the possibility of a dialogue between ancient and modern philosophies of history concerning the influence of ancient historical thought on the development of modern philosophy of history and the utility of modern philosophy of history in the interpretation of ancient historiography Thirdly this book explores the continuities and discontinuities in historical method and thought from antiquity to modernity Ultimately this volume demonstrates the necessity of re evaluating our assumptions about the relation of ancient and modern historical thought and lays the groundwork for a more fruitful dialogue in the future
