The Kookaburras Song Exploring Animal Behavior In Australia:

The Kookaburras' Song John Alcock, 1988 The Social Behavior of Older Animals Anne Innis Dagg, 2009-02-02 A groundbreaking study on the lives of senior mammals and birds from the aging of alphas to the role of grandmothers by the author of *Animal Friendships* How do young and old social animals view each other Are aged animals perceived by others as weaker Or wiser What is the relationship between age and power among social animals Taking a cue from Frans de Waal's seminal work examining the lives of chimpanzees Anne Innis Dagg in this pioneering study probes the lives of older mammals and birds Synthesizing the available scientific research and anecdotal evidence she explores how aging affects the lives and behavior of animals ranging from elk to elephants and gulls to gorillas examining such topics as longevity how others in a group view senior members in regard to leadership wisdom and teaching mating success interactions with mates and offspring how aging affects dominance changes in aggressive behavior and adaptability and death and dying At once instructive and compelling this theme spanning book reveals the complex nature of maturity in scores of social species and shows that animal behavior often displays the same diversity we find in ourselves Dagg's book should be a corrective to us all species that lose or ignore the contributions of their older members do so at their peril *Literary Review of Canada* Humans and chimps it turns out value age in sexual partners very differently In our species youth is prized but among chimps the reverse is the case *The New York Review of Books* Principles of Human Locomotion Thomas Rowland, 2020-09-10 This book addresses how the general principles of biology influence the human capacity for locomotion and conversely how understanding the nature of muscular activity might provide insights into the basic nature of living beings Through a series of essays the book relates the evolutionary basis of animal locomotion to recognizing the determinants of exercise capacity While raising more questions than providing answers the discussions will assume that without knowing the correct questions to ask the answers will not be forthcoming At the root of this book lies the central query what is it that separates the principles governing the function of living beings from those that dictate the inanimate world The discussions here address this issue from the expectation that clues to the answer can be obtained through understanding adaptations to the stresses imposed by physical exercise As such the book provides thought provoking analyses of the biological basis of locomotion that will stimulate future efforts to understand these phenomena Flights of Imagination Richard James Cannings, 2010 Bird watching is one of the most popular recreational activities in North America North American birders are estimated to spend as much as 32 billion annually Many of the world's greatest natural history writers have penned eloquent informative and profound essays about these alluring creatures This timeless evocation of our passion for birds features 20 works from such esteemed writers as Barry Lopez Terry Tempest Williams Jonathan Weiner Barbara Kingsolver Richard Mabey and Candace Savage Included in this diverse selection are excerpts from popular books as well as articles from science and natural history magazines about birds from all over the planet and the birders pishers twitchers and listers who love them Illuminating

entertaining literary and intimate the varied writing reveals the numerous and often unexpected ways in which birds spiritual messengers mythic symbols personal obsessions even harbingers of environmental catastrophe connect us to the natural world

Headless Males Make Great Lovers Marty Crump, 2024-05-31 The natural world is filled with diverse not to mention quirky and odd animal behaviors Consider the male praying mantis that continues to mate after being beheaded the spiders insects and birds that offer gifts of food in return for sex the male hip pocket frog that carries his own tadpoles the baby spiders that dine on their mother the beetle that craves excrement or the starfish that sheds an arm or two to escape a predator's grasp *Headless Males Make Great Lovers and Other Unusual Natural Histories* celebrates the extraordinary world of animals with essays on curious creatures and their amazing behaviors In five thematic chapters Marty Crump a tropical field biologist well known for her work with the reproductive behavior of amphibians examines the bizarre conduct of animals as they mate parent feed defend themselves and communicate Crump's enthusiasm for the unusual behaviors she describes from sex change and free love in sponges to aphrodisiac concoctions in bats is visible on every page thanks to her skilled storytelling which makes even sea slugs dung beetles ticks and tapeworms fascinating and appealing Steeped in biology *Headless Males Make Great Lovers* points out that diverse and unrelated animals often share seemingly bizarre behaviors evidence Crump argues that these natural histories though outwardly weird are successful ways of living Illustrated throughout and filled with vignettes of personal and scientific interest *Headless Males Make Great Lovers* will enchant the general reader with its tales of blood squirting horned lizards and intestine ejecting sea cucumbers all in the service of a greater appreciation of the diversity of the natural histories of animals

Horizon Barry Lopez, 2019-03-19 ONE OF THE BEST BOOKS OF THE YEAR THE NEW YORK TIMES NPR THE GUARDIAN From pole to pole and across decades of lived experience National Book Award winning author Barry Lopez delivers his most far ranging yet personal work to date *Horizon* moves indelibly immersively through the author's travels to six regions of the world from Western Oregon to the High Arctic from the Galapagos to the Kenyan desert from Botany Bay in Australia to finally unforgettably the ice shelves of Antarctica Along the way Lopez probes the long history of humanity's thirst for exploration including the prehistoric peoples who trekked across Skraeling Island in northern Canada the colonialists who plundered Central Africa an enlightenment era Englishman who sailed the Pacific a Native American emissary who found his way into isolationist Japan and today's ecotourists in the tropics And always throughout his journeys to some of the hottest coldest and most desolate places on the globe Lopez searches for meaning and purpose in a broken world

Solitary Wasps Kevin M. O'Neill, 2001 *Solitary Wasps Behavior and Natural History* is the first general survey of the subject in more than 25 years and is the best place to turn for information about the biology and compelling behavior of these common insects Topics covered in *Solitary Wasps Behavior and Natural History* include classification of the solitary wasps and their relation to other Hymenoptera foraging and nesting behaviors mating and parental strategies thermoregulation natural enemies defensive strategies and directions for future

research Jacket Outback Rambling Richard Symanski,1990 Australia s Northern Territory is twice the size of Texas with a population less than one tenth that of Houston How could so vast a place be a setting for environmental abuse American anthropologist Richard Symanski shows how the Outback s ecology has been drastically altered as Europeans Aborigines wild species and introduced species make their impact on the land and on each other Animal Kingdom ,1988
