The Early Modern Travels of Manchu Mårten Söderblom Saarela, 2020-06-19 A linguistic and historical study of the Manchu script in the early modern world Manchu was a language first written down as part of the Qing state building project in Northeast Asia in the early seventeenth century After the Qing invasion of China in 1644 and for the next two and a half centuries

Manchu was the language of state in one of the early modern world's great powers. Its prominence and novelty attracted the interest of not only Chinese literati but also foreign scholars. Yet scholars in Europe and Japan and occasionally even within China itself were compelled to study the language without access to a native speaker. Jesuit missionaries in Beijing sent Chinese books on Manchu to Europe where scholars struggled to represent it in an alphabet compatible with Western pedagogy and printing technology. In southern China meanwhile an isolated phonologist with access to Jesuit books relied on expositions of the Roman alphabet to make sense of the Manchu script. When Chinese textbooks and dictionaries of Manchu eventually reached Japan scholars there used their knowledge of Dutch to understand Manchu. In *The Early Modern Travels of Manchu* Mårten Söderblom Saarela focuses on outsiders both within and beyond the Qing empire who had little interaction with Manchu speakers but took an interest in the strange new language of a rising world power. He shows how through observation inference and reference to received ideas on language and writing intellectuals in southern China Russia France Chosŏn Korea and Tokugawa Japan deciphered the Manchu script and explores the uses to which it was put for recording sounds and arranging words.

early modern China in the context of northeast Asian geopolitics and global maritime trade **Handbook on the Korean Language and Literacy: Insights into Hangul and Text Processing** Hye K. Pae, Heather Winskel, Say Young Kim, 2025-08-26 This handbook offers comprehensive insights into the language writing nexus of the Korean alphabet Hangul. Recognized by international linguists and historians as the most scientifically designed and efficient script, Hangul's uniqueness lies in its effective integration of the alphabetic principle into syllabic blocks. The volume challenges the dominant Eurocentric research trend by extending the body of knowledge to include Korean. The Korean alphabet is uniquely different from the Chinese and Japanese writing systems and the Latin alphabet. The state of the art reflections on the Korean language, its alphabet and its processing are organized into five parts including 1 spoken language and written language 2 processing at the lexical level 3 processing at the sentential level 4 acquisition of Korean as L1 and L2 and 5 future directions in theory methodology pedagogy and more. The volume is written by leading Korean and non Korean specialists in relevant fields across the world. It discusses Hangul specific theories script specific empirical evidence and syllable based pedagogical practices. With the current Korean cultural wave a.k.a. Hallyu e.g. K pop K dramas K movies etc spreading across the world, this Handbook is timely and serves as a signpost to future research and practice. This collection of chapters serves as an authoritative vade mecum offering scientifically grounded discussions on the complex mechanisms involved in reading and text processing while remaining accessible to students researchers practitioners and policymakers Languages, Scripts, and Chinese Texts in East Asia Peter Francis Kornicki, 2018 Chinese Writing and the Rise of the Vernacular in East Asia is a wide ranging study of vernacularization in East Asia not only China Japan Korea and Vietnam but also societies that no longer exist such as the Tangut and Khitan empires. Peter Kornicki takes the reader from the early centuries of the common era when the Chinese script was the only form of writing and Chinese Buddhist Confucian and medical texts spread throughout East Asia through the centuries when vernacular scripts evolved right up to the end of the nineteenth century when nationalism created new roles for vernacular languages and vernacular scripts. Through an examination of oral approaches to Chinese texts it shows how highly valued Chinese texts came to be read through the prism of the vernaculars and ultimately to be translated. This long process has some parallels with vernacularization in Europe but a crucial difference is that literary Chinese was unlike Latin not a spoken language. As a consequence people who spoke different East Asian vernaculars had no means of communicating in speech but they could communicate silently by means of written conversation in literary Chinese. A further consequence is that within each society Chinese texts assumed vernacular garb in classes and lectures. Chinese texts were read and declaimed in the vernaculars. What happened in the nineteenth century and why are there still so many different scripts in East Asia? How and why were Chinese texts dethroned and what replaced them? These are some of the questions addressed in Chinese Writing and the Rise of the Vernacular in East Asia **SamulNori** Nathan Hesselink, 2012-02-24 In 1978 four musicians crowded into a cramped basement theater in downtown Seoul where they for

the first time brought the rural percussive art of p ungmul to a burgeoning urban audience In doing so they began a decades long reinvention of tradition one that would eventually create an entirely new genre of music and a national symbol for Korean culture Nathan Hesselink s SamulNori traces this reinvention through the rise of the Korean supergroup of the same name analyzing the strategies the group employed to transform a museum worthy musical form into something that was both contemporary and historically authentic unveiling an intersection of traditional and modern cultures and the inevitable challenges such a mix entails Providing everything from musical notation to a history of urban culture in South Korea to an analysis of SamulNori s teaching materials and collaborations with Euro American jazz quartet Red Sun Hesselink offers a deeply researched study that highlights the need for traditions if they are to survive to embrace both preservation and innovation

Sequential Voicing in Japanese Timothy J. Vance, Mark Irwin, 2016-06-14 The papers in this tightly focused collection all report recent research on aspects of rendaku sequential voicing the well known morphophonemic phenomenon in Japanese that affects initial consonants of non initial elements in complex words mostly compounds The papers include broad surveys of theoretical analyses and of psycholinguistic studies meticulous assessments some relying on a new database of many of the factors that putatively inhibit or promote rendaku an investigation of how learners of Japanese as foreign language deal with rendaku in depth examinations of rendaku in a divergent dialect of Japanese and in a Ryukyuan language and a cross linguistic exploration of rendaku like compound markers in unrelated languages Since rendaku is ubiquitous but recalcitrantly irregular it provides a challenge for any general theory of morphophonology This collection should serve both to restrain oversimplified accounts of rendaku and to inspire to further research

Boundless Winds of Empire Sixiang Wang, 2023-07-11 Winner 2025 James B Palais Prize Association for Asian Studies Winner 2024 UC Berkeley Hong Yung Lee Book Award Center for Korean Studies at UC Berkeley For more than two hundred years after its establishment in 1392 the Chosŏn dynasty of Korea enjoyed generally peaceful and stable relations with neighboring Ming China which dwarfed it in size population and power This remarkably long period of sustained peace was not an inevitable consequence of Chinese cultural and political ascendancy In this book Sixiang Wang demonstrates how Chosŏn political actors strategically deployed cultural practices values and narratives to carve out a place for Korea within the Ming imperial order Boundless Winds of Empire is a cultural history of diplomacy that traces Chosŏn's rhetorical and ritual engagement with China Chosŏn drew on classical Chinese paradigms of statecraft political legitimacy and cultural achievement It also paid regular tribute to the Ming court where its envoys composed paeans to Ming imperial glory Wang argues these acts were not straightforward affirmations of Ming domination instead they concealed a subtle and sophisticated strategy of diplomatic and cultural negotiation He shows how Korea's rulers and diplomats inserted Chosŏn into the Ming Empire's legitimating strategies and established Korea as a stakeholder in a shared imperial tradition Boundless Winds of Empire recasts a critical period of Sino Korean relations through the Korean perspective emphasizing Korean agency in the making of East Asian international relations
