The Language of First-Order Logic, Including the Macintosh Program Tarski's World 4.0 Jon Barwise, John Etchemendy, 1993-08-01 The Language of First Order Logic is a complete introduction to first order symbolic logic consisting of a computer program and a text The program an aid to learning and using symbolic notation allows one to construct symbolic sentences and possible worlds and verify that a sentence is well formed The truth or falsity of a sentence can be determined by playing a deductive game with the computer The Prague Bulletin of Mathematical Linguistics ,1992
