pressing issues in contemporary European societies is the need to promote integration and social inclusion in the context of rapidly increasing migration. A particular challenge confronting national governments is how to accommodate speakers of an ever increasing number of languages within what in most cases are still perceived as monolingual indigenous populations. This has given rise to public debates in many countries on controversial policies imposing a requirement of competence in a national language and culture as a condition for acquiring citizenship. However these debates are frequently conducted almost entirely at a national level within each state with little if any attention paid to the broader European context. At the same time further EU enlargement and the ongoing rise in the rate of migration into and across Europe suggest that the salience of these issues is likely to continue to grow. This volume offers a critical analysis of these debates and emerging discourses on integration and challenges the assumptions underlying the new language testing regimes. **Resources in**

Education, 2000-10 The Intersection of Library Learning and Second-Language Learning Karen Bordonaro, 2013-12-01

Language learning and library learning in a university setting are closely related endeavors that intersect at various times and locations and with various teachers and learners. This book is an examination of how these intersections are experienced by language learners. Its aim is to explore the two types of learning to help sustain and develop the learning in both areas. The Intersection of Library Learning and Second Language Learning: Theory and Practice is aimed at practitioners both librarians and language instructors and describes everyday scenarios which will resonate with academic librarians and language instructors. It presents practical experiences and accompanies them with a consideration of the literature of both librarianship and language education. It reviews and evaluates professional practices employed by working librarians and language instructors in their dealings with international students. Considerations of the intersections between language learning and library learning are placed within a theoretical framework of learner autonomy. This framework offers librarians and language instructors methods and practices that enable students to take control of their learning in the areas of both language learning and library learning. A concluding chapter offers ways to connect the framework of learner autonomy to settings outside that of a university context. *Using Apps for Learning Across the Curriculum* Richard Beach, David

O'Brien, 2014-10-17 How can apps be used to foster learning with literacy across the curriculum? This book offers both a theoretical framework for considering app affordances and practical ways to use apps to build students' disciplinary literacies and to foster a wide range of literacy practices. *Using Apps for Learning Across the Curriculum* presents a wide range of different apps and also assesses their value, features, methods for and apps related to planning instruction and assessing student learning. It identifies favorite apps whose affordances are most likely to foster certain disciplinary literacies, includes resources and apps for professional development, provides examples of student learning in the classroom. A website www.usingipads.pbworks.com with resources for teaching and further reading for each chapter, a link to a blog for continuing conversations about topics in the book, appsforlearningliteracies.com and more enhance the usefulness of the book.
