The Last Great Subsistence Crisis in the Western World John D. Post, 1977      **Eruptions that Shook the World** Clive Oppenheimer, 2011-05-26 What does it take for a volcanic eruption to really shake the world Did volcanic eruptions extinguish the dinosaurs or help humans to evolve only to decimate their populations with a super eruption 73 000 years ago Did they contribute to the ebb and flow of ancient empires the French Revolution and the rise of fascism in Europe in the 19th century These are some of the claims made for volcanic cataclysm Volcanologist Clive Oppenheimer explores rich geological historical archaeological and palaeoenvironmental records such as ice cores and tree rings to tell the stories behind some of the greatest volcanic events of the past quarter of a billion years He shows how a forensic approach to volcanology reveals the richness and complexity behind cause and effect and argues that important lessons for future catastrophe risk management can be drawn from understanding events that took place even at the dawn of human origins

**A World Without Summer** Nicholas Day, 2025-09-09 The true story of how a massive catastrophic eruption plunged the world into darkness altering the global climate and inspiring the likes of Mary Shelley s Frankenstein from the award winning author of The Mona Lisa Vanishes and featuring black and white illustrations throughout A tour de force for our times At once a heart stopping tale of climate change and a profoundly hopeful call to action Katherine Applegate Newbery Medal winner for The One and Only Ivan The world was upside down The wind was fire The sky was ash The rain was rock A couple of hundred years ago on a quiet Indonesian island a volcano called Tambora erupted with a force and violence that changed history It tore apart the island and in the months and years that followed its fallout tore apart the world The sun refused to shine the rain refused to stop Everything that everyone assumed would always be there a world that made sense a climate that made sense was suddenly gone From this riot of thunder and lightning a young woman named Mary Shelley conceived of a scientist and his cursed creature From the nightmare of Tambora she wrote a nightmare of a book Frankenstein a terrifying reminder of how much damage we humans might do without even realizing it This is the story of a volcano that changed the world and a creature that changed us Once upon a time everything was different And no one knew if it would ever be the same In this masterful work Nicholas Day author of the Sibert Award winning The Mona Lisa Vanishes brings us a story taken from the archives but seemingly scripted for us today a tale of climate change and human folly and hope and what happens when the world suddenly goes wrong      **The Cambridge History of Ireland: Volume 3,**

**1730-1880** James Kelly, 2018-02-28 The eighteenth and nineteenth centuries was an era of continuity as well as change Though properly portrayed as the era of Protestant Ascendancy it embraces two phases the eighteenth century when that ascendancy was at its peak and the nineteenth century when the Protestant elite sustained a determined rear guard defence in the face of the emergence of modern Catholic nationalism Employing a chronology that is not bound by traditional

datelines this volume moves beyond the familiar political narrative to engage with the economy society population emigration religion language state formation culture art and architecture and the Irish abroad It provides new and original interpretations of a critical phase in the emergence of a modern Ireland that while focused firmly on the island and its traditions moves beyond the nationalist narrative of the twentieth century to provide a history of late early modern Ireland for the twenty first century

**Climate and History** T. M. L. Wigley, M. J. Ingram, G. Farmer, 1985-10-17 This highly successful book is a collection of twenty papers specially written by research workers in the many relevant disciplines First published in 1985 it was the first major survey of both the methodology of climatic reconstruction and the problem of climate history interactions and embodies the results of fruitful co operation between historians archaeologists and scientists It discusses the climatic information obtainable from the study of chemical isotopes glaciers pollen remains tree rings archaeological materials and documentary sources the theoretical and methodological problems involved in assessing the impact of climate and climatic change on past societies and provides a series of case studies arguing for or against the importance of climatic factors in human affairs in specific economic social and cultural contexts

**The European Miracle** E. L. Jones, 1987-08-31 Why did modern states and economies develop first in the peripheral and late coming culture of Europe This historical puzzle looms behind every study of industrialization and economic development In his analytical and comparative work Eric Jones sees the economic condition forming where natural environments and political systems meet Europe s economic rise is explained as a favoured interaction between them contrasting with the frustrating pattern of their interplay in the Ottoman empire India and China For the second edition Professor Jones has added a new introduction and an updated bibliographical guide

**Earth in the Balance** Al Gore, 2013-09-13 Al Gore leads the charge against climate change the world s greatest threat in an incendiary new foreword to this timeless classic that launched his environmental career If you want to know Gore you need this book

**Down to Earth** Ted Steinberg, 2002-05-09 In this ambitious and provocative text environmental historian Ted Steinberg offers a sweeping history of our nation a history that for the first time places the environment at the very center of our story Written with exceptional clarity Down to Earth re envisions the story of America from the ground up It reveals how focusing on plants animals climate and other ecological factors can radically change the way that we think about the past Examining such familiar topics as colonization the industrial revolution slavery the Civil War and the emergence of modern day consumer culture Steinberg recounts how the natural world influenced the course of human history From the colonists attempts to impose order on the land to modern efforts to sell the wilderness as a consumer good the author reminds readers that many critical episodes in our history were in fact environmental events He highlights the ways in which we have attempted to reshape and control nature from Thomas Jefferson s surveying plan which divided the national landscape into a grid to the transformation of animals crops and even water into commodities The text is ideal for courses in environmental history environmental studies urban studies economic history and American history

Passionately argued and thought provoking *Down to Earth* retells our nation's history with nature in the foreground a perspective that will challenge our view of everything from Jamestown to Disney World      **Land Degradation and Society** Piers Blaikie, Harold Brookfield, 2015-07-30 Why does land management so often fail to prevent soil erosion deforestation salination and flooding How serious are these problems and for whom This book first published in 1987 sets out to answer these questions which are still some of the most crucial issues in development today using an approach called regional political ecology This approach acknowledges that the reason why land management can fail are extremely varied and must include a thorough understanding of the changing natural resource base itself the human response to this and broader changes in society of which land managers are a part *Land Degradation and Society* is essential reading for all students of geography agriculture social sciences development studies and related subjects      **What Hath God Wrought** Daniel Walker Howe, 2007-10-29 A panoramic history of the United States ranges from the 1815 Battle of New Orleans to the end of the Mexican American War interweaving political and military events with social economic and cultural history      *Irish Global Migration and Memory* Marguerite Corporaal, Jason King, 2018-03-08 Irish Global Migration and Memory Transnational Perspectives of Ireland's Famine Exodus brings together leading scholars in the field who examine the experiences and recollections of Irish emigrants who fled from their famine stricken homeland in the mid nineteenth century The book breaks new ground in its comparative transnational approach and singular focus on the dynamics of cultural remembrance of one migrant group the Famine Irish and their descendants in multiple Atlantic and Pacific settings Its authors comparatively examine the collective experiences of the Famine Irish in terms of their community and institution building cultural ethnic and racial encounters with members of other groups and especially their patterns of mass migration integration and remembrance of their traumatic upheaval by their descendants and host societies The disruptive impact of their mass arrival had reverberations around the Atlantic world As an early refugee movement migrant community and ethnic minority Irish Famine emigrants experienced and were recollected to have faced many of the challenges that confronted later immigrant groups in their destinations of settlement This book is especially topical and will be of interest not only to Irish migration and refugee scholars but also the general public and all who seek to gain insight into one of Europe's foundational moments of forced migration that prefigures its current refugee crisis This book was originally published as a special issue of *Atlantic Studies* *Global Currents*      *Eating People Is Wrong, and Other Essays on Famine, Its Past, and Its Future* Cormac Ó Gráda, 2020-10-13 New perspectives on the history of famine and the possibility of a famine free world Famines are becoming smaller and rarer but optimism about the possibility of a famine free future must be tempered by the threat of global warming That is just one of the arguments that Cormac Ó Gráda one of the world's leading authorities on the history and economics of famine develops in this wide ranging book which provides crucial new perspectives on key questions raised by famines around the globe between the seventeenth and twenty first centuries The book begins with a

taboo topic Gr da argues that cannibalism while by no means a universal feature of famines and never responsible for more than a tiny proportion of famine deaths has probably been more common during very severe famines than previously thought The book goes on to offer new interpretations of two of the twentieth century s most notorious and controversial famines the Great Bengal Famine and the Chinese Great Leap Forward Famine Gr da questions the standard view of the Bengal Famine as a perfect example of market failure arguing instead that the primary cause was the unwillingness of colonial rulers to divert food from their war effort The book also addresses the role played by traders and speculators during famines more generally invoking evidence from famines in France Ireland Finland Malawi Niger and Somalia since the 1600s and overturning Adam Smith s claim that government attempts to solve food shortages always cause famines Thought provoking and important this is essential reading for historians economists demographers and anyone else who is interested in the history and possible future of famine

**The European Miracle** Eric Lionel Jones,2003-08-04 Why modern states and economies developed in Europe first and later in India and China **Tigers, Rice, Silk, and Silt** Robert Marks,1998-02-28 Challenging the conventional wisdom conveyed by Western environmental historians about China this book examines the correlations between economic and environmental changes in the southern Chinese provinces of Guangdong and Guangxi from 1400 to 1850 but also provides substantial background from 2CE on Robert Marks discusses the impact of population growth on land use patterns the agro ecology of the region and deforestation the commercialization of agriculture and its implications for ecological change the impact of climatic change on agriculture and the ways in which the human population responded to environmental challenges This book is a significant contribution to both Chinese and environmental history It is groundbreaking in its methods and in its findings

*War and Society in Revolutionary Europe, 1770-1870* Geoffrey Best,1998 Armed force was used to make and prevent revolution in modern Europe and as it spread it came to determine the affairs and fates of all the European nations Beginning with the eve of the French Revolution Geoffrey Best explains in lively detail the vast armed forces and militarized societies of the Napoleonic age He then proceeds to analyse the contest between Europe s continuing revolutionary underground and the armies of reactionary and alien governments that culminated with the revolutions and wars of national liberation of 1848-66 Under the banners of Napoleon Bonaparte and other warrior heroes of the epoch a military stamp was set on the European mind the consequences of which Best critically assesses

*Mass Starvation* Alex de Waal,2017-12-08 The world almost conquered famine Until the 1980s this scourge killed ten million people every decade but by early 2000s mass starvation had all but disappeared Today famines are resurgent driven by war blockade hostility to humanitarian principles and a volatile global economy In *Mass Starvation* world renowned expert on humanitarian crisis and response Alex de Waal provides an authoritative history of modern famines their causes dimensions and why they ended He analyses starvation as a crime and breaks new ground in examining forced starvation as an instrument of genocide and war Refuting the enduring but erroneous view that attributes famine to overpopulation and

natural disaster he shows how political decision or political failing is an essential element in every famine while the spread of democracy and human rights and the ending of wars were major factors in the near ending of this devastating phenomenon Hard hitting and deeply informed Mass Starvation explains why man made famine and the political decisions that could end it for good must once again become a top priority for the international community
