Masonry Bridges, Viaducts and Aqueducts Ted Ruddock,2017-05-15 For 2 000 years the most durable spanning structures have been built of masonry and the surviving bridges of the Roman Empire have challenged master masons architects and engineers to emulate and surpass them Down the centuries bridge builders have been commissioned by monarchs bishops councils of state cities private individuals and more recently waterway and railway companies The studies collected in this volume focus chiefly on the bridges viaducts and aqueducts themselves and the actions of the designers and builders but also encompass the political economic and social contexts and outcomes of their creation Famous bridges in Britain Italy France Iran and the USA are all featured Narratives of conception design and construction predominate but there are also papers on construction techniques on the analysis of documentary sources and on the continuing search by modern engineers for satisfactory scientific description of the strength and stability of arch bridges **Geneva, Zurich, Basel** Nicolas Bouvier,Gordon A. Craig,Lionel Gossman,2014-07-14 Recognized by historians and politicians as a model for European unity Switzerland is nonetheless a difficult country to understand as a whole Whereas individual Swiss cities have strong identities in the international political cultural and economic arenas the country itself seems to be less than the sum of its parts To capture the elusive spirit of Switzerland four eminent writers explore the roots of its political unity and cultural diversity in a series of urban portraits Their observations make for both good storytelling and insightful social commentary Nicolas Bouvier offers a quick paced history of Geneva the city John Calvin had envisioned as a radiating center of godliness international in its scope and legal in its methods the home of the Red Cross and the League of Nations and since 1945 the location of numerous disarmament and diplomatic conferences Gordon Craig examines Zurich the city of the militant

religious reformer Huldrych Zwingli whose centralizing political zeal was harnessed by subsequent generations of Zurichers to lead Switzerland in its modernization Today s economically powerful Zurich is analyzed in terms of its liberal past as a refuge for political activists and artists and in terms of its current generational divisions on moral and cultural questions Finally Lionel Gossman explores the conciliatory Basel of Erasmus showing how vigorous independence resourcefulness and remembrance of its humanist traditions shaped the city s culture and economy Tying together important themes in the histories of these cities Carl Schorske focuses his introduction on how Switzerland has capitalized on their cultural differences and refined the art of political negotiation to serve a wide range of civic interests Originally published in 1994 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
