Hives of Sickness David Rosner, 1995 An 1865 report on public health in New York painted a grim picture of high brick blocks and closely packed houses literally hives of sickness propagating epidemics of cholera smallpox typhoid typhus and

yellow fever which swept through the whole city In this stimulating collection of essays nine historians of American medicine explore New York's responses to its public health crises from colonial times to the present The essays illustrate the relationship between the disease environment of New York and changes in housing population social conditions and the success of medical science linking such factors to New York's experiences with smallpox polio and AIDS The volume is essential reading for anyone interested in American public health and the social history of New York The contributors are Ronald Bayer Elizabeth Blackmar Gretchen A Condran Elizabeth Fee Daniel M Fox Evelyn M Hammonds Alan M Kraut Judith Walzer Leavitt and Naomi Rogers David Rosner is a professor of history at Baruch College and The Graduate School of the City University of New York Robert R Macdonald is the director of the Museum of the City of New York A publication of the Museum of the City of New York Choice Reviews 1995 November This is one of a series of books focusing on the impact of disease intended to enhance the understanding of both past and present regarding reactions to periodic epidemics Robert B Macdonald director of the Museum of the City of New York which supports this series states The individual and collective responses to widespread sickness are mirrors to the cultural religious economic political and social histories of cities and nations Rosner selected eight renowned and respected individuals to describe the reactions and responses to smallpox polio and AIDS epidemics in New York City since 1860 and the efforts of officials and professionals to deal with the impact of disease Essayists present disease broadly from economic social political and health perspectives Causes of epidemics include the expected and usual thousands of immigrants pouring into the city inadequate water and food supplies lack of sewage disposal unemployment leading to poverty An unexpected cause was the avarice of real estate investors inexorably driving up housing costs Highly recommended for all students of history public health health policy and sociology Upper division undergraduate through professional Copyright 1999 American Library Association *Paralysed with Fear* Gareth Williams, 2013-06-27 The story of mankind's struggle against polio is compelling exciting and full of twists and paradoxes One of the grand challenges of modern medicine it was a battleground between good and bad science Gareth Williams takes an original view of the journey to understanding and defeating polio **Handling the Sick** Tom Craig Olson, Eileen Walsh, 2004 Handling the Sick is the story of 838 women who entered St Luke's Hospital Training School for Nurses St Paul Minnesota from 1892-1937 Their story addresses a fundamental question about nursing that has yet to be answered is nursing a craft or a profession It also addresses the colliding visions of nursing factions that for more than a century have disagreed on the inherent traits and formal preparation a nurse has needed The women of St Luke's were engaged in the most practical of all occupations open to women a rare one in which their strength experience and skill were prized above all else They firmly believed that the key to success in nursing was apprenticeship training Apprenticeship not schooling was the cornerstone on which all else rested This study unites the opposing visions of those who led nursing toward professional status and those who saw it as a craft Physicality strength of will an abiding emphasis on practicality and a hierarchy based

on a deep pride in craft skills have been essential elements of nursing Nursing can look to its complex history to develop an integrated model of nursing one drawing on both academic training and the immediate realities involved in handling the sick

Gleason,2013 An innovative study of the struggle for healthy children in early twentieth century Canada **What Killed Jane Austen?** George Biro,Jim Leavesley,2011-10-21 Jane Austen the much loved author of Emma and Pride and Prejudice was just 42 when she died after a mysterious illness But what killed her And what was the link between her death and the life of John F Kennedy The intriguing nature of Jane Austen s demise is just one of a series of sometimes famous and often bizarre stories featured in What Killed Jane Austen Why was Louis XVI embarrassed on his wedding night Was Winston Churchill fit to rule Why did Mary Tudor have phantom pregnancies and a deep voice What did the autopsy reveal about Lenin s mental state These and other mind blowing medical stories are revealed in this fascinating romp through the medical notes of history **Polio** David M. Oshinsky,2005-04-12 Here David Oshinsky tells the gripping story of the polio terror and of the intense effort to find a cure from the March of Dimes to the discovery of the Salk and Sabin vaccines and beyond Drawing on newly available papers of Jonas Salk Albert Sabin and other key players Oshinsky paints a suspenseful portrait of the race for the cure weaving a dramatic tale centered on the furious rivalry between Salk and Sabin He also tells the story of Isabel Morgan perhaps the most talented of all polio researchers who might have beaten Salk to the prize if she had not retired to raise a family Oshinsky offers an insightful look at the National Foundation for Infantile Paralysis which was founded in the 1930s by FDR and Basil O Connor it revolutionized fundraising and the perception of disease in America Oshinsky also shows how the polio experience revolutionized the way in which the government licensed and tested new drugs before allowing them on the market and the way in which the legal system dealt with manufacturers liability for unsafe products Finally and perhaps most tellingly Oshinsky reveals that polio was never the raging epidemic portrayed by the media but in truth a relatively uncommon disease But in baby booming America increasingly suburban family oriented and hygiene obsessed the specter of polio like the specter of the atomic bomb soon became a cloud of terror over daily life Both a gripping scientific suspense story and a provocative social and cultural history Polio opens a fresh window onto postwar America

Selling Science Stephen E. Mawdsley, 2016-08 Today when many parents seem reluctant to have their children vaccinated even with long proven medications the Salk vaccine trial which enrolled millions of healthy children to test an unproven medical intervention seems nothing short of astonishing In Selling Science medical historian Stephen E Mawdsley recounts the untold story of the first large clinical trial to control polio using healthy children 55 000 healthy children revealing how this long forgotten incident cleared the path for Salk's later trial Mawdsley describes how in the early 1950s Dr William Hammon and the National Foundation for Infantile Paralysis launched a pioneering medical experiment on a previously untried scale Conducted on over 55 000 healthy children in Texas Utah Iowa and Nebraska this landmark study assessed the safety and effectiveness of a blood component gamma globulin to prevent paralytic polio The value of the proposed experiment was questioned by many prominent health professionals as it harbored potential health risks but as Mawdsley points out compromise and coercion moved it forward And though the trial returned dubious results it was presented to the public as a triumph and used to justify a federally sanctioned mass immunization study on thousands of families between 1953 and 1954 Indeed the concept conduct and outcome of the GG study were sold to health professionals medical researchers and the public at each stage At a time when most Americans trusted scientists their mutual encounter under the auspices of conquering disease was shaped by politics marketing and at times deception Drawing on oral history interviews medical journals newspapers meeting minutes and private institutional records Selling Science sheds light on the ethics of scientific conduct and on the power of marketing to shape public opinion about medical experimentation
