has more recently been celebrated by feminist scholars for her distinctive and original voice and her challenge to convention This is a translation of Stampa into English **Debate of the Romance of the Rose** David F. Hult, 2010-04-15 In 1401 Christine de Pizan 1365a 1430 wrote a letter to the provost of Lille criticizing the highly popular Romance of the Rose for its unwarranted misogynistic depictions of women Here Hult collects debate documents letters and excerpts from other works of Pizan including one from City of Ladies a her major defense of women *Meditations on the Incarnation, Passion, and Death of Jesus Christ* Catharina Regina von Greiffenberg, 2010-04-15 Read by Protestants and Catholics alike Catharina Regina von Greiffenberg 1633 94 was the foremost German woman poet and writer in the seventeenth century German speaking world Privileged by her social station and education she published a large body of religious writings under her own name to a reception unequalled by any other German woman during her lifetime But once the popularity of devotional writings as a genre waned Catharina's works went largely unread until scholars devoted renewed attention to them in the twentieth century For this volume Lynne Tatlock translates for the first time into English three of the thirty six meditations restoring Catharina to her rightful place in print These meditations foreground women in the life of Jesus Christ including accounts of women at the Incarnation and the Tomb and in Scripture in general Tatlock's selections give the modern reader a sense of the structure and nature of Catharina's devotional writings highlighting the alternative they offer to the male centered view of early modern literary and cultural production during her day and redefining the role of women in Christian history

**Retrying Galileo, 1633-1992** Maurice A. Finocchiaro, 2007-10-17 This is must reading for historians of science and a delight for the interested public From his access to many primary sources in the Vatican Library and from his broad knowledge of the history of the 17th century Finocchiaro acquaints readers in an interesting manner with the historical facts of Galileo's trial its aftermath and its repercussions Unlike many other works which present predetermined and at times prejudiced judgments this work provides exhaustive evidence to allow readers to develop their own informed opinion on the

subject George V Coyne Director Vatican Astronomical Observatory The tragic condemnation of Galileo by the Roman Catholic Church in 1633 has become the single most potent symbol of authoritarian opposition to new ideas Pioneering in its scope Finocchiaro's book provides a fascinating account of how the trial and its cultural significance have been freshly reconstructed by scholars and polemicists down the ages With a philosopher's eye for fine distinctions the author has written an exciting commentary on the successive appearance of new primary sources and their exploitation for apologetic and secular purposes John Hedley Brooke author of *Science and Religion Some Historical Perspectives* If good history begins with good facts then Retrying Galileo should be the starting point for all future discussions of the post trial phase of the Galileo affair Maurice Finocchiaro's myth busting documentary history is not only a repository of little known sources but a pleasure to read as well Ronald L Numbers co editor of *When Christianity and Science Meet* Retrying Galileo tells the less well known half of the Galileo affair its long and complex history after 1633 Finocchiaro has performed an invaluable service in writing a book that explores how the trial and condemnation of Galileo has been received debated and reinterpreted for over three and a half centuries We are not yet done with this contentious story Paula E Findlen Ubaldo Pierotti Professor of Italian History and Director of the Science Technology and Society Program Stanford University [A Woman Who Defends All the Persons of Her Sex](#) Gabrielle Suchon, 2010-05-15 During the oppressive reign of Louis XIV Gabrielle Suchon 1632-1703 was the most forceful female voice in France advocating women's freedom and self determination access to knowledge and assertion of authority This volume collects Suchon's writing from two works *Treatise on Ethics and Politics* 1693 and *On the Celibate Life Freely Chosen or Life without Commitments* 1700 and demonstrates her to be an original philosophical and moral thinker and writer Suchon argues that both women and men have inherently similar intellectual corporeal and spiritual capacities which entitle them equally to essentially human prerogatives and she displays her breadth of knowledge as she harnesses evidence from biblical classical patristic and contemporary secular sources to bolster her claim Forgotten over the centuries these writings have been gaining increasing attention from feminist historians students of philosophy and scholars of seventeenth century French literature and culture This translation from Domna C Stanton and Rebecca M Wilkin marks the first time these works will appear in English **Great Astronomers** Robert Stawell Ball, 2024-11-24 AMONG the ranks of the great astronomers it would be difficult to find one whose life presents more interesting features and remarkable vicissitudes than does that of Galileo We may consider him as the patient investigator and brilliant discoverer We may consider him in his private relations especially to his daughter Sister Maria Celeste a woman of very remarkable character and we have also the pathetic drama at the close of Galileo's life when the philosopher drew down upon himself the thunders of the Inquisition The materials for the sketch of this astonishing man are sufficiently abundant We make special use in this place of those charming letters which his daughter wrote to him from her convent home More than a hundred of these have been preserved and it may well be doubted whether any more beautiful and touching series of letters addressed to a parent

by a dearly loved child have ever been written An admirable account of this correspondence is contained in a little book entitled *The Private Life of Galileo* published anonymously by Messrs Macmillan in 1870 and I have been much indebted to the author of that volume for many of the facts contained in this chapter Galileo was born at Pisa on 18th February 1564 He was the eldest son of Vincenzo de Bonajuti de Galilei a Florentine noble Notwithstanding his illustrious birth and descent it would seem that the home in which the great philosopher's childhood was spent was an impoverished one It was obvious at least that the young Galileo would have to be provided with some profession by which he might earn a livelihood From his father he derived both by inheritance and by precept a keen taste for music and it appears that he became an excellent performer on the lute He was also endowed with considerable artistic power which he cultivated diligently Indeed it would seem that for some time the future astronomer entertained the idea of devoting himself to painting as a profession His father however decided that he should study medicine Accordingly we find that when Galileo was seventeen years of age and had added a knowledge of Greek and Latin to his acquaintance with the fine arts he was duly entered at the University of Pisa AMONG the ranks of the great astronomers it would be difficult to find one whose life presents more interesting features and remarkable vicissitudes than does that of Galileo We may consider him as the patient investigator and brilliant discoverer We may consider him in his private relations especially to his daughter Sister Maria Celeste a woman of very remarkable character and we have also the pathetic drama at the close of Galileo's life when the philosopher drew down upon himself the thunders of the Inquisition The materials for the sketch of this astonishing man are sufficiently abundant We make special use in this place of those charming letters which his daughter wrote to him from her convent home More than a hundred of these have been preserved and it may well be doubted whether any more beautiful and touching series of letters addressed to a parent by a dearly loved child have ever been written An admirable account of this correspondence is contained in a little book entitled *The Private Life of Galileo* published anonymously by Messrs Macmillan in 1870 and I have been much indebted to the author of that volume for many of the facts contained in this chapter The Atlantic Monthly, 1870

**Enrico; or, Byzantium Conquered** Lucrezia Marinella, 2009-09-15 Lucrezia Marinella 1571-1653 is by all accounts a phenomenon in early modernity a woman who wrote and published in many genres whose fame shone brightly within and outside her native Venice and whose voice is simultaneously original and reflective of her time and culture In *Enrico or Byzantium Conquered* one of the most ambitious and rewarding of her numerous narrative works Marinella demonstrates her skill as an epic poet Now available for the first time in English translation Enrico retells the story of the conquest of Byzantium in the Fourth Crusade 1202-04 Marinella intersperses historical events in her account of the invasion with numerous invented episodes drawing on the rich imaginative legacy of the chivalric romance Fast moving colorful and narrated with the zest that characterizes Marinella's other works this poem is a great example of a woman engaging critically with a quintessentially masculine form and subject matter writing in a genre in which the work of women poets was
