**Human Language Technology. Challenges for Computer Science and Linguistics** Zygmunt Vetulani, Hans Uszkoreit, Marek Kubis, 2016-07-29 This book constitutes the refereed proceedings of the 6th Language and Technology Conference Challenges for Computer Science and Linguistics LTC 2013 held in Poznań, Poland, in December 2013. The 31 revised and in many cases substantially extended papers presented in this volume were carefully reviewed and selected from 103 submissions. To make the presentation of the papers possibly transparent, we have structured them into 9 chapters. These are: Speech Processing, Morphology, Parsing, Related Issues, Computational Semantics, Digital Language Resources, Ontologies and Wordnets, Written Text and Document Processing, Information and Data Extraction, and Less Resourced Languages.

*Structuring Lexical Data and Digitising Dictionaries*, 2024-10-28 In order to guarantee open access and full searchability, research in historical lexicography and lexicology must follow the same directions as the evolution of the Internet, which has moved from hypertext-based resources to more significant services and products stored and disseminated through databases and more recently through knowledge bases. Against this background, this book addresses specific questions like: What is involved in the digitisation of linguistic data? What annotation systems can give rise to datasets compatible with knowledge bases? What standards are needed to reach full searchability? What sources and methods can be used to gather the lemmas of a historical dictionary? What determines the obsolescence of lexicographical resources?
