Iconoclasm and the Museum Stacy Boldrick, 2020-09-24 *Iconoclasm and the Museum* addresses the museum's historic tendency to be silent about destruction through an exploration of institutional attitudes to iconoclasm or image breaking and the concept's place in public display. Presenting a selection of focused case studies, Boldrick examines long-standing desires to deface, dismantle, obscure, or destroy works of art and historic artefacts, as well as motivations to protect and display broken objects. Considering the effects of iconoclastic practices on artworks and cultural artefacts and how those practices are addressed in institutions, the book examines changing attitudes to the intentional destruction of powerful artworks in the past and present. It ends with an analysis of creative destruction in contemporary art making and proposes that we are entering a new phase for museums in which they acknowledge the critical roles destruction and loss play in the lives of objects and in contemporary political life. *Iconoclasm and the Museum* will be important reading for academics and students in fields such as museum and gallery studies, archaeology, art history, arts management, curatorial studies, cultural studies, history, heritage, and religious studies. The book should also be of great interest to museum professionals, curators, and collections management specialists and artists.

Black Artists in British Art Eddie Chambers, 2014-07-29 Black artists have been making major contributions to the British art scene for decades since at least the mid twentieth century. Sometimes these artists were regarded and embraced as practitioners of note. At other times they faced challenges of visibility and in response they collaborated and made their own exhibitions and gallery spaces. In this book, Eddie Chambers tells the story of these artists from the 1950s onwards, including recent developments and successes. *Black Artists in British Art* makes a major contribution to British art history. Beginning with discussions of the pioneering generation of artists such as Ronald Moody, Aubrey Williams, and Frank Bowling, Chambers candidly discusses the problems and progression of several generations, including contemporary artists such as Steve McQueen, Chris Ofili, and Yinka Shonibare. Meticulously researched, this important book tells the fascinating story of practitioners who have frequently been overlooked in the dominant history of twentieth-century British art.

Visual Culture and Decolonisation in Britain Anandi Ramamurthy, 2019-05-23 First published in 2006, this volume provides the first in-depth analysis of the place of visual representations within the process of decolonisation during the period 1945 to 1970. The chapters trace the way in which different visual genres—art, film, advertising, photography, news reports, and ephemera—represented and contributed to the political and social struggles over Empire and decolonisation during the mid Twentieth century. The book examines both the direct visual representation of imperial retreat after 1945 as well as the reworkings of imperial and racial ideologies within the context of a transformed imperialism. While the book engages with the dominant archive of artists' exhibitions, newsreels, and films, it also explores the private images of the family album as well as examining the visual culture of anti-colonial resistance.
