Soul Among Lions The Cougar As Peaceful Adversary:

Soul among Lions Harley Shaw, 2022-02-08 Skilled predators prized by hunters and cursed by ranchers mountain lions are the wild soul of the American West Now a wildlife biologist brings you nose to nose with the elusive cougar Harley Shaw shares dramatic stories culled from his years of studying mountain lions separating fact from myth regarding their habits while raising serious questions about mankind's relationship with this commanding creature Most of us move into the country because we love wildlife writes Shaw But none of us will tolerate having our pets or children eaten When lion human encounters occur the lion or bear or wolf always ultimately loses *Soul among Lions* offers us a chance to consider the true meaning of that loss [Listening to Cougar](#) Cara Blessley Lowe, Marc Bekoff, 2018-07-09 Awe It's the overwhelming emotion 20 authors express for the cougar or mountain lion or panther or puma in this beautiful literary anthology *The Durango Herald* Foreword by Jane Goodall This spellbinding tribute to Puma concolor honors the big cat's presence on the land and in our psyches In some essays the puma appears front and center a lion leaps over Rick Bass's feet hurtles off a cliff in front of J Frank Dobie gazes at Julia Corbett when she opens her eyes after an outdoor meditation emerges from the fog close enough for poet Gary Gildner to touch Marc Bekoff opens his car door for a dog that turns out to be a lion Other works evoke lions indirectly Biologists describe aspects of cougar ecology such as its rugged habitat and how males struggle to claim territory Conservationists relate the political history of America's greatest cat Short stories and essays consider lions significance to people reflecting on accidental encounters dreams Navajo beliefs guided hunts and how vital mountain lions are to people as symbols of power and wildness Contributors include Rick Bass Marc Bekoff Janay Brun Julia B Corbett Deanna Dawn J Frank Dobie Suzanne Duarte Steve Edwards Joan Fox Gary Gildner Wendy Keefover Ring Ted Kerasote Christina Kohlruss Barry Lopez BK Loren Cara Blessley Lowe Steve Pavlik David Stoner and Linda Sweanor Puma Cougar Mountain lion Panther These words and the creatures they represent inspire awe wonder excitement terror and reverence in the writers whose contributions make up this anthology *Library Journal* *The Cougar* Paula Wild, 2013-09-06 The Cougar is a skillful blend of natural history scientific research First Nations stories and first person accounts With her in depth research Wild explores the relationship between mountain lions and humans and provides the most up to date information on cougar awareness and defense tactics for those living working or travelling in cougar country *Carnivore Minds* Gay A. E. McIvor, 1994 **People and Predators** Defenders of Wildlife, 2012-06-22 Carnivores provide innumerable ecological benefits and play a unique role in preserving and maintaining ecosystem services and function but at the same time they can create serious problems for human populations A key question for conservation biologists and wildlife managers is how to manage the world's carnivore populations to conserve this important natural resource while mitigating

harmful impacts on humans In *People and Predators* leading scientists and researchers offer case studies of human carnivore conflicts in a variety of landscapes including rural urban and political The book covers a diverse range of taxa geographic regions and conflict scenarios with each chapter dealing with a specific facet of human carnivore interactions and offering practical concrete approaches to resolving the conflict under consideration Chapters provide background on particular problems and describe how challenges have been met or what research or tools are still needed to resolve the conflicts *People and Predators* will help readers to better understand issues of carnivore conservation in the 21st century and provides practical tools for resolving many of the problems that stand between us and a future in which carnivores fulfill their historic ecological roles *Ghostwalker* Leslie Patten, **Wild Games** Dennis Ray Cutchins, Eric Alden Eliason, 2009 Humans understand at least some of what it means to be human both literally and figuratively in reference to wild animals Our relationships with wildlife have traditionally been expressed in terms of hunting more recently these relationships have also been manifest as efforts to prevent hunting Hunting and fishing traditions are in fact under fire by critics at the same time that they are receding of their own accord perhaps becoming even more endangered than any of the pursued animals These traditions form the major focus of *Wild Games* a new collection of essays that looks at the folklore and culture of various hunting and fishing practices documenting the central importance of hunting to many rural societies even in modern times Editors Dennis Cutchins and Eric Eliason contend that hunters often don't perceive of themselves as separate from the wild but rather identify strongly with a natural order integrated with rather than standing apart from the fluctuation of ecosystems And they frequently don't see wild animals as set apart but understand them as food sources competitors friendly rivals and even equals Featuring contributions from a variety of distinguished scholars and writers including an essay by the noted folklorist Simon Bronner on the culture of the deer camp a fascinating account of coyote tracking by Eric Eliason and an examination of the role of gender in outdoor life by Diane Humphrey Lueck this book shows how the traditions of hunting and fishing tend to bind hunter and prey into ancient patterns that often defy contemporary culture Book Jacket **Caught in Fading Light** Gary Thorp, 2002-01-01 Using the traditional form of Japanese writing called *nikki bungaku* the author contemplates his quest to seek a mountain lion in the mountains of northern California **Cougar** Maurice Hornocker, Sharon Negri, 2009-12-15 The cougar is one of the most beautiful enigmatic and majestic animals in the Americas Eliciting reverence for its grace and independent nature it also triggers fear when it comes into contact with people pets and livestock or competes for hunters game Mystery myth and misunderstanding surround this remarkable creature The cougar's range once extended from northern Canada to the tip of South America and from the Pacific to the Atlantic making it the most widespread animal in the western hemisphere But overhunting and loss of habitat vastly reduced cougar numbers by the early twentieth century across much of its historical range and today the cougar faces numerous threats as burgeoning human development encroaches on its remaining habitat When Maurice Hornocker began the first long term study of

cougars in the Idaho wilderness in 1964 little was known about this large cat Its secretive nature and rarity in the landscape made it difficult to study But his groundbreaking research yielded major insights and was the prelude to further research on this controversial species The capstone to Hornocker s long career studying big cats Cougar is a powerful and practical resource for scientists conservationists and anyone with an interest in large carnivores He and conservationist Sharon Negri bring together the diverse perspectives of twenty two distinguished scientists to provide the fullest account of the cougar s ecology behavior and genetics its role as a top predator and its conservation needs This compilation of recent findings stunning photographs and firsthand accounts of field research unravels the mysteries of this magnificent animal and emphasizes its importance in healthy ecosystem processes and in our lives
