Sound Of Voices:

Voices in Revolution John A. Crespi, 2009-07-29 China's century of revolutionary change has been heard as much as seen and nowhere is this more evident than in an auditory history of the modern Chinese poem. From Lu Xun's seminal writings on literature to a recitation renaissance in urban centers today, poetics meets politics in the sounding voice of poetry. Supported throughout by vivid narration and accessible analysis, *Voices in Revolution* offers a literary history of modern China that makes the case for the importance of the auditory dimension of poetry in national revolutionary and postsocialist culture. Crespi brings the past to life by first examining the ideological changes to poetic voice during China's early twentieth-century transition from empire to nation. He then traces the emergence of the spoken poem from the May Fourth period to the present, including its mobilization during the Anti-Japanese War, its incorporation into the student protest repertoire during China's civil war, its role as a conflicted voice of Mao-era revolutionary passion, and finally its current adaptation to the cultural life of China's party-guided market economy. *Voices in Revolution* alters the way we read by moving poems off the page and into the real time and space of literary activity. To all readers, it offers an accessible yet conceptually fresh and often dramatic narration of China's modern literary experience. Specialists will appreciate the book's inclusion of noncanonical texts as well as its innovative interdisciplinary approach.

Voice as Art Richard Couzins, 2022-04-28 *Voice as Art* considers how artists have used human voices since they became reproducible and entered art discourse in the twentieth century. The discussion embeds artworks using voices within historical and theoretical contexts in a comparative overview, arguing that reproduction caused increased creativity, moving from acting to creating phonic materials framed by phenomenological deep listening by early video and performance to the plurality and sampling of postmodernism and the multiple angles of contemporary forensic listening. This change is an example of how artistic practice reveals the ideologies of listening. Using a range of examples from Hugo Ball, Martha Rosler, Vito Acconci, Bruce Nauman, Janet Cardiff, and Mike Kelley through to contemporary practice by Shilpa Gupta, The Otolith Group, and Elizabeth Price, the voice is tracked through modernism and postmodernism to posthumanism in relation to speaking subjects, sculptural objects, documents, dramaturgical utterance, forensic evidence, verbatim techniques, and embodied listening. This book gives artists, researchers, and art audiences ways to understand how voices exist in between theoretical discourses and how, with their utterances, artists create new dispositions in space by reworking genres to critique cultural form and meaning. This book will be of great interest to students and practitioners of sound art, visual culture, and theatre and performance.

Sound and the Ancient Senses Shane Butler, Sarah Nooter, 2018-10-03 Sound leaves no ruins and no residues even though it is experienced constantly. It is ubiquitous but fleeting. Even silence has sound; even absence resonates. *Sound and the Ancient Senses* aims to hear the lost sounds of antiquity, from the sounds of the human body to those of the gods, from the bathhouse to the Forum, from the chirp of a cicada to the music of the spheres. Sound plays so great a role in shaping our environments as to make it a crucial sounding board.

for thinking about space and ecology emotions and experience mortality and the divine orality and textuality and the self and its connection to others From antiquity to the present day poets and philosophers have strained to hear the ways that sounds structure our world and identities This volume looks at theories and practices of hearing and producing sounds in ritual contexts medicine mourning music poetry drama erotics philosophy rhetoric linguistics vocality and on the page and shows how ancient ideas of sound still shape how and what we hear today As the first comprehensive introduction to the soundscapes of antiquity this volume makes a significant contribution to the burgeoning fields of sound and voice studies and is the final volume of the series *The Senses in Antiquity* *Training Actors' Voices* Tara McAllister-Viel, 2018-08-06

Horrors of a Voice (object a)
Tristram Adams, 2024-07-11 This book reframes the Lacanian object a voice as a horrific register of alterity The object gaze has received as it does in Jacques Lacan's work more commentary than voice Yet recently voice has garnered interest from multiple disciplines The book intervenes in the Slovenian school's commentary of the object voice in terms of two questions audition and corporeality This intervention synthesizes psychoanalysis with recent theorizing of the horror of philosophy In this intervention the object a voice is argued to resonate in lacunae epistemological voids that evoke horror in the subject Biological and evolutionary perspectives on voice genre horror film and literature music videos close readings of Freudian and Lacanian case studies and textual analysis of ancient philosophy texts all contribute to an elucidation of the horrors of the object a voice Vox Exo
