Suite For Modern Man:

The Cello Suites Eric Siblin, 2011-01-04 An award winning journey through Johann Sebastian Bach's six cello suites and the brilliant musician who revealed their lasting genius One fateful evening journalist and pop music critic Eric Siblin attended a recital of Johann Sebastian Bach's Cello Suites an experience that set him on an epic quest to uncover the mysterious history of the entrancing compositions and their miraculous reemergence nearly two hundred years later In pursuit of his musicological obsession Siblin would unravel three centuries of intrigue politics and passion Winner of the Mavis Gallant Prize for Non fiction and the McAuslan First Book Prize *The Cello Suites* weaves together three dramatic narratives the disappearance of Bach's manuscript in the eighteenth century Pablo Casals's discovery and popularization of the music in Spain in the late nineteenth century and Siblin's infatuation with the suites in the present day The search led Siblin to Barcelona where Casals just thirteen and in possession of his first cello roamed the backstreets with his father in search of sheet music and found Bach's lost suites tucked in a dark corner of a store Casals played them every day for twelve years before finally performing them in public Siblin sheds new light on the mysteries that continue to haunt this music more than 250 years after its composer's death Why did Bach compose the suites for the cello then considered a lowly instrument What happened to the original manuscript A seamless blend of biography and music history *The Cello Suites* is a true life journey of discovery fueled by the power of these musical masterpieces The ironies of artistic genius and public taste are subtly explored in this winding entertaining tale of a musical masterpiece Publishers Weekly Siblin's writing is most inspired when describing the life of Casals showing a genuine affection for the cellist who used his instrument and the suites as weapons of protest and pleas for peace Booklist starred review *The Field Illustrated* A. H. Godfrey, Alexander Henry Waddell, 1929 The Way We Think Gilles Fauconnier, Mark Turner, 2008-08-06 In its first two decades much of cognitive science focused on such mental functions as memory learning symbolic thought and language acquisition the functions in which the human mind most closely resembles a computer But humans are more than computers and the cutting edge research in cognitive science is increasingly focused on the more mysterious creative aspects of the mind *The Way We Think* is a landmark synthesis that exemplifies this new direction The theory of conceptual blending is already widely known in laboratories throughout the world this book is its definitive statement Gilles Fauconnier and Mark Turner argue that all learning and all thinking consist of blends of metaphors based on simple bodily experiences These blends are then themselves blended together into an increasingly rich structure that makes up our mental functioning in modern society A child's entire development consists of learning and navigating these blends *The Way We Think* shows how this blending operates how it is affected by and gives rise to language identity and concept of category and the rules by which we use blends to understand ideas that are new to us The result is a bold exciting and accessible new view of how the mind works
