Sun Tzu The Technology of War Sun Tzu,Colin I. Thorne,2012-07-01 Is another translation of Sun Tzu really needed Yes it is What kind of translation would this be then It would be one which the reader did not have to guess at the meaning of what Sun Tzu said In other words it would be a translation which was not inscrutable in part or in whole but completely understandable It would not be a translation which made the reader feel as though he or she did not have the ability to grasp Sun Tzu s ideas It would not be a translation which made the reader wonder if he or she was applying it correctly Rather it would be a translation one could understand and use readily Sun Tzu The Technology of War is the book which finally allows Sun Tzu to be fully understood and correctly applied It is doubtful that any English translation of Sun Tzu is based upon more years of research than Sun Tzu The Technology of War Ten years went into the research and translation of this book Each character was meticulously investigated Warfare of Sun Tzu s era and earlier eras were researched based upon what Sun Tzu mentions of the skill of warriors of ancient times in order to understand what Sun Tzu had observed of warfare and then codified into his laws rules and methods of war This is not another translation based upon someone else s translation This translation has no other source than the wisdom of Sun Tzu

Here are some highlights from the book The supreme art of war is to subdue the enemy without fighting If the enemy is strong and well deploy we should avoid any direct conflict with them Choose an unexpected timing for our military operation We can determine whether we can win the war before the battle The key is whether we have strong advantages in the criteria and factors for victory Once we send out our hundreds of thousand army forces we should be seeking a decisive battle as soon as possible The army will be tired if the war lasts long their force will be weakening No country can be benefiting from a long lasting war The country may need to increase the taxes and duties for financing the battles In such a case the strength of our arm will be weakened and the country will lose its wealth and reserves It s better to take the enemy s company forces instead of destroying all of them If the weaker side in the battle insists on directly fighting with the enemy they will eventually become prisoners of the stronger enemy They can avoid mistakes as there are fulfilling those victory criteria their enemy is destined to be defeated in the battle
