Sunflower Resin Cross:

Van Gogh's Sunflowers Illuminated Ella Hendriks, Marije Vellekoop, Maarten Bommel, Muriel Geldof, 2025-10-01
Vincent van Gogh's Sunflowers are seen by many as icons of Western European art. Two of these masterpieces, the first version painted in August 1888 (The National Gallery London) and the painting made after it in January 1889 (Van Gogh Museum Amsterdam) have been the subject of a detailed comparison by an interdisciplinary team of experts. The pictures were examined in unprecedented depth using a broad array of techniques including state-of-the-art non-invasive imaging analytical methods to look closely at and under the paint surface. Not only the making but also the subsequent history of the works was reconstructed, including later campaigns of restoration. The study's conclusions are set out in this book along with the fascinating genesis of the paintings and the sunflower's special significance to Van Gogh. More than 30 authors, all specialists in the field of conservation, conservation science and art history, have contributed to the research and publication, presenting the outcomes of this unique project.

Paint and Coating Testing Manual, *Biocomposites for High-Performance Applications* Dipa Ray, 2017-05-15
Biocomposites for High Performance Applications: Current Barriers and Future Needs Towards Industrial Development focuses on future research directions that will make biocomposites a successful player in the field of high-strength structural applications. With contributions from eminent academic researchers and industrial experts who have first-hand experience on the advantages/disadvantages of biocomposites in their daily lives, the book examines the industrial development of biocomposite products, identifying the current barriers and their future industrial needs. Topics covered include recent research activities from academia in the biocomposite research field, valuable thoughts and insights from biocomposite manufacturing industries, the strengths and weaknesses of biocomposite products, and the practical issues that need to be addressed to reach the next level. Highlights the practical issues involved in biocomposites research. Contains contributions from eminent academic researchers and industrial experts.
