Exploring Ancient Skies David H. Kelley, Eugene F. Milone, 2005-12-06 *Exploring Ancient Skies* brings together the methods of archaeology and the insights of modern astronomy to explore the science of astronomy as it was practiced in various cultures prior to the invention of the telescope The book reviews an enormous and growing body of literature on the cultures of the ancient Mediterranean the Far East and the New World particularly Mesoamerica putting the ancient astronomical materials into their archaeological and cultural contexts The authors begin with an overview of the field and proceed to essential aspects of naked eye astronomy followed by an examination of specific cultures The book

concludes by taking into account the purposes of ancient astronomy astrology navigation calendar regulation and not least the understanding of our place and role in the universe Skies are recreated to display critical events as they would have appeared to ancient observers events such as the supernova of 1054 the lion horoscope or the Star of Bethlehem Exploring Ancient Skies provides a comprehensive overview of the relationships between astronomy and other areas of human investigation It will be useful as a reference for scholars and students in both astronomy and archaeology and will be of compelling interest to readers who seek a broad understanding of our collective intellectual history

Make: Maverick Scientist Forrest M. Mims, 2024-02-14 Maverick Scientist is the memoir of Forrest Mims who forged a distinguished scientific career despite having no academic training in science Named one of the 50 Best Brains in Science by Discover magazine Forrest shares what sparked his childhood curiosity and relates a lifetime of improbable dramatic and occasionally outright dangerous experiences in the world of science At thirteen he invented a new method of rocket control At seventeen he designed and built an analog computer that could translate Russian into English and that the Smithsonian collected as an example of an early hobby computer While majoring in government at Texas A M University Forrest created a hand held radar like device to help guide the blind And during his military service he had to be given special clearance to do top secret laser research at the Air Force Weapons Lab Why Because while he lacked the required engineering degree they wanted his outside the box thinking on the project He went on to co found MITS Inc producer of the first commercially successful personal computer wrote a series of electronics books for Radio Shack that sold more than seven million copies and designed the music synthesizer circuit that became known as the infamous Atari Punk Console All this came before he started consulting for NASA s Goddard Space Flight Center and NOAA s famous Mauna Loa Observatory and earning the prestigious Rolex Award This intimate portrait of a self made scientist shares a revelatory look inside the scientific community and tells the story of a lifelong learner who stood by his convictions even when pressured by the establishment to get in line with conventional wisdom With dozens of personal photos and illustrations Maverick Scientist serves as proof that to be a scientist you simply need to do science

Inside Out Dana Xavier Kerola, 2009-05-27 This work is a new look at the age old philosophical question of the mind body duality The author adeptly demonstrates that there is not really any conflict in the two seemingly opposing views When it is realized that the universe is governed purely by physical laws the supposed dichotomy dissolves Inspired by his long running exploration of the panorama of pop music the author blends in references to song lyrics as he explains the ways in which the lives of human beings are inextricably tied to the larger precedent world of planets stars and galaxies His personal reflections on reality include topics ranging from the epistemology of satellite remote sensing to fundamental discussions of anthropology astronomy and atmospheric science He also offers thoughtful commentary on our quest to continue present and future space exploration as he forecasts what will become of the universe and us in the very distant future Inside Out Looking for Ourselves in Time and Space will appeal to both the general reader

and research scientists alike The Optics of Life Sönke Johnsen, 2012 Optics a field of physics focusing on the study of light is also central to many areas of biology including vision ecology botany animal behavior neurobiology and molecular biology The Optics of Life introduces the fundamentals of optics to biologists and nonphysicists giving them the tools they need to successfully incorporate optical measurements and principles into their research Sönke Johnsen starts with the basics describing the properties of light and the units and geometry of measurement He then explores how light is created and propagates and how it interacts with matter covering topics such as absorption scattering fluorescence and polarization Johnsen also provides a tutorial on how to measure light as well as an informative discussion of quantum mechanics The Optics of Life features a host of examples drawn from nature and everyday life and several appendixes that offer further practical guidance for researchers This concise book uses a minimum of equations and jargon explaining the basic physics of light in a succinct and lively manner It is the essential primer for working biologists and for anyone seeking an accessible introduction to optics **Renewable Energy, Technology and the Environment** A.
