Marketing and Mobile Financial Services Aijaz A. Shaikh, Heikki Karjalainen, 2018-12-21 Mobile financial services MFS are of major interest and importance to both researchers and practitioners The role played by nonbanking actors including telecoms and FinTech firms as well as other participants such as PayPal and Amazon in developing and deploying innovative financial and payment services is undeniable Peer2peer P2P payments from nonbank services are becoming increasingly commonplace and will shortly be codified by EC EU regulations requiring banks to provide access to consumer data for third party app developers and service providers Three major mobile financial systems mobile banking mobile payments and branchless banking currently dominate the electronic retail banking sector Although interconnected and interrelated their business models regulatory frameworks and target markets are distinct This book provides a unified perspective on MFS and discusses its evolution growth and future as well as identifying the frameworks stakeholders and technologies used in financial information systems in general and MFS in particular Academics and researchers in digital and financial marketing will find this book an invaluable resource as will bank executives regulators policy makers FinTech professionals and anyone interested in how mobile technology social media and financial services will increasingly intersect

Ontology-Based Multi-Agent Systems Maja Hadzic, Elizabeth J. Chang, Pornpit Wongthongtham, 2009-06-25 During the last two decades the idea of Semantic Web has received a great deal of attention An extensive body of knowledge has emerged to describe technologies that seek to help us create and use aspects of the Semantic Web Ontology and agent based technologies are understood to be the two important technologies here A large number of articles and a number of books exist to describe the use individually of the two technologies and the design of systems that use each of these technologies individually but little focus has been given on how one can sign systems that carryout integrated use of the two different technologies In this book we describe ontology and agent based systems individually and highlight advantages of integration of the two different and complementary technologies We also present a methodology that will guide us in the design of the integrated ontology based multi agent systems and illustrate this

methodology on two use cases from the health and software engineering domain This book is organized as follows Chapter I Current issues and the need for ontologies and agents describes existing problems associated with uncontrollable information overload and explains how ontologies and agent based systems can help address these issues Chapter II Introduction to multi agent systems defines agents and their main characteristics and features including mobility communications and collaboration between different agents It also presents different types of agents on the basis of classifications done by different authors
