Frédéric Guay,Herbert Marsh,Dennis M. McInerney,Rhonda G. Craven,2015-06-01 The concept of the Self has a long history that dates back from the ancient Greeks such as Aristotle to more contemporary thinkers such as Wundt James Mead Cooley Freud Rogers and Erikson Tesser Felson 2000 Research on the Self relates to a range of phenomena including self esteem self concept self protection self verification self awareness identity self efficacy self determination etc that could be sharply different or very similar Despite this long tradition of thinkers and the numerous studies conducted on the Self this concept is still not very well defined More precisely it is not a precise object of study but rather a collection of loosely related subtopics Baumesiter 1998 Also in the philosophical literature the legitimacy of the concept of self has been brought into question Some authors have argued that the self is not a psychological entity per se but rather an illusion created by the complex interplay between cognitive and neurological subsystems Zahavi 2005 Although no definitive consensus has been reached regarding the Self we emphasis in this volume that the Self and its related phenomena including self concept motivation and identity are crucial for understanding consciousness and therefore important to understand human behavior Self concept motivation and identity Underpinning success with research and practice provides thus a unique insight into self concept and its relationship to motivation and identity from varied theoretical and empirical perspectives This volume is intended to develop both theoretical and methodological ideas and to present empirical evidence demonstrating the importance of theory and research to effective practice   **Social Science Research** Turner Lomand,2016-09-13 This new edition gives students valuable practice in reading and evaluating research All major methods of research are illustrated including qualitative research content document analysis survey research observational research experimental research and program evaluation The articles deal with contemporary topics that will hold your students attention The lines in each article are sequentially numbered This allows easy reference to specific parts of the articles during classroom discussions Factual Questions at the end of each article encourage students to read for methodological and substantive points The Answer Key provides answers to the Factual Questions The line numbers where the answers can be found are included making the key easy to use The Questions for Discussion at the end of each article address broad issues of research design and overall research quality Ideal for homework assignments followed by classroom discussions at the next class meeting   Handbook of Adolescent Development Research and Its Impact on Global Policy Jennifer E.
